

terrace to outlet into a filtration area separately or in conjunction with an outlet channel was added. For a wall height greater than 3 feet, a requirement to include a stability analysis was added.

Row Arrangement (Code 557): Minor editorial changes to Purposes and Condition Where Practice Applies sections to provide clarity. The order of topics in Criteria section was changed to provide a better flow of information. Editorial changes were made to Considerations section to provide context and clarity. Reference was added.

Saline and Sodic Soil Management (Code 610): The name of the standard has changed slightly from "Salinity and Sodic Soil Management." Minor revisions were made for clarity and readability purposes. The Criteria section was reordered to better match criteria to intended purposes.

Saturated Buffer (Code 604): Formatting and writing style were updated to meet current agency requirements. Moved a few sentences to more appropriate sections of the practice. Minor revisions were made for clarity and readability purposes. In "Conditions Where Practice Applies," changes were made to expand the applicability of the standard by allowing the practice to be applied to subsurface drainage systems with surface inlets. If the system includes surface inlets, the practice applies only if the inlets are adequately protected to prevent entry of soil and debris capable of plugging the distribution pipes.

Spoil Disposal (Code 572): Changed the name from "Spoil Spreading" and changed the units from acres to cubic feet. The Definition section was broadened to include all construction activities. The Purposes section was rewritten to align with resource concerns and the Criteria section was simplified.

Spring Development (Code 574): Formatting and writing style were updated to meet current agency requirements. Moved text in Criteria section to better align with the subsections. Updated Plans and Specifications and Operation and Maintenance sections with concise text. Changed the Definitions section to exclude Purpose section language.

Stormwater Runoff Control (Code 570): Changed the Definition to systems to control the quantity and quality of stormwater runoff. Reworded to remove flooding and clarify where the practice is used. Added emphasis for infiltration of precipitation for use in ground water recharge. Allowed other measures in addition to vegetative measures.

Streambank and Shoreline Protection (Code 580): Formatting and writing style were updated to meet current agency requirements. Minor revisions were made for clarity and readability purposes. References were also updated.

Surface Drain, Field Ditch (Code 607): Formatting and writing style were updated to meet current agency requirements. Updated Criteria section to include responsibilities of the landowner and contractor to follow laws and regulations, obtain all necessary permits, and locate all utilities.

Terrace (Code 600): Minor revisions were made for clarity and readability purposes. Revised the Purpose section from "retain runoff for moisture conservation" to "manage runoff" which includes stormwater management. In General Criteria, the Alignment heading was moved to the top, slightly reworded, and NRCS CPS Contour Farming (Code 330) was referenced. Topsoiling was moved from Criteria to Considerations section as it is not always required. Removed sentences on underground outlets because NRCS CPS Underground Outlet (Code 620) is referenced and that guidance is located there. Updated Consideration section on establishing temporary cover on disturbed areas that will cropped.

Trails and Walkways (Code 575): Improved wording for clarity and readability. Added criteria for drain spacing and trail widths. Clarified what is to be provided in the Specifications section and updated the References section.

Tree/Shrub Site Preparation (Code 490): Formatting and writing style were updated to meet current agency requirements. Minor revisions were made for clarity and readability purposes. Criteria section was updated to add for avoiding or mitigating soil damage and hydrologic impacts, and for evaluating pesticide risks. A new consideration was added, plans and Specifications section was expanded to align with conservation plan requirements, and Operations and Maintenance section was expanded to include safety plans for chemical exposure. The References section was also updated.

Underground Outlet (Code 620): Minor rewording to improve readability. Clarified Criteria section on thrust blocking, bedding, and backfill requirements to evaluate for site-specific conditions. Revised Criteria section for maximum velocity in perforated drain tubing to 12 feet per second and maximum velocity in nonperforated pipe to follow manufacturer's recommendations. Under Outlet heading of the Criteria section, a table

was added showing minimum lengths of outlet pipe required by pipe diameter. Considerations section was updated to add selecting vegetation species that are native, support pollinators, and wildlife as appropriate.

Vegetative Barrier (Code 601): Added new purpose, "Reduce ephemeral gully erosion" and reworded the last purpose. Changed the Conditions Where Practice Applies section to add gully erosion to the statement. Formatting and writing style were updated to meet current agency requirements. Changed table to add stem diameter (.35) and associated densities. Also changed the densities for the .5 diameter.

Water Harvesting Catchment (Code 636): Definition was revised to more clearly define practice. Purposes section was reworded to more directly relate to the stated resource concerns. Condition Where Practice Applies section was rewritten to clearly explain where practice may be used. Criteria section was revised and reordered to clearly explain the design requirements. Considerations section was rewritten to provide additional information for designers to consider when planning and designing the practice.

Watering Facility (Code 614): Minor revisions were made for clarity and readability purposes. Clarification added that this practice does not apply to embankment or excavated ponds. Requirements were added for backflow prevention when connecting to domestic or municipal water supplies. Requirements were added for fencing where fencing is needed.

Water Well (Code 642): This standard has undergone minimal changes. Changes in the Criteria section included adding a new "roles and responsibility," "screen and filter pack installation," and "well performance aquifer testing" criteria.

Well Decommissioning (Code 351): This standard has undergone minimal changes. Changes to the Criteria section include adding "Laws and Regulation," "Roles and Responsibilities," "Disinfection," and "Sealing and Collapsible Formation." Deleted "Casing Grouted in Place" criterion.
