

accommodations for people with disabilities are available upon request. Requests for such accommodations should be submitted via email to fcc504@fcc.gov or by calling the Consumer & Governmental Affairs Bureau at (202) 418-0530 (voice), (202) 418-0432 (tty). Such requests should include a detailed description of the accommodation needed. In addition, please include a way the FCC can contact you if it needs more information. Please allow at least five days' advance notice; last-minute requests will be accepted but may be impossible to fill.

Proposed Agenda: At this meeting, the Working Group leadership will update to the Task Force on their progress. This agenda may be modified at the discretion of the Task Force Chair and the Designated Federal Officer.

Federal Communications Commission.

Cecilia Sigmund,

Federal Register Liaison Officer, Office of the Secretary.

BILLING CODE 6712-01-P

FEDERAL COMMUNICATIONS COMMISSION

[PS Docket Nos. 15-80, 13-75, 11-60; DA 20-453; FRS 16750]

911 Reliability

AGENCY: Federal Communications Commission.

ACTION: Notice.

SUMMARY: In this document, the Federal Communication Commission's (FCC or Commission) Public Safety and Homeland Security Bureau (Bureau) seeks comment on the implementation of new data fields for covered 911 service providers that it will add to the Network Outage Reporting System (NORS) and 911 Reliability Certification System to improve the Bureau's situational awareness regarding 911 reliability. The effective date for the implementation of these changes will be announced in a future Public Notice.

DATES: Submit comments on or before July 20, 2020.

ADDRESSES: You may submit comments, identified by PS Docket Nos. 15-80, 13-75, 11-60; DA 20-453, by any of the following methods:

- *Federal Communications Commission's website:* <http://fjallfoss.fcc.gov/ecfs2/>. Follow the instructions for submitting comments.
- Filings can be sent by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail. See

the **SUPPLEMENTARY INFORMATION** section for more instructions.

- *People with Disabilities:* Contact the FCC to request reasonable accommodations (accessible format documents, sign language interpreters, CART, etc.) by email: FCC504@fcc.gov or phone: 202-418-0530 or TTY: 202-418-0432. For detailed instructions for submitting comments see the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: For general questions, contact Kenneth Mallory, Attorney Advisor, Cybersecurity and Communications Reliability Division, Public Safety and Homeland Security Bureau, at (202) 418-7785 or kenneth.mallory@fcc.gov.

SUPPLEMENTARY INFORMATION: This is a summary of the *Modifications to Network Outage Reporting and 911 Reliability Certifications for Covered 911 Service Providers Public Notice*, PS Docket Nos. 15-80, 13-75, 11-60; DA 20-453, released April 27, 2020.

The complete text of the *Modifications to Network Outage Reporting and 911 Reliability Certifications for Covered 911 Service Providers Public Notice* is also available electronically at: <https://www.fcc.gov/document/pshsb-seeks-comment-nors-911-reliability-certification-changes>.

I. Introduction and Background

The Bureau seeks comment on the implementation of new NORS and 911 Reliability Certification System data fields for covered 911 service providers. These new fields will improve the Bureau's ability to assess 911 reliability by aiding the Commission in identifying 911 special facilities (such as public safety answering points (PSAPs)) affected by service outages, determining whether alternative measures to circuit diversity are effective in maintaining network reliability, recognizing year-to-year improvements in 911 reliability, and ensuring compliance with existing network reliability requirements. The Bureau intends to make these modifications pursuant to its delegated authority. Specifically, the Commission has delegated authority to the Bureau to administer its "communications disruption reporting requirements," and "revise the filing system and template used for the submission of such communications disruption reports," 47 CFR 0.392(i), 0.191(g). The Commission has also delegated authority to the Bureau, "consistent with the requirements of the Administrative Procedure Act and relevant portions of the Communications Act," to develop "forms and procedures as may be

required to collect and process [911] certifications, and . . . periodically update those forms and procedures as necessary" and "order appropriate remedial action on a case-by-case basis where 911 reliability certifications indicate such actions are necessary to protect public safety," 79 FR 3123, 3129 (Jan. 17, 2014) (*911 Reliability Report and Order*). While these systems have distinct and independent reporting requirements, the Bureau believes that modifications to NORS will supply more insight into the representations covered 911 service providers make with respect to 911 reliability certifications. Specifically, supplementing NORS outage reports with information available to covered 911 service providers from their most recent 911 reliability certifications can help to confirm the extent to which any alternative measures they use to ensure circuit diversity are effective.

