

January 30, 2020 (85 FR 5418), and the comment period ended on March 2, 2020.

This Errata Notice corrects multiple figures in the table that was included in the 30-day notice. All of the changes described here stem from the estimated number of burden hours per response in Column 5 of the table. In the 30-day notice, the burden hours per response were not differentiated sufficiently among the categories of respondents. Despite varying requirements for collecting, analyzing, and reviewing data, the 30-day notice reports 401 hours per response for each existing category of respondents, and 427 hours per response for each potential new respondent.

We have re-considered these estimates in order to describe with greater precision the burdens of each category of existing respondents in this information collection. We now estimate 97 burden hours per response for Category 1 metrics for all 11 respondents. Additional estimated burden hours per response apply to some of those respondents, and affect their burden hours as follows:

- 263 burden hours per response for Category 2 respondents (*i.e.*, the 97 hours per response that apply to all respondents, plus an additional 166 hours per response); and
- 401 burden hours per response for Category 3 respondents (*i.e.*, the 97 hours per response that apply to all respondents, plus the 166 hours per

response that apply to Category 2 respondents, plus 138 hours per response that apply only to Category 3 respondents).

These data are included in the following corrected table and in the submittal to the Office of Management and Budget. Besides showing the number of burden hours per response for each type of response, the table shows sub-totals for each existing category of respondents, as well as for the category identified as “possible new respondents.”

The provision of payphone-specific coding digits was a prerequisite to payphone per-call compensation payments by IXC to PSPs for subscriber 800 and access code calls. The Commission’s Wireline Competition Bureau subsequently provided a waiver until March 9, 1998, for those payphones for which the necessary coding digits were not provided to identify calls. The Bureau also on that date clarified the requirements established in the Payphone Orders for the provision of payphone-specific coding digits and for
