Iroquois Gas Transmission System, L.P.; Notice of Schedule for Environmental Review of the Enhancement by Compression Project

On February 3, 2020, Iroquois Gas Transmission System, L.P. (Iroquois) filed an application in Docket No. CP20–48–000 requesting a Certificate of Public Convenience and Necessity pursuant to Section 7(c) of the Natural Gas Act to construct and operate certain natural gas compression and associated facilities. The proposed project is known as the Enhancement by Compression Project (Project), and would add a total of 125 million cubic feet of natural gas per day of incremental firm transportation service to existing customers in New York.

On February 12, 2020, the Federal Energy Regulatory Commission (Commission or FERC) issued its Notice of Application for the Project. Among other things, that notice alerted agencies issuing federal authorizations of the requirement to complete all necessary reviews and to reach a final decision on a request for a federal authorization within 90 days of the date of issuance of the Commission staff's Environmental Assessment (EA) for the Project. This instant notice identifies the FERC staff's planned schedule for the completion of the EA for the Project.

Schedule for Environmental Review

Issuance of EA—September 30, 2020
90-Day Federal Authorization Decision

Deadline—December 29, 2020

If a schedule change becomes necessary, additional notice will be provided so that the relevant agencies are kept informed of the Project's progress.

Project Description

The Project would add one new 12,000 horsepower (hp) compressor unit and associated facilities at each of its existing Athens (Greene County, New York) and Dover Compressor Stations (Dutchess County, New York) and two new 12,000 hp compressor units at its existing Brookfield Compressor Station (Fairfield County, Connecticut).
