

1,500 feet above the surface and departing IFR aircraft until reaching 1,200 feet above the surface. This amended area would be described as follows: That airspace extending upward from 700 feet above the surface within a 7.2-mile radius of Mountain Home AFB.

This action also proposes to properly size the Class E airspace extending upward from 1,200 feet above the surface to contain IFR aircraft transitioning to/from the en route environment. This amended area would be described as follows: That airspace extending upward from 1,200 feet above the surface within a 30-mile radius of Mountain Home AFB.

Further, this action proposes to remove Mountain Home Municipal Airport from the Class E airspace description, extending upward from 700 feet or more above the surface. A notice of proposed rulemaking, FAA-2019-0972, has been published to establish Class E airspace, extending upward from 700 feet or more above the surface, for Mountain Home Municipal Airport.

Lastly, this action proposes two administrative corrections to the airspace legal descriptions. The term "Airport/Facility Directory" in the Class D description is outdated and should read "Chart Supplement". The Class E surface area is part-time and should include the following language in the legal description: This Class E airspace area is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Chart Supplement.

Class D, E2, and E5 airspace designations are published in paragraphs 5000, 6002, and 6005, respectively, of FAA Order 7400.11D, dated August 8, 2019, and effective September 15, 2019, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in the Order.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT

Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.

I. Comment Period Extension

On February 14, 2020, the Commission published in the **Federal Register** a Request for Public Comment on the Federal Trade Commission's Funeral Industry Practices Rule, with an April 14, 2020, deadline for filing comments. 85 FR 8490. The Commission published the proposed rule to solicit public comments about the efficiency, costs, benefits, and regulatory impact of the Funeral Rule as part of its systematic review of all current Commission regulations and guides. Interested parties have subsequently requested an extension of the public comment period to provide additional time to respond to the request for comment in light of the disruption caused by the coronavirus pandemic.
