Consultation

A detailed assessment of the human remains was made by the Sam Noble Oklahoma Museum of Natural History professional staff in consultation with representatives of The Choctaw Nation of Oklahoma.

History and Description of the Remains

In 1984, human remains representing, at minimum, one individual were removed from the Charles Roye Site (34Hs159) in Haskell County, OK. This site was surveyed in 1982, prior to construction of an ARKLA, Inc. gas line compressor station. During the survey, which was funded by the Bureau of Land Management, a burial was discovered. The site was excavated by the Oklahoma Archeological Survey, and the items recovered were brought to the Museum in 1984. The fragmentary human remains belong to an adult over the age of 20 of indeterminate sex. No known individual was identified. The 22 associated funerary objects include three glass fragments, four glass bead fragments, one historic ceramic cup fragment, and 14 historic ceramic sherd fragments.

The Charles Roye Site dates to the late 1800s, based on the presence of European trade goods. Historic documents, including homestead deed records, show that the site lies within the region occupied by The Choctaw Nation of Oklahoma during the 19th century.

Determinations Made by the Sam Noble Oklahoma Museum of Natural History

Officials of the Sam Noble Oklahoma Museum of Natural History have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of one individual of Native American ancestry.

- Pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and associated funerary objects and The Choctaw Nation of Oklahoma.
