SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC issued 16 exemptions to 12 licensees in response to requests dated between April 30, 2020, and May 21, 2020. These exemptions temporarily allow the licensees to deviate from certain requirements (as cited below) of various parts of chapter I of Title 10 of the *Code of Federal Regulations* (10 CFR).

The exemption from certain requirements of 10 CFR part 20 for the University of Missouri-Columbia (for its research reactor) allows the licensee temporary relief from the respirator fit-testing requirements of 10 CFR 20.1703(c)(6). This temporary exemption does not conflict with practices recommended by the Centers for Disease Control and Prevention to limit the spread of COVID-19. The licensee has committed to implement a licensee-specific process to manage any personnel with overdue respiratory

protection fit-tests while ensuring the safety of its workers.

The exemption from certain requirements of 10 CFR part 26 for DTE Electric Company (for Fermi 2) allows the licensee temporary relief from the work-hour controls under 10 CFR 26.205(d)(1) through (d)(7). The licensee stated that its staffing levels are affected or are expected to be affected by the COVID-19 PHE, and it can no longer meet or likely will not meet the work-hour controls of 10 CFR 26.205(d)(1) through (d)(7). The licensee has committed to implementing site-specific administrative controls for COVID-19 PHE fatigue-management for personnel specified in 10 CFR 26.4(a). This temporary exemption from certain requirements of 10 CFR part 26 ensures that the licensee's control of work hours and management of worker fatigue do not unduly limit licensee flexibility in using personnel resources to most effectively manage the impacts of the COVID-19 PHE on maintaining the safe operation of this facility.

The exemptions from certain requirements of 10 CFR part 55 for Idaho State University (for its research reactor); Massachusetts Institute of Technology (for its research reactor); National Institute of Standards and Technology (for its test reactor); PSEG Nuclear LLC (for the Hope Creek Generating Station and Salem Nuclear Generating Station, Units 1 and 2); and University of Maryland (for its training reactor) allow these licensees temporary exemptions from requirements related to licensed operator requalification program scheduling (under 10 CFR 55.59(a)(1), 10 CFR 55.59(a)(2), and 10 CFR 55.59(c)(1)); licensed operator active status for research and test reactors (under 10 CFR 55.53(e)); and delays in completion of biennial medical examinations of licensed operators and senior operators (under 10 CFR 55.21 and 10 CFR 55.53(i)). These licensees have committed to compensatory measures to address the delay in receipt of recommendations from a licensed physician concerning their licensed operator's health. These licensees have also committed to implement a program to evaluate operator performance in the facility and control room to identify and correct operator performance issues in a timely manner. Lastly, the research, training, and test reactor licensees committed to use alternative measures for the hours under the 4-hour minimum of 10 CFR 55.53(e).

The exemptions from certain requirements of 10 CFR part 73 for Duke Energy Progress, LLC (for the H. B. Robinson Steam Electric Plant, Unit 2); Exelon Generation Company, LLC (for the Peach Bottom Atomic Power Station, Units 2 and 3); PSEG Nuclear LLC (for the Hope Creek Generating Station and Salem Nuclear Generating Station, Units 1 and 2); NextEra Energy Duane Arnold, LLC (for the Duane Arnold Energy Center); Southern Nuclear Operating Company, Inc. (for the Vogtle Electric Generating Plant, Units 1 and 2); and Vistra Operations Company, LLC (for the Comanche Peak Nuclear Power Plant, Units 1 and 2), allow these licensees temporary exemptions from certain requirements of 10 CFR part 73, Appendix B, "General Criteria for Security Personnel," Section VI. The exemptions will help to ensure that these regulatory requirements do not unduly limit licensee flexibility in using personnel resources in a manner that most effectively manages the impacts of the COVID-19 PHE on maintaining the safe and secure operation of these facilities and the implementation of a licensee's NRC-approved security plans, protective strategy, and implementing procedures. These licensees have committed to certain security measures to ensure response readiness and for their security personnel to maintain performance capability.

The NRC is providing compiled tables of exemptions using a single **Federal Register** notice for COVID-19-related exemptions instead of issuing individual **Federal Register** notices for each exemption. The compiled tables below provide transparency regarding the number of exemptions the NRC is issuing. Additionally, the NRC publishes tables of approved regulatory actions related to the COVID-19 PHE on its public website at <https://www.nrc.gov/about-nrc/covid-19/reactors/licensing-actions.html>.

II. Availability of Documents

The tables below provide the facility name, docket number, document title, and ADAMS accession number for each exemption issued. Additional details on each exemption issued, including the exemption request submitted by the respective licensee and the NRC's decision, are provided in each exemption approval listed on the tables below.
