

Based on a review of the information collection since our last request for OMB approval, we have made adjustments to our burden estimate to account for advances in information and communication technology that have occurred in the last decade. Because the transition from paper-based to electronic records systems is widespread, we estimate that the average burden per recordkeeping has decreased by 50 percent. With regards to records maintenance, we estimate that approximately 379,493 facilities each spend half the amount of time from the 13,228 hours previously reported to 6.61 hours collecting, recording, and checking for accuracy of the limited amount of additional information required by the regulations, for a total of 2,508,449 hours annually. In addition, we estimate that new firms entering the affected businesses incur a burden from learning the regulatory requirements and understanding the records required for compliance. In this regard, we estimate the number of new firms entering the affected businesses is 5 percent of 379,493, or 18,975 firms. Thus, we estimate that approximately 18,975 facilities each spend, on average, 4.5 hours learning about the recordkeeping and records access requirements, for a total of 85,388 hours annually. This estimate reflects a reduction from 4.79 to 4.5 average hours per facility to account for the increase in facilities using internet, which increased from 71 to 99 percent. We estimate that approximately the same number of firms (18,975) exit the group of affected businesses in any given year, resulting in no growth in the number of total firms reported on line 1 of table 1.

Elite Laboratories, Inc., et al.; Withdrawal of Approval of 23 Abbreviated New Drug Applications; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting a notice that appeared in the **Federal Register** on January 8, 2020. The document announced the withdrawal of approval of 23 abbreviated new drug applications (ANDAs) from multiple applicants, withdrawn as of February 7, 2020. The document indicated that FDA was withdrawing approval of the following seven ANDAs after receiving a withdrawal request from CASI Pharmaceuticals, Inc., c/o Target Health, Inc., 261 Madison Ave., 24th Floor, New

York, NY 10016: ANDA 073191, Triamterene and Hydrochlorothiazide Capsules USP, 50 milligrams (mg)/25 mg; ANDA 076075, Econazole Nitrate Cream, 1%; ANDA 076192, Ribavirin Capsules USP, 200 mg; ANDA 076514, Midodrine Hydrochloride (HCl) Tablets USP, 2.5 mg, 5 mg, and 10 mg; ANDA 086809, Spironolactone Tablets USP, 25 mg; ANDA 090288, Naratriptan Tablets USP, Equivalent to (EQ) 1 mg base and EQ 2.5 mg base; and ANDA 203384, Epinastine HCl Ophthalmic Solution, 0.05%. Before FDA withdrew the approval of these ANDAs, CASI Pharmaceuticals, Inc., informed FDA that it did not want the approval of the ANDAs withdrawn. Because CASI Pharmaceuticals, Inc., timely requested that approval of these ANDAs not be withdrawn, the approval of ANDAs 073191, 076075, 076192, 076514, 086809, 090288, and 203384 is still in effect.
