1. In the *Auction 105 Procedures Public Notice*, 85 FR 22622, April 23, 2020, the Commission adopted a methodology for calculating bidding units and upfront payment and minimum opening bid amounts for the county-based licenses to be offered in Auction 105 that is based on population and bandwidth. An “Attachment A” file listing the bidding units, upfront payment amount, and minimum opening bid amount for each license was made available on the Auction 105 website at www.fcc.gov/auction/105 and labeled as “Adopted (3/2/2020).” The Wireless Telecommunications Bureau (Bureau) and the Office of Economics and Analytics (OEA) now announce the availability of an updated version of this file.

2. Consistent with the Commission’s decision regarding county-based license areas in the *2018 3.5 GHz Order*, 83 FR 63076, December 7, 2018, and with existing Commission policies and procedures used in prior auctions, the Bureau and OEA attributed the 2010 decennial census population figures to the county legal boundaries as of January 1, 2017, and used the resulting population figures for calculating bidding units, upfront payment amounts, and minimum opening bid amounts for the licenses to be offered in Auction 105. The Bureau and OEA recently became aware of anomalies in those population figures for 95 of these license areas and have corrected the Attachment A file. Specifically, the population has been changed in the updated file for all 91 license areas in American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands, as well as for three areas in Alaska and one area in Virginia. In all but a few of those cases (where the change in population was relatively small), the bidding units, upfront payment amounts, and minimum opening bid amounts have changed accordingly. The revised numbers are

higher for some areas and lower for others.

3. The updated file is available on the Auction 105 website at www.fcc.gov/auction/105 at the “Updated (May 18, 2020)” link under the “Attachment A Files” heading. Corresponding updates will also be made to the FCC Form 175 including the bidding unit data provided for the license areas and in the upfront payment calculator. The updates to the FCC Form 175 will be made before the resubmission window opens. When making upfront payments applicants are reminded to check their calculations carefully, based on the updated figures, because there is no provision for increasing a bidder’s eligibility after the upfront payment deadline.

Federal Communications Commission.

Gary Michaels,

Deputy Chief, Auctions Division, Office of Economics and Analytics.
