

Department of the Interior, MS: MB, 5275 Leesburg Pike, Falls Church, VA 22041–3803; (703) 358–1780.

SUPPLEMENTARY INFORMATION:

Under the authority of the Migratory Bird Treaty Act (16 U.S.C. 703–712), the Service regulates the hunting of migratory game birds. We update the migratory game bird hunting regulations, located in title 50 of the Code of Federal Regulations in part 20 (50 CFR part 20), annually. Through these regulations, we establish the frameworks, or outside limits, for season lengths, bag limits, and areas for migratory game bird hunting. Acknowledging regional differences in hunting conditions, the Service has administratively divided the Nation into four Flyways for the primary purpose of managing migratory game birds. Each Flyway (Atlantic, Mississippi, Central, and Pacific) has a Flyway Council, a formal organization generally composed of one member from each State and Province in that Flyway. The Flyway Councils, established through the Association of Fish and Wildlife Agencies, assist in researching and providing migratory game bird management information for Federal, State, and Provincial governments, as well as private conservation entities and the public.

The process for adopting migratory game bird hunting regulations, located in 50 CFR part 20, is constrained by three primary factors. Legal and administrative considerations dictate how long the rulemaking process will last. Most importantly, however, the biological cycle of migratory game birds controls the timing of data-gathering activities and thus the dates on which these results are available for consideration and deliberation.

For the regulatory cycle, Service biologists gather, analyze, and interpret biological survey data and provide this information to all those involved in the process through a series of published status reports and presentations to Flyway Councils and other interested parties. Because the Service is required to take abundance of migratory game birds and other factors into consideration, the Service undertakes a number of surveys throughout the year in conjunction with Service Regional Offices, the Canadian Wildlife Service, and State and Provincial wildlife-management agencies. To determine the appropriate frameworks for each species, we consider factors such as population size and trend, geographical distribution, annual breeding effort, condition of breeding and wintering habitat, number of hunters, and

anticipated harvest. After frameworks are established for season lengths, bag limits, and areas for migratory game bird hunting, States may select season dates, bag limits, and other regulatory options for the hunting seasons. States may always be more conservative in their selections than the Federal frameworks, but never more liberal.

Upcoming Meetings

The SRC will conduct an open meeting on April 28, 2020, to identify and discuss preliminary issues concerning the 2021–2022 migratory bird hunting regulations. We will conduct another meeting in October 2020 to review information on the status of migratory game birds and develop 2021–2022 migratory game bird regulations recommendations for these species. In accordance with Departmental policy, these meetings are open to public observation. In addition, Service representatives attended the individual meetings of the four Flyway Councils in March and will reassess attending the August–October Flyway Council meetings. We will provide the meeting dates, commencement times, and locations for the SRC and Flyway Council meetings on our website at <https://www.fws.gov/birds/management/flyways.php> as this information becomes available. If these meetings are not held in person, these meetings may be conducted telephonically with or without the aid of video technology.
