

○ Personally identifiable information (PII) is collected only to the extent necessary and is not retained;

○ Information gathered is intended to be used only internally for general service improvement and program management purposes and is not intended for release outside of NSF (if released, NSF must indicate the qualitative nature of the information);

○ Information gathered will not be used for the purpose of substantially informing influential policy decisions; and

○ Information gathered will yield qualitative information; the collection will not be designed or expected to yield statistically reliable results or used as though the results are generalizable to the population of study.

Feedback collected under this generic clearance provides useful information, but it does not yield data that can be generalized to the overall population. This type of generic clearance for qualitative information will not be used for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance. Such data uses require more rigorous designs that address: The target population to which generalizations will be made, the sampling frame, the sample design (including stratification and clustering), the precision requirements or power calculations that justify the proposed sample size, the expected response rate, methods for assessing potential nonresponse bias, the protocols for data collection, and any testing procedures that were or will be undertaken prior to fielding this study. Depending on the degree of influence the results are likely to have, such collections may still be eligible for submission for other generic mechanisms that are designed to yield quantitative results.

As a general matter, this information collection will not result in any new system of records containing privacy information and will not ask questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private.

Below we provide the National Science Foundation's projected average estimates for the next three years:

Affected Public: Individuals and Households, Businesses and Organizations, State, Local or Tribal Government.

Average Expected Annual Number of activities: 50.

Respondents: 500 per activity.

Annual responses: 100,000.

Frequency of Response: Once per request.

Average minutes per response: 30.

Burden hours: 25,000.

Comments: Comments are invited on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information shall have practical utility; (b) the accuracy of the Agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information on respondents, including through the use of automated collection techniques or other forms of information technology; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Dated: June 3, 2020.

BILLING CODE 7555-01-P

NUCLEAR REGULATORY COMMISSION

[NRC-2019-0113]

Guidance for a Technology-Inclusive, Risk-Informed, and Performance-Based Methodology To Inform the Licensing Basis and Content of Applications for Licenses, Certifications, and Approvals for Non-Light Water Reactors

AGENCY: Nuclear Regulatory Commission.

ACTION: Regulatory guide; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing revision 0 of regulatory guide (RG), RG 1.233, "Guidance for a Technology-Inclusive, Risk-Informed, and Performance-Based Methodology to Inform the Licensing Basis and Content of Applications for Licenses, Certifications, and Approvals for Non-Light Water Reactors." This RG provides new guidance for designers, applicants, and licensees of non-light water-cooled nuclear reactors (non-LWRs) to inform the licensing basis and content of applications to the NRC for licenses, certifications, or approvals. The RG provides guidance on using a technology-inclusive, risk-informed, and performance-based methodology to inform the licensing basis and content

of applications for licenses, certifications, and approvals for non-LWRs.

DATES: Revision 0 to RG 1.233 is available on June 9, 2020.

ADDRESSES: Please refer to Docket ID NRC-2019-0113 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- *Federal Rulemaking website:* Go to <https://www.regulations.gov> and search for Docket ID NRC-2019-0113. Address questions about NRC docket IDs in *Regulations.gov* to Jennifer Borges; telephone: 301-287-9127; email: Jennifer.Borges@nrc.gov. For technical questions, contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. Revision 0 to RG 1.233 and the regulatory analysis may be found in ADAMS under Accession Nos. ML20091L698 and ML18325A214, respectively.

Regulatory guides are not copyrighted, and NRC approval is not required to reproduce them.

FOR FURTHER INFORMATION CONTACT: William Reckley, Office of Nuclear Reactor Regulation, telephone: 301-415-7490, email: William.Reckley@nrc.gov, or Stanley Gardocki, Office of Nuclear Regulatory Research, telephone: 301-415-1067, email: Stanley.Gardocki@nrc.gov. Both are staff of the U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

SUPPLEMENTARY INFORMATION:

I. Discussion

The NRC is issuing a new RG in the NRC's "Regulatory Guide" series. This series was developed to describe and make available to the public information regarding methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific issues or postulated events, and data that the staff needs in its review of applications for permits and licenses.

The RG, entitled “Guidance for a Technology-Inclusive, Risk-Informed, and Performance-Based Methodology to Inform the Licensing Basis and Content of Applications for Licenses, Certifications, and Approvals for Non-Light Water Reactors,” endorses, with clarifications, the principles and methodology in the Nuclear Energy Institute (NEI) guidance document NEI 18–04, “Risk-Informed Performance-Based Guidance for Non-Light Water Reactor Licensing Basis Development,” as one acceptable method for determining the appropriate scope and level of detail for parts of applications for licenses, certifications, and approvals for non-LWRs. NEI 18–04 outlines an approach for use by reactor developers to select licensing basis events; classify structures, systems, and components; determine special treatments and programmatic controls; and assess the adequacy of a design in terms of providing layers of defense in depth. These actions are fundamental to the safe design of non-LWRs. The methodology described in NEI 18–04 and the RG also provide a general methodology for identifying an appropriate scope and depth of information to be provided in applications to the NRC for licenses, certifications, and approvals for non-LWRs required under part 50 of title 10 of the *Code of Federal Regulations* (10 CFR), “Domestic Licensing of Production and Utilization Facilities,” and 10 CFR part 52, “Licenses, Certifications, and Approvals for Nuclear Power Plants.”

II. Additional Information

The NRC published a notice of the availability of DG–1353 in the **Federal Register** on May 3, 2019 (84 FR 19132), for a 60-day public comment period. The public comment period closed on July 2, 2019. Public comments on DG–1353 and the staff responses to the public comments are available under ADAMS under Accession No. ML20091L696.

III. Congressional Review Act

This RG is a rule as defined in the Congressional Review Act (5 U.S.C. 801–808). However, the Office of Management and Budget has not found it to be a major rule as defined in the Congressional Review Act.

IV. Backfitting, Issue Finality, and Forward Fitting

RG 1.233 provides guidance for informing the licensing basis and content of applications for non-LWRs. The RG does not constitute regulatory requirements. For this reason, the

issuance of RG 1.233 does not constitute backfitting as defined in 10 CFR 50.109, “Backfitting,” and as described in NRC Management Directive 8.4, “Management of Backfitting, Forward Fitting, Issue Finality, and Information Requests;” affect issue finality of any approval issued under 10 CFR part 52; or constitute forward fitting as defined in Management Directive 8.4. Future applicants may choose to follow the guidance or utilize another approach in developing applications for licenses, certifications, or approvals.

Dated: June 3, 2020.

SECURITIES AND EXCHANGE COMMISSION

SEC File No. 270–598, OMB Control No. 3235–0655

Submission for OMB Review; Comment Request

Upon Written Request Copies Available From: Securities and Exchange Commission, Office of FOIA Services,

100 F Street NE, Washington, DC 20549–2736.

Extension:

Regulation 14N and Schedule 14N

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (“Commission”) has submitted to the Office of Management and Budget this request for extension of the previously approved collection of information discussed below.

Schedule 14N (17 CFR 240.14n–101) requires the filing of certain information with the Commission by shareholders who submit a nominee or nominees for director pursuant to applicable state law, or a company’s governing documents. Schedule 14N provides notice to the company of the shareholder’s or shareholder group’s intent to have the company include the shareholder’s or shareholder group’s nominee or nominees for director in the company’s proxy materials. This information is intended to assist shareholders in making an informed voting decision with regards to any nominee or nominees put forth by a nominating shareholder or group, by allowing shareholders to gauge the nominating shareholder’s interest in the company, longevity of ownership, and intent with regard to continued ownership in the company. We estimate that Schedule 14N takes approximately 40 hours per response and will be filed by approximately 10 issuers annually. In addition, we estimate that 75% of the 40 hours per response (30 hours per response) is prepared by the issuer for an annual reporting burden of 300 hours (30 hours per response × 10 responses).

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

The public may view background documentation for this information collection at the following website: www.reginfo.gov. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to (i) www.reginfo.gov/public/do/PRAMain and (ii) David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o Cynthia Roscoe, 100 F Street NE, Washington, DC 20549, or by sending an email to: PRA_Mailbox@sec.gov.
