This collection is the only national effort devoted to describing and understanding annual changes in the tribal jail population. The collection enables BJS, tribal correctional authorities and administrators,

legislators, researchers, and jail planners to track growth in the number of jails and their capacities nationally, as well as to track changes in the demographics and supervision status of the tribal jail population and the prevalence of crowding. To address the public-health emergency on COVID-19, BJS modified the 2020 and 2021 survey instrument to include COVID-19 related questions.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:*

Reporting mode	Purpose of contact	Number of responses	Average reporting time (min)	Estimated total burden hours
2019 SJIC:				
Mail, Fax, Email, telephone	Data collection	84	75	105
Email and telephone	Verify facility operational status and point-of-contact.	84	2	3
Email and telephone	Data quality follow-up validation	84	7	10
Total	84	84	118
2020 and 2021 SJIC:				
Mail, Fax, Email, telephone	Data collection	84	115	161
Email and telephone	Verify facility operational status, point-of-contact, and pre-notification of COVID-19 addendum.	84	4	6
Email and telephone	Data quality follow-up validation	84	10	14
Total	84	129	181

The 2019 SJIC questionnaire (form CJ-5B) was sent to 84 Indian country correctional facilities operated by tribal authorities or the Bureau of Indian Affairs (BIA). Based on prior years' reporting, we estimated a reporting time of 75 minutes for the 2019 SJIC questionnaire. Also in 2019, the respondents had an additional average reporting time of 2 minutes to verify facility operational status and point-of-contact, and 7 minutes for data quality follow-up validation.

For each year in 2020 and 2021, we estimate an average reporting time of 115 minutes for the survey form that includes the new question on inmate counts by age category and the addendum on COVID-19. The respondents will also have an additional average reporting time of 4 minutes to verify facility operational status, point-of-contact, and to pre-notify and answer respondent questions on the COVID-19 addendum. If needed, jail respondents will also be contacted by email or telephone to verify data quality issues (10 minutes per respondent).

The total reporting time per facility is 84 minutes in 2019 and 129 minutes each year in 2020 and 2021. In all, the total burden was 118 hours in 2019 and 181 hours each year in 2020 and 2021.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of the continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing collection of information in accordance with the Paperwork Reduction Act (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires OSHA to obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining said information (29 U.S.C. 657).

The collection of information contained in the Logging Operations Standard are necessary to reduce workers' risk of death or serious injury
