

Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). However, only motions to intervene from entities that were party to the underlying proceeding will be accepted.

As a matter of practice, the Commission itself generally acts on requests for extensions of time to complete construction for NGA facilities when such requests are contested before order issuance. For those extension requests that are contested,¹ the Commission acting as a whole will aim to issue an order acting on the request within 45 days.² The Commission will address all arguments relating to whether the applicant has demonstrated there is good cause to grant the extension. The Commission will not consider arguments that re-litigate the issuance of the certificate order, including whether the Commission properly found the project to be in the public convenience and necessity and whether the Commission's environmental analysis for the certificate complied with the National Environmental Policy Act.³ At the time a pipeline requests an extension of time, orders on certificates of public convenience and necessity are final and the Commission will not re-litigate their issuance. The OEP Director, or his or her designee, will act on all of those extension requests that are uncontested.

The extension request is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's website web at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC at FERCOnlineSupport@ferc.gov or call toll-free, (886) 208-3676 or TTY, (202) 502-8659.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and three copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

¹ Contested proceedings are those where an intervenor disputes any material issue of the filing. 18 CFR 385.2201(c)(1) (2019).

² *Algonquin Gas Transmission, LLC*, 170 FERC ¶ 61,144, at P 40 (2020).

³ Similarly, the Commission will not re-litigate the issuance of an NGA section 3 authorization, including whether a proposed project is not inconsistent with the public interest and whether the Commission's environmental analysis for the permit order complied with NEPA.

Inventory of Mercury Supply, Use, and Trade in the United States 2020 Report; Notice of Availability

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA is announcing the availability of the 2020 mercury inventory report, which summarizes information on U.S. mercury supply, use, and trade required to be reported by rule directly from mercury manufacturers, importers, and processors. EPA was directed by Congress in the Frank R. Lautenberg Chemical Safety for the 21st Century Act (Lautenberg Act), which amended the Toxic Substances Control Act (TSCA), to carry out and publish in the **Federal Register** not later than April 1, 2017 and every three years thereafter, an inventory of mercury supply, use, and trade in the United States. The Lautenberg Act defines "mercury" as "elemental mercury" or "a mercury compound."

SUPPLEMENTARY INFORMATION:

I. Does this action apply to me?

This action applies to the public in general and may be of interest to a wide range of stakeholders including members of the public interested in elemental mercury or mercury compounds generally. Other topics of interest include the supply, use, or trade of elemental mercury or mercury compounds, including mercury-added products and manufacturing processes. As such, the Agency has not attempted to describe all the specific entities that may be interested in this action.

II. What is the agency's authority for this action?

TSCA section 8(b)(10), 15 U.S.C. 2507(b)(10), as amended by the Lautenberg Act of 2016, directs EPA to carry out and publish in the **Federal Register** not later than April 1, 2017, and every three years thereafter, an inventory of mercury supply, use, and trade in the United States. TSCA section 8(b)(10)(A) defines "mercury" as "elemental mercury" or "a mercury compound" (15 U.S.C. 2507(b)(10)(A)). In carrying out the mercury inventory, EPA is to "identify any manufacturing processes or products that intentionally add mercury" (15 U.S.C. 2607(b)(10)(C)(i)) and "recommend actions, including proposed revisions of Federal law or regulations, to achieve further reductions in mercury use" (15 U.S.C. 2607(b)(10)(C)(ii)).

III. What action is the agency taking?

EPA is announcing the availability of a report entitled "Inventory of Mercury Supply, Use, and Trade in the United States: 2020 Report," which provides an inventory of mercury supply, use, and trade in the United States. This is the first report in which the supply, use, and trade of mercury is presented based on data collected by EPA under the final rule Mercury; Reporting Requirements for the TSCA Mercury Inventory, codified in 40 CFR part 713 (83 FR 30054, June 27, 2018)(FRL-9979-74). Persons subject to the reporting requirements in 40 CFR part 713 submitted information directly to EPA via the Mercury Electronic Reporting (MER) application, which is accessed through the Agency's Central Data Exchange (CDX). The deadline for reporting mercury information to EPA was July 1, 2019 for reporting activities that occurred in the calendar year 2018, and the inventory collection, reporting, and publication cycle will continue every three years thereafter.

IV. How can I access this report?

The 2020 inventory report may be found in the docket for this action and on the EPA Mercury website (<https://www.epa.gov/mercury>).
