### SUPPLEMENTARY INFORMATION:

*Title:* Pre-sale Availability of Written Warranty Terms (Pre-Sale Availability Rule or Rule), 16 CFR 702.

*OMB Control Number:* 3084-0112.

*Type of Review:* Extension of a currently approved collection.

*Abstract:* On December 31, 2019, the FTC sought public comment on the information collection requirements associated with the Rule. 84 FR 72362. No germane comments were received.<sup>1</sup> Pursuant to the OMB regulations, 5 CFR part 1320, that implement the PRA, 44 U.S.C. 3501 *et seq.*, the FTC is providing this second opportunity for public comment while seeking OMB approval to renew the pre-existing clearance for the Rule.

The Pre-sale Availability Rule, 16 CFR 702, is one of three rules<sup>2</sup> that the FTC issued as required by the Magnuson Moss Warranty Act, 15 U.S.C. 2301 *et seq.* (Warranty Act or Act).<sup>3</sup> This Rule requires sellers and warrantors to make the text of any written warranty on a consumer product costing more than \$15 available to the consumer before sale. Among other things, the Rule requires sellers to make the text of the warranty readily available either by (1) displaying it in close proximity to the product or (2) furnishing it on request and posting signs in prominent locations advising consumers that the warranty is available. The Rule requires warrantors to provide materials to enable sellers to comply with the Rule's requirements and also sets out the methods by which warranty information can be made available before the sale if the product is sold through catalogs, mail order, or door to door sales. In addition, in 2016, the FTC revised the Rule to allow warrantors to post warranty terms on internet websites if they also provide a non-internet based method for consumers to obtain the warranty terms and satisfy certain other conditions. The revised Rule also allows certain sellers to display warranty terms pre-sale in an electronic format if the warrantor has used the online method of disseminating warranty terms.

*Likely Respondents:* Manufacturers and retailers of consumer products.

<sup>1</sup> The Commission received nine non-germane comments.

<sup>2</sup> The other two rules relate to the information that must appear in a written warranty on a consumer product costing more than \$15 if a warranty is offered and minimum standards for informal dispute settlement mechanisms that are incorporated into a written warranty.

<sup>3</sup> 40 FR 60168 (Dec. 31, 1975).

*Estimated Annual Hours Burden:* 3,069,314 hours (170,417 hours for manufacturers + 2,898,897 hours for retailers).

- Manufacturers account for approximately 170,417 hours ((742 large manufacturers × 21.5 hours) + (30,287 small manufacturers × 5.1 hours))
- Retailers account for approximately 2,898,897 hours ((8,628 large retailers × 20.8 burden hours) + (566,549 small retailers × 4.8 burden hours))

*Estimated Annual Cost Burden:* \$70,594,222 (which is derived from \$36,831,768 for sales associates + \$33,762,454 for clerical workers).<sup>4</sup>

- Sales Associates: (1,534,657 hours) (\$24/hour) = \$36,831,768
- Clerical Workers: (1,534,657 hours) (\$22/hour) = \$33,762,454

*Total Annual Capital or Other Non-labor Costs:* De minimis.

#### SUPPLEMENTARY INFORMATION:

##### Proposed Project

##### *AHRQ Managing Unhealthy Alcohol Use in Primary Care Initiative*

The Affordable Care Act established the Patient-Centered Outcomes Research Trust Fund (PCORTF) and authorized AHRQ to broadly disseminate the research findings published by the Patient-Centered Outcomes Research Institute (PCORI) and other government-funded research relevant to comparative clinical effectiveness research. AHRQ's PCORTF-funded initiative identifies research findings that could significantly improve patient outcomes through broader implementation in clinical practice. Under this initiative, in 2019 AHRQ launched a new initiative, Managing Unhealthy Alcohol Use in Primary Care, in order to promote the uptake of evidence-based practices for unhealthy alcohol use (UAU). As part of this initiative, AHRQ selected six grantees and funded a contractor to support and evaluate the grantees. The grantees will collectively work with more than 700 primary care

practices over three years to implement and evaluate strategies to increase the use of evidence-based interventions such as screening for unhealthy alcohol use, brief interventions for adult patients who drink too much, and medication-assisted therapy (MAT) for patients with an alcohol use disorder. The contractor will develop a resource center, convene a technical expert panel, conduct an ongoing environmental scan, support a learning community of grantees, and complete a multisite, mixed methods evaluation.

Unhealthy alcohol use, defined as behaviors ranging from risky drinking to alcohol use disorders (AUD), is estimated to be the third leading cause of preventable death in the United States. Between 2006 and 2010, nearly one in ten deaths were alcohol-related. In addition to early mortality, UAU is associated with a host of adverse outcomes, including unintentional injuries and the development or exacerbation of a range of physical and behavioral health conditions. The Centers for Disease Control and Prevention estimates suggest that excessive alcohol consumption costs the United States \$249 billion annually.

Under the UAU initiative, six AHRQ grantees will work to improve the management of UAU in primary care by disseminating and implementing evidence-based practices for screening and brief intervention, referral to treatment (SBI/RT), and MAT in primary care practices. The multi-site, mixed-methods evaluation will include primary data collection by the evaluator, NORC at the University of Chicago. The evaluation will also include secondary data collected by the six grantee teams working with 750 primary care practices. Collectively the data will allow the evaluator to assess the implementation and impact of the six grants.

The project goals, as laid out in the AHRQ request for applications include:

- Success of recruitment and retention strategies across all six grantees to engage primary care practices for implementation of SBI/RT and MAT, across the initiative;
- Effectiveness of the grantees' collective dissemination and implementation strategies, and the factors associated with the success and/or failure of the strategies as it relates to populations, settings and the influence of contextual factors;
- Success at the practice level in increasing the number of patients screened, identified, and treated; and
- Overall impact on changes in processes or outcomes that can be attributed to the initiative.
