Intellectual property listed here includes all U.S. and foreign patents and applications claiming priority to any member of the aforementioned applications.

The patent rights in these inventions have been assigned or exclusively licensed to the Government of the United States of America.

The prospective exclusive license territory may be worldwide and in fields of use that may be limited to use of anti-C3d monoclonal antibodies (mAbs) to potentiate anti-tumor activity of anti-CD20 mAbs for the treatment of B-cell lymphomas.

The aforementioned Patents and Patent applications cover technology directed to development of anti-C3d antibody or antibody fragments to re-target cells that have escaped from existing mAbs therapy and to potentiate the anti-tumor activity of therapeutic mAbs and eliminate antigen loss variants.

This notice is made in accordance with 35 U.S.C. 209 and 37 CFR part 404. The prospective exclusive license will be royalty bearing. The prospective exclusive license may be granted unless within fifteen (15) days from the date of this published notice, the National Heart, Lung, and Blood Institute receives written evidence and argument that establishes that the grant of the license would not be consistent with the

requirements of 35 U.S.C. 209 and 37 CFR part 404.

In response to this Notice, the public may file comments or objections. Comments and objections, other than those in the form of a license application, will not be treated confidentially, and may be made publicly available.

License applications submitted in response to this notice will be presumed to contain business confidential information and any release of information in these license applications will be made only as required and upon a request under the Freedom of Information Act, 5 U.S.C. 552.

Dated: May 14, 2020.
