

November 15, 2019. The NRC staff prepared a safety evaluation report for the termination of SNM-180 and concluded that this license termination complies with the standards and requirements of the Atomic Energy Act of 1954, as amended, section 70.38 of

title 10 of the *Code of Federal Regulations* (10 CFR), and other applicable NRC's rules and regulations as set forth in 10 CFR chapter 1. Accordingly, this license termination was issued on January 23, 2020.

II. Availability of Documents

The documents identified in the following table are available to interested persons through the ADAMS accession numbers as indicated.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 72-11; NRC-2018-0147]

Sacramento Municipal Utility District; Rancho Seco Independent Spent Fuel Storage Installation

AGENCY: Nuclear Regulatory Commission.

ACTION: License renewal; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has issued a renewed license to the Sacramento Municipal Utility District for Special Nuclear Materials (SNM) License No. SNM-2510 for the receipt, possession, transfer, and storage of radioactive material from the Rancho Seco Nuclear Generating Station in the Rancho Seco independent spent fuel storage installation (ISFSI). The Rancho Seco ISFSI is located on the Rancho Seco site, in Sacramento County, California. The renewed license authorizes operation of the Rancho Seco ISFSI in accordance with the provisions of the renewed license and its technical specifications. The renewed license expires on June 30, 2060.

DATES: The license referenced in this document is available as of March 9, 2020.

ADDRESSES: Please refer to Docket ID NRC-2018-0147 when contacting the

NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- **Federal Rulemaking website:** Go to <https://www.regulations.gov> and search for Docket ID NRC-2018-0147. Address questions about NRC docket IDs in *Regulations.gov* to Jennifer Borges; telephone: 301-287-9127; email: Jennifer.Borges@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- **NRC's Agencywide Documents Access and Management System (ADAMS):** You may obtain publicly-available documents online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. For the convenience of the reader, instructions about obtaining materials referenced in this document are provided in the "Availability of Documents" section.

- **NRC's PDR:** You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Kristina Banovac, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-7116, email: Kristina.Banovac@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Discussion

Based upon the application dated March 19, 2018, as supplemented June 25, 2018, August 6, 2018, September 26, 2018, April 22, 2019, June 26, 2019, July 12, 2019, and January 23, 2020, the NRC has issued a renewed license to the licensee for the Rancho Seco ISFSI, located in Sacramento County, California. The renewed license SNM-2510 authorizes and requires operation of the Rancho Seco ISFSI in accordance with the provisions of the renewed license and its technical specifications. The renewed license will expire on June 30, 2060.

The licensee's application for a renewed license complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the NRC's rules and regulations. The NRC has made appropriate findings as required by the Act and the NRC's regulations in chapter 1 of title 10 of the *Code of Federal Regulations* (10 CFR), and sets forth those findings in the renewed license. The agency afforded an opportunity for a hearing in the Notice of Opportunity for a Hearing published in the **Federal Register** on August 22, 2018 (83 FR 42527). The NRC received no request for a hearing or petition for leave to intervene following the notice.

The NRC staff prepared a safety evaluation report for the renewal of the ISFSI license and concluded, based on that evaluation, the ISFSI will continue to meet the regulations in 10 CFR part 72. The NRC staff also prepared an environmental assessment and finding of no significant impact for the renewal of this license, which were published in the **Federal Register** on March 6, 2020 (85 FR 13191, Docket ID NRC-2019-0148). The NRC staff's consideration of the impacts of continued storage of

spent nuclear fuel (as documented in NUREG-2157, "Generic Environmental Impact Statement for Continued Storage of Spent Fuel") was included in the environmental assessment. The NRC staff concluded that renewal of this

ISFSI license will not have a significant impact on the quality of the human environment.

II. Availability of Documents

The following table includes the ADAMS Accession Numbers for the

documents referenced in this notice. For additional information on accessing ADAMS, see the **ADDRESSES** section of this document.

BILLING CODE 7590-01-P

POSTAL SERVICE

Privacy Act; Notice of a Modified System of Records

AGENCY: Postal Service™.

ACTION: Notice of a modified system of records.

SUMMARY: The United States Postal Service™ (USPS™) is proposing to revise a Customer Privacy Act Systems of Records (SOR). These changes are being made to support ongoing efforts to identify, mitigate and prevent fraudulent transactions.

DATES: These revisions will become effective without further notice on April 15, 2020, unless comments received on or before that date result in a contrary determination.

ADDRESSES: Comments may be mailed or delivered to the Privacy and Records Management Office, United States Postal Service, 475 L'Enfant Plaza SW, Room 1P830, Washington, DC 20260-1101. Copies of all written comments will be available at this address for public inspection and photocopying between 8 a.m. and 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT:

Janine Castorina, Chief Privacy and Records Management Officer, Privacy and Records Management Office, 202-268-3069 or *privacy@usps.gov*.

SUPPLEMENTARY INFORMATION: This notice is in accordance with the Privacy Act requirement that agencies publish their systems of records in the **Federal Register** when there is a revision, change, or addition, or when the agency establishes a new system of records. The Postal Service has determined that Customer Privacy Act Systems of Records, USPS 910.000 Identity and Document Verification Services, should be revised to support efforts to enhance remote identity proofing capabilities and improve the customer's ability to successfully complete required online identity proofing activities.

The Postal Service is implementing Device Reputation assessment technology to enhance its existing remote identity proofing solution, and to detect to the best extent possible, fraudulent history and characteristics of a malicious user. The Postal Service's objective in implementing the Device Reputation solution is to assess the risk associated with a user and establish a confidence level for that assessment. The validation and verification of the minimum attributes necessary is used to accomplish identity proofing.

Device Reputation uses the unique characteristics of a user's electronic device profile to complete identity verification and make a recommendation on the risk level of the user. Devices are profiled during the

verification process and compared to a digital identity, generated from device profiles and activity collected across industry. Based on the past activity of that digital identity, as well as a number of attributes associated with the device itself, fraud risk and confidence scores are generated for that identity verification transaction. The device risk score expresses the fraud risk level of the transaction, while the confidence score establishes the level of confidence in the digital identity match. Digital identity represents the online footprint of the user. USPS Identity Verification Services (IVS) will use those risk and confidence scores to assess and make decisions about granting users access to USPS products, services and features. The scores will be saved by IVS to support post-transaction fraud analysis efforts and to respond to individual records requests consistent with Privacy Act requirements.

Pursuant to 5 U.S.C. 552a (e)(11), interested persons are invited to submit written data, views, or arguments on this proposal. A report of the proposed revisions has been sent to Congress and to the Office of Management and Budget for their evaluations. The Postal Service does not expect this amended systems of records to have any adverse effect on individual privacy rights. The notice for

USPS 910.000, Identity and Document Verification

Services, provided below in its entirety, is as follows:
