

Medical Surveillance Examinations for Coal Miners.

DATES: All comments must be received on or before May 26, 2020.

ADDRESSES: You may submit comment as follows. Please note that late, untimely filed comments will not be considered.

Electronic Submissions: Submit electronic comments in the following way:

- *Federal eRulemaking Portal:* <https://www.regulations.gov>. Follow the instructions for submitting comments for docket number MSHA–2020–0010.

- Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket, with no changes. Because your comment will be made public, you are responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as your or anyone else's Social Security number or confidential business information.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission.

Written/Paper Submissions: Submit written/paper submissions in the following way:

- *Mail/Hand Delivery:* Mail or visit DOL–MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, VA 22202–5452.

- MSHA will post your comment as well as any attachments, except for information submitted and marked as confidential, in the docket at <https://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT:

Sheila McConnell, Director, Office of Standards, Regulations, and Variances, MSHA, at MSHA.information.collections@dol.gov (email); (202) 693–9440 (voice); or (202) 693–9441 (facsimile).

SUPPLEMENTARY INFORMATION:

I. Background

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811, authorizes the Secretary of Labor to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of

injuries in coal and metal and nonmetal mines.

The Mine Act authorizes the National Institute for Occupational Safety and Health (NIOSH) to study the causes and consequences of coal-related respiratory disease, and in cooperation with MSHA, to carry out a program for early detection and prevention of pneumoconiosis. NIOSH administers the National Coal Workers' Health Surveillance Program, "Specifications for Medical Examinations of Underground Coal Miners," as specified in 42 CFR part 37. Title 30 CFR 72.100 contains collection requirements for these activities in paragraphs (d) and (e).

Section 72.100(d) requires that each mine operator must develop and submit for approval to NIOSH a plan in accordance with 42 CFR part 37 for providing miners with the required periodic examinations specified in section 72.100(a) and a roster specifying the name and current address of each miner covered by the plan.

Section 72.100(e) requires that each mine operator must post on the mine bulletin board at all times the approved plan for providing the examinations specified in section 72.100(a).

Sections 72.100(d) and (e) are requirements that mirror NIOSH information collection requirements under 42 CFR 37.4 (existing OMB No. 0920–0020). Including these requirements allows MSHA to use its inspection and enforcement authority to ensure that operators comply with these provisions.

II. Desired Focus of Comments

MSHA is soliciting comments concerning the proposed information collection. MSHA is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information has practical utility;
- Evaluate the accuracy of MSHA's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Background documents related to this information collection request are

available at <https://regulations.gov> and in DOL–MSHA located at 201 12th Street South, Suite 4E401, Arlington, VA 22202–5452. Questions about the information collection requirements may be directed to the person listed in the **FOR FURTHER INFORMATION** section of this notice from the previous collection of information.

III. Current Actions

This information collection request concerns provisions for Periodic Medical Surveillance Examinations for Coal Miners. MSHA has updated the data with respect to the number of respondents, responses, burden hours, and burden costs supporting this information collection request from the previous information collection request.

Type of Review: Extension, without change, of a currently approved collection.

Agency: Mine Safety and Health Administration.

OMB Number: 1219–0152.

Affected Public: Business or other for-profit.

Number of Respondents: 1,126.

Frequency: On occasion.

Number of Responses: 1,352.

Annual Burden Hours: 1,051 hours.

Annual Respondent or Recordkeeper Cost: \$406.

Comments submitted in response to this notice will be summarized in the request for Office of Management and Budget approval of the proposed information collection request; they will become a matter of public record and will be available at <https://www.reginfo.gov>.

Sheila McConnell,

Certifying Officer.

BILLING CODE 4510–43–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

[OMB Control No. 1219–0034]

Proposed Extension of Information Collection; Records of Tests and of Examinations of Personnel Hoisting Equipment

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Request for public comments.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an

opportunity to comment on proposed collections of information in accordance with the Paperwork Reduction Act of 1995. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments on the information collection for Records of Tests and of Examinations of Personnel Hoisting Equipment.

DATES: All comments must be received on or before May 26, 2020.

ADDRESSES: Comments concerning the information collection requirements of this notice may be sent by any of the methods listed below.

- *Federal E-Rulemaking Portal:* <http://www.regulations.gov>. Follow the on-line instructions for submitting comments for docket number MSHA–2020–0012.

- *Regular Mail:* Send comments to USDOL–MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, VA 22202–5452.

- *Hand Delivery:* USDOL–Mine Safety and Health Administration, 201 12th Street South, Suite 4E401, Arlington, VA 22202–5452. Sign in at the receptionist's desk on the 4th floor via the East elevator.

FOR FURTHER INFORMATION CONTACT: Sheila McConnell, Director, Office of Standards, Regulations, and Variances, MSHA, at MSHA.information.collections@dol.gov (email); (202) 693–9440 (voice); or (202) 693–9441 (facsimile).

SUPPLEMENTARY INFORMATION:

I. Background

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811, authorizes the Secretary of Labor to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal or other mines.

Under Title 30 of the Code of Federal Regulations (CFR), MSHA has requirements that address hoists and apparatuses, including wire rope, used for hoisting persons. The requirements address both metal and nonmetal surface and underground

mines (30 CFR parts 56 and 57); and underground coal and surface work areas of underground coal mines (30 CFR parts 75 and 77).

Sections 56/57.19022 and 75/77.1432 requires the diameter of newly installed wire rope to be measured at least once in every third interval of the rope's active length to establish a baseline for subsequent semiannual measurements. A record of the measurements is required to be made and retained until the rope is retired from service.

Sections 56/57.19023 and 75/77.1433 require the wire rope to be visually examined at least every fourteen days for visible structural damage, corrosion, and improper lubrication or dressing. If the examination reveals weakening portions of the rope, the weakened portions must be monitored daily for further deterioration until retirement criteria require that the rope be removed from service. The person conducting the examination must certify that the examination was made and the record must be retained for one year.

Sections 56/57.19121 requires the person conducting the inspection, test or examination of hoisting equipment certify that these activities have been done. Any unsafe conditions must be noted in a record and dated. All certifications and records must be retained for one year.

Section 75.1400–2 requires a record to be made of tests conducted on safety catches. Safety catches are the last means to stop, safely, a falling conveyance in the event of rope or equipment failure.

Sections 75.1400–4 and 77.1404 require a record to be made of each daily examination. If any unsafe condition is found during the examination, the person conducting the examination must make a record of the condition. All certifications and records must be retained for one year.

Section 77.1906 requires a daily examination of hoists used for shaft sinking. If any unsafe condition is found during the examination, the person conducting the examination must make a record of the condition. All certifications and records must be retained for one year.

II. Desired Focus of Comments

MSHA is soliciting comments concerning the proposed information collection. MSHA is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information has practical utility;

- Evaluate the accuracy of MSHA's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and

- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

The information collection request will be available on <http://www.regulations.gov>. MSHA cautions the commenter against providing any information in the submission that should not be publicly disclosed. Full comments, including personal information provided, will be made available on www.regulations.gov and www.reginfo.gov.

The public may also examine publicly available documents at USDOL–Mine Safety and Health Administration, 201 12th Street South, Suite 4E401, Arlington, VA 22202–5452. Sign in at the receptionist's desk on the 4th floor via the East elevator.

Questions about the information collection requirements may be directed to the person listed in the **FOR FURTHER INFORMATION** section of this notice.

III. Current Actions

This request for collection of information contains provisions for Records of Tests and of Examinations of Personnel Hoisting Equipment. MSHA has updated the data with respect to the number of respondents, responses, burden hours, and burden costs supporting this information collection request.

Type of Review: Extension, without change, of a currently approved collection.

