NUCLEAR REGULATORY COMMISSION

[Docket No. 72-1051; NRC-2018-0052]

Holtec International HI-STORE Consolidated Interim Storage Facility Project

AGENCY: Nuclear Regulatory Commission.

ACTION: Draft environmental impact statement; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment a draft Environmental Impact Statement (EIS) for Holtec International's (Holtec's) application to construct and operate a consolidated interim storage facility (CISF) for spent nuclear fuel (SNF) and Greater-Than

Class C (GTCC) waste, along with a small quantity of mixed oxide fuel. The proposed CISF would be located in southeast New Mexico at a site located approximately halfway between the cities of Carlsbad and Hobbs, New Mexico. The proposed action is the issuance of an NRC license authorizing the initial phase (Phase 1) of the project to store up to 8,680 metric tons of uranium [9,568 short tons] in 500 canisters for a license period of 40 years. Holtec plans to subsequently request amendments to the license to store an additional 500 canisters for each of 19 expansion phases of the proposed CISF (a total of 20 phases), to be completed over the course of 20 years, and to expand the proposed facility to eventually store up to 10,000 canisters of SNF.

DATES: The NRC staff will hold public meetings on the draft EIS. The public meeting details will be announced in the near future. The staff will present the preliminary findings and receive public comments during transcribed public meetings.

Members of the public are invited to submit comments by May 22, 2020. Comments received after this date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received before this date.

II. Discussion

The NRC is issuing for public comment the draft EIS for Holtec International’s License Application for a Consolidated Interim Storage Facility for Spent Nuclear Fuel and High Level Waste regarding an application from Holtec requesting a license to construct and operate a CISF for SNF and GTCC waste, along with a small quantity of mixed-oxide fuel, which are collectively referred to in the EIS as SNF, and composed primarily of spent uranium-based fuel.

The draft EIS for Holtec’s license application includes the preliminary analysis that evaluates the environmental impacts of the proposed action and alternatives to the proposed action. After comparing the impacts of the proposed action (Phase 1) to the No-Action alternative, the NRC staff, in accordance with the requirements in part 51 of title 10 of the *Codes of Federal Regulations*, recommends the proposed action (Phase 1), which is the issuance of an NRC license for 40 years to Holtec to construct and operate a CISF for SNF at the proposed location. In addition, the Bureau of Land Management (BLM) staff recommends the issuance of a permit to construct and operate the rail spur. This recommendation is based on (i) the license application, which includes an environmental report and supplemental documents, and Holtec’s responses to the NRC staff’s requests for additional information; (ii) consultation with Federal, State, Tribal, local agencies, and input from other stakeholders; (iii) independent NRC and BLM staff review; and (iv) the assessments provided in the EIS.

Dated at Rockville, Maryland, this 13th day of March, 2020.
