

marking requirements of the Theft Prevention Standard.

Pursuant to 49 U.S.C. 33106 and 49 CFR 543.8(b), the agency grants a petition for exemption from the parts-marking requirements of Part 541, either in whole or in part, if it determines that, based upon substantial evidence, the standard equipment antitheft device is likely to be as effective in reducing and deterring motor vehicle theft as compliance with the parts-marking requirements of Part 541. The agency finds that each manufacturer has provided adequate reasons for its belief that the antitheft device for each vehicle line is likely to be as effective in reducing and deterring motor vehicle theft as compliance with the parts-marking requirements of the Theft Prevention Standard. This conclusion is based on the information each manufacturer provided about its antitheft device.

The agency concludes that each described device will provide four of the five types of performance listed in section 543.6(a)(3): Promoting activation; preventing defeat or circumvention of the device by unauthorized persons; preventing operation of the vehicle by unauthorized entrants; and ensuring the reliability and durability of the device.

Moving forward, to facilitate the agency's consideration of complete petitions in a timely manner, NHTSA is planning to publish a **Federal Register** notice clarifying the type of information that can serve as a valid basis for granting a request for exemption from the Theft Prevention Standard. Specifically, NHTSA will be providing this clarification because it has received a few petitions in which the petitioners have sought to support their request for exemption with data comparing the theft rate of a particular vehicle line to the industry median or average vehicle theft rate. The notice will not impose any new requirements for manufacturers seeking exemptions from the parts-marking requirement or otherwise change Part 541. As will be explained further in that notice, 49 CFR 543.6(a)(5) does not refer to NHTSA's considering comparisons of the theft rate of the subject vehicle in a petition to the industry-wide median or average theft rate when evaluating a request for exemption under Part 543. Instead, under 49 CFR 543.6(a)(5), NHTSA is to consider "any statistical data that are available to the petitioner and form a basis for petitioner's belief that a line of passenger motor vehicles equipped with the antitheft device is likely to have a theft rate equal to or less than that of passenger motor vehicles *of the same, or*

a similar, line which have parts marked in compliance with part 541" (emphasis added).⁸ The notice will clarify this provision of Part 541.

The agency notes that 49 CFR part 541, Appendix A-1, identifies those lines that are exempted from the Theft Prevention Standard for a given model year. 49 CFR part 543.8(f) contains publication requirements incident to the disposition of all Part 543 petitions. Advanced listing, including the release of future product nameplates, the beginning model year for which the petition is granted and a general description of the antitheft device is necessary in order to notify law enforcement agencies of new vehicle lines exempted from the parts-marking requirements of the Theft Prevention Standard.

If any manufacturer listed in this notice decides not to use the exemption for their requested vehicle line, the manufacturer must formally notify the agency. If such a decision is made, the line must be fully marked as required by 49 CFR parts 541.5 and 541.6 (marking of major component parts and replacement parts).

NHTSA notes that if any manufacturer listed in this notice wishes in the future to modify the device on which this exemption is based, the company may have to submit a petition to modify the exemption. Section 543.8(d) states that a Part 543 exemption applies only to vehicles that belong to a line exempted under this part and equipped with the antitheft device on which the line's exemption is based. Further, section 543.10(c)(2) provides for the submission of petitions "to modify an exemption to permit the use of an antitheft device similar to but differing from the one specified in the exemption."

The agency wishes to minimize the administrative burden that section 543.10(c)(2) could place on exempted vehicle manufacturers and itself. The agency did not intend in drafting Part 543 to require the submission of a modification petition for every change to the components or design of an antitheft device. The significance of many such changes could be de minimis. Therefore, NHTSA suggests that if any manufacturer listed in this notice contemplates making any changes, the effects of which might be

⁸This is because, to make a valid comparison, NHTSA must carefully choose two sets of vehicles that are as nearly similar as possible so that the agency can be reasonably certain that any differences or similarities in the theft rates of the two sets of vehicles can be attributed to the presence of an anti-theft device or parts marking and not to extraneous, confounding variables.

characterized as de minimis, it should consult the agency before preparing and submitting a petition to modify.

For the foregoing reasons, the agency hereby grants in full the following petitions for exemption for the following manufacturers' vehicle lines for the following model years: BMW of North America, LLC (BMW) for its 2 series vehicle line beginning in MY 2020; Jaguar Land Rover North America LLC (Jaguar Land Rover) for its Jaguar E-Pace vehicle line beginning in MY 2020; Nissan North America, Inc. (Nissan) for its QX55 beginning in MY 2020; Tesla Motors Inc. (Tesla) for its Model Y vehicle line beginning in MY 2020; General Motors Corporation (GM) for its Chevrolet Trailblazer vehicle line beginning in MY 2021; Mazda Motors Corporation (Mazda) for its CX-30 vehicle line beginning in MY 2021; Mitsubishi Motors R&D of America (Mitsubishi) for its Outlander vehicle line beginning in MY 2021; and Toyota Motor North America, Inc. (Toyota) for its Venza vehicle line beginning in MY 2021.

Issued in Washington, DC, under authority delegated in 49 CFR 1.95 and 501.8.
