

shipments to determine compliance with FIFRA. Customs compares entry documents for the shipment with the NOA and notifies the EPA regional office of any discrepancies. Alternatively, importers may submit NOA information electronically through Customs' Automated Commercial Environment (ACE). Most of the electronic filings are automatically processed, and an early indication is provided to the filer if the initial reporting requirements have been met and if the shipment can be released upon arrival at the port of entry. For those filings that do not meet the reporting requirements, automatic checks will be performed to notify the filer of errors. For filings that require non-automated checks, EPA staff can review and provide feedback notifications through ACE to the filer on what information is needed that has not been provided.

Burden statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 40,880 (per year) hours per response. Burden is defined in 5 CFR 1320.3(b).

The ICR, which is available in the docket along with other related materials, provides a detailed explanation of the collection activities and the burden estimate that is only briefly summarized here:

Respondents/Affected Entities: Entities potentially affected by this ICR are pesticide importers, which includes many types of business entities ranging from Commercial and Institutional Building Construction (NAICS 236220) to Pesticide and Other Agricultural Chemical Manufacturing (NAICS 325300) and even Public Administration: Executive Offices (NAICS 921110). Other business and institutions that import pesticides include Agriculture, Forestry, Fishing and Hunting (Sector 11), Wholesale Trade, (Sector 42).

Estimated total number of potential respondents: 92,100.

Frequency of response: On occasion.
Estimated total average number of responses for each respondent: One per application.

Estimated total annual burden hours: 40,880 hours.

Estimated total annual costs: \$2,753,522. There is no capital or operation & maintenance costs.

III. Are there changes in the estimates from the last approval?

There is an increase of 24,540 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB.

This increase reflects an increase in the annual number of NOAs submitted. The new electronic system for submitting NOA filings, ACE, has contributed to the increase in the number of NOAs. The annual number of NOAs submitted to EPA increased from 38,000 for the previous ICR renewal to 92,100 for this ICR renewal. The average burden hours per response increased slightly from the previous ICR renewal of 0.43 hours to the current 0.44 per response. This change is an adjustment.

IV. What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** document pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.
