## DEPARTMENT OF ENERGY

### Cost-Sharing Partnerships With the Private Sector in Fusion Energy

**AGENCY:** Fusion Energy Sciences (FES) Program, Office of Science (SC), Department of Energy (DOE).

**ACTION:** Request for information (RFI).

**SUMMARY:** The United States Department of Energy is developing a plan for a possible cost share program in fusion reactor technologies. This RFI invites interested parties to provide DOE-SC input on the topical areas, program objectives, eligibility requirements, program organization and structure, public and private roles and responsibilities, funding modalities, and assessment criteria of such an initiative.

**DATES:** Written comments and information are requested on or before May 15, 2020.

**ADDRESSES:** The DOE Office of Science is using the <http://www.regulations.gov> system for the submission and posting of public comments in this proceeding. All comments in response to this RFI are therefore to be submitted electronically through <http://www.regulations.gov>, via the web form accessed by following the "Submit a Formal Comment" link near the top right of the **Federal Register** web page for this RFI.

**FOR FURTHER INFORMATION CONTACT:** Requests for additional information may be submitted to Dr. John Mandrekas, (301) 903-4923, [CostShareFusion@science.doe.gov](mailto:CostShareFusion@science.doe.gov).

#### SUPPLEMENTARY INFORMATION:

Recognizing the recent surge in interest and investments by the private sector in the development of fusion energy, the DOE-SC FES program has been exploring partnership initiatives to leverage the private sector efforts, with the objective of accelerating progress toward the realization of fusion energy and solidifying U.S. leadership in this critical energy technology of the future. As a first step, FES launched the Innovation Network for Fusion Energy (INFUSE)<sup>1</sup> program which provides private-sector fusion companies with

access to the expertise and facilities of DOE's national laboratories to overcome critical scientific and technological hurdles in pursuing development of fusion energy systems. INFUSE is modeled after the successful Gateway for Accelerated Innovation in Nuclear (GAIN) voucher program<sup>2</sup> established by the DOE Nuclear Energy (DOE-NE) Office. As in the GAIN voucher program, INFUSE does not provide funding directly to the private companies, but instead provides support to the partnering DOE laboratories to enable them to collaborate with their industrial partners.

As a next step, DOE-SC is exploring cost share partnership programs where the funding is provided directly to the private-sector companies under a performance-based milestone-driven approach. Such a program could be modeled after successful milestone-driven cost share programs established by other DOE offices or federal agencies, such as the Small Modular Reactors (SMRs)<sup>3</sup> and the non-voucher part of GAIN programs of DOE-NE, as well as NASA's Commercial Orbital Transportation Services (COTS) program.<sup>4</sup> DOE is also exploring the establishment of a fusion public-private partnership cost share program in reactor technologies.

**Request for Information:** The objective of this request for information is to gather input about the topical areas, program objectives, eligibility requirements, program organization and structure, public and private roles and responsibilities, funding modalities, and assessment criteria of such an initiative.

DOE-SC is not announcing an intention or an interest in procuring goods and services for its use. This RFI makes no statement about the possibility that DOE-SC might issue one or more solicitations for either procurement or financial assistance activities in the future. DOE-SC seeks input about how best to create a public benefit through expanding partnerships with the private sector in the field of fusion energy.
