**SUPPLEMENTARY INFORMATION:**

**I. Introduction**

The NRC is issuing VEGP Units 3 and 4 License Amendment Nos. 178 and 177 to COLs NPF–91 and NPF–92, respectively. With the requested amendments, SNC proposed changes to the description and analysis in the Updated Final Safety Analysis Report (UFSAR) of the auxiliary building main steam safety valve (MSSV) vent stack openings and the auxiliary building Wall 11 openings for protection from tornado-generated missiles for both units. SNC stated that the changes include the evaluation of horizontal missiles targeting the MSSV vent stacks, the evaluation of vertical missiles targeting the MSSV vent stack openings, and the evaluation of missiles targeting the auxiliary building Wall 11 openings. SNC stated that the evaluations demonstrate that the tornado missiles will not prevent safe shutdown and will not result in an offsite release exceeding the limits defined in title 10 of the *Code of Federal Regulations* (10 CFR) 50.34.

SNC indicated that the requested amendment requires changes to the licensing basis documents for VEGP Units 3 and 4 in the form of departures from the plant-specific Design Control Document (DCD) Tier 2 information as incorporated into the UFSAR. SNC stated that no change was made to Tier 1, Tier 2\*, or COL information; that this change involves a revision to plant-specific Tier 2 information that meets the criteria for a license amendment under 10 CFR part 52, appendix D, Section VIII.B.5.b(8), in that it was determined that the proposed change would result in a departure from a method of evaluation described in the plant-specific DCD used in establishing the design bases or in the safety analyses, and thus requires NRC approval for the Tier 2 departures.

**II. License Amendment Request**

By letter dated August 16, 2019, and supplemented February 14, 2020, available in ADAMS under Accession Nos. ML19228A241 and ML20045D590,

respectively, SNC requested that the NRC amend the COLs for VEGP, Units 3 and 4, COLs NPF–91 and NPF–92. The proposed amendment is described in Section I of this **Federal Register** notice.

As documented in an SE dated April 23, 2020 (ADAMS Accession No. ML20050L183), the Commission has determined for these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendments.

A notice of consideration of issuance of amendment to facility operating license or COL, as applicable, proposed no significant hazards consideration determination, and opportunity for a hearing in connection with these actions, was published in the **Federal Register** on October 22, 2019 (84 FR 56478). No comments were received during the 30-day comment period.

As documented in the SE, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments.

**III. Conclusion**

Using the reasons set forth in the combined SE, the staff approved the amendment and it was issued to SNC on April 23, 2020, as part of a combined package (ADAMS Package Accession No. ML20050J685).

Dated: May 5, 2020.