Agency: Mine Safety and Health Administration.

OMB Number: 1219–0034.

Affected Public: Business or other for-profit.

Number of Respondents: 225.

Frequency: On occasion.

Number of Responses: 61,366.

Annual Burden Hours: 5,133 hours.

Annual Respondent or Recordkeeper Cost: \$270,000.

Comments submitted in response to this notice will be summarized and included in the request for Office of Management and Budget approval of the

information collection request; they will also become a matter of public record.

Sheila McConnell,
Certifying Officer.

MSHA, at MSHA.information.collections@dol.gov (email); (202) 693-9440 (voice); or (202) 693-9441 (facsimile).

SUPPLEMENTARY INFORMATION:

I. Background

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811, authorizes the Secretary of Labor (Secretary) to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal and metal and nonmetal mines.

This Information Collection Request concerns recordkeeping requirements related to: (1) Inspection of compressed-air receivers and other unfired pressure vessels, (2) Boilers, (3) Safety defects; examination, correction and records, and (4) Examination of working places.

Under sections 56.13015 and 57.13015 of title 30, Code of Federal Regulations (CFR), compressed-air receivers and other unfired pressure vessels must be inspected by inspectors holding a valid National Board Commission and in accordance with the applicable chapters of the National Board Inspection Code, a Manual for Boiler and Pressure Vessels Inspectors, 1979. Safety defects found on compressed-air receivers and other unfired pressure vessels have caused injuries and fatalities in the mining industry.

Records of inspections must be kept in accordance with the requirements of the National Board Inspection Code and the records must be made available to the Secretary or an authorized representative.

Under sections 56.13030 and 57.13030 of title 30 CFR, fired pressure vessels (boilers) must be equipped with water level gauges, pressure gauges, automatic pressure-relief valves, blowdown piping and other safety devices approved by the American Society of Mechanical Engineers to protect against hazards from overpressure, flameouts, fuel interruptions and low water level.

Records of inspection and repairs must be retained by the mine operator in accordance with the requirements of the ASME Boiler and Pressure Vessel Code, 1977, and the National Board Inspection Code (progressive records—no limit on retention time) and shall be made available to the Secretary or an authorized representative.

Under sections 56.14100 and 57.14100, operators must inspect equipment, machinery, and tools that are to be used during a shift for safety defects before the equipment is placed in operation. Defects affecting safety are required to be corrected in a timely manner. In instances where the defect makes continued operation of the equipment hazardous to persons, the equipment must be removed from service, tagged to identify that it is out of use, and repaired before use is resumed.

Safety defects on self-propelled mobile equipment account for many injuries and fatalities in the mining industry. Inspection of this equipment prior to use is required to ensure safe operation. The equipment operator is required to make a visual and operational check of the various primary operating systems that affect safety, such as brakes, lights, horn, seatbelts, tires, steering, back-up alarm, windshield, cab safety glass, rear and side view mirrors, and other safety and health related items.

Any defects found are required to be either corrected immediately, or reported to and recorded by the mine operator prior to the timely correction. The precise format in which the record is kept is left to the discretion of the mine operator. Reports of uncorrected defects are required to be recorded by the mine operator and kept at the mine office from the date the defects are recorded, until the defects are corrected.

Under sections 56.18002 and 57.18002 of title 30 CFR, a competent person designated by the operator shall examine each working place at least once each shift before miners begin work in that place, for conditions that may adversely affect safety or health. A record of each examination must be made before the end of the shift for which the examination was conducted. The record must contain the name of the person conducting the examination; the date of the examination; location of all areas examined; and description of each condition found that may adversely affect the safety or health of miners. When a condition that may adversely affect safety or health is corrected, the examination record shall include, or be supplemented to include, the date of the corrective action. The operator must maintain the examination records for at least one year, make the records available for inspection by authorized representatives of the Secretary and the representatives of miners, and provide these representatives a copy on request.