II. Modifications to NORS Reporting Forms

911 Special Facilities Impacted by Outages. Information about which 911 special facilities are affected by outages, and whether 911 special facilities were notified of outages, facilitates the Bureau's efforts to better ascertain and analyze the effect of outages required to be reported under the Commission's part 4 rules, and to enforce those aspects of the rules requiring covered 911 service providers to submit notifications to the Bureau regarding outages that potentially affect 911 special facilities. The part 4 rules require that "all pertinent information on the outage, including any information that was not contained in, or that has changed from that provided in, the Initial report." In the Bureau's experience, it has often been required to follow up with covered 911 service providers to determine whether 911 special facilities were affected and whether the relevant PSAPs were appropriately notified. We believe a more efficient approach would be to receive this information in the reports from covered 911 service providers at the outset. In these regards, the Bureau proposes to modify the specificity of the information requested of covered 911 service providers on NORS notification, initial and final reports submission forms. These forms will be revised to include a checkbox that will enable filers to check "yes" or "no" to indicate whether they are a covered 911 service provider. If the filer indicates that it is a covered 911 service provider, the filer will be prompted to identify which 911 special facilities are affected by an outage, whether they were notified and, if so, how they were

notified. Specifically, fields will be added to NORS submission forms for covered 911 service providers to type in appropriate 911 special facility names. As these filers type in a 911 special facility name, a list of matching names will be displayed for filers to select the appropriate response. To reduce burdens on covered 911 service providers and ensure consistency in the information that is reported, the Bureau will offer filers a list of 911 special facility names generated from the list of PSAPs that the Commission receives from covered 911 service providers' submissions to the 911 Reliability Certification System. If the names of the affected 911 special facilities are not shown on the list, covered 911 service providers can enter additional facility names in the field. For each affected 911 special facility, the form will provide a drop-down option (*i.e.*, yes/no) for filers to indicate whether the PSAP has been notified. A field will also be added to NORS to enable covered 911 service providers to specify how they notified the affected PSAP (*e.g.*, by phone, by email). By providing these fields, the Bureau believes the revised forms will be a more effective and minimally burdensome way of enforcing the obligation in the rules to notify PSAPs of outages potentially affecting 911 special facilities, records of which in light of this obligation we anticipate that covered 911 service providers already keep. Service providers that do not serve as covered 911 service providers for the affected 911 special facilities will not be required to complete these fields.

Alternative Measures for Circuit Diversity. The Bureau has also had to follow up with covered 911 service providers about alternative measures they use for circuit diversity when there has been an outage. It would improve the Bureau's situational awareness if this information were available in NORS reports rather than only pursuant to follow up requests. Collecting this information will improve the Bureau's ability to evaluate the effectiveness of alternative measures in lieu of certification to physical circuit diversity. Accordingly, the Bureau proposes to require NORS filers indicating on NORS final report submission forms that they are covered 911 service providers to identify, in a new data field that will be added to NORS final report submission forms, whether alternative measures to circuit diversity were in place for affected 911 special facilities. For each affected 911 special facility, there will be a dropdown option in NORS (*i.e.*, yes/no/Not Applicable) for filers to indicate

whether an alternate measure was taken for the affected PSAP. If the response is "yes," filers will be prompted to specify the alternate measure taken in a new free text field. Service providers that do not serve as covered 911 service providers for the affected 911 special facilities will not be required to complete these fields. The Bureau believes that requiring covered 911 service providers to disclose whether outages occur on network segments that use alternative measures for circuit diversity will impose a minimal burden on covered 911 service providers as they would need only relate information they already prepare for submission to the Commission's 911 Reliability Certification System to specific outages they report in NORS. All service providers, including covered 911 service providers, will still be required to complete the existing NORS fields that collect information on whether an outage could have been prevented or mitigated if physical diversity had been implemented in their network.

The Bureau seeks comment on whether the implementations proposed are the most effective and efficient ways for the Commission to collect the information sought from covered 911 service providers in NORS. Are there any alternative approaches to collecting this information that would reduce burdens on covered 911 service providers that are required to file in NORS while achieving the Bureau's objectives of obtaining accurate and robust data on 911 reliability and ensuring compliance with the Commission's rules?

III. Modifications to 911 Certification Forms

Applicability of 911 Certifications. The Commission's rules require covered 911 service providers to certify whether elements of the 911 reliability certifications are not applicable to their networks, 47 CFR 9.19(c)(1)(ii). Some certifications submitted to the Commission are ambiguous as to the reasons why their filers believe those elements are not applicable. For example, some covered 911 service providers certify that certification elements regarding critical 911 circuits are not applicable to them because they do not operate selective routers. However, even if these providers do not operate selective routers, the rules may nonetheless be applicable to these providers if they operate a functional equivalent of a selective router or offer other capabilities such as automatic location information or automatic number information to a PSAP, statewide default answering point, or

appropriate local emergency authority. The Bureau must then seek information on a case-by-case basis to assess whether covered 911 service providers are complying with the existing rules and to follow up as appropriate. To ensure that the Bureau can more efficiently evaluate whether covered 911 service providers are in compliance with the Commission's 911 reliability certification rules, the Bureau proposes to make necessary updates to the 911 Reliability Certification System to reduce ambiguity in certifications. The Bureau will modify the 911 Reliability Certification System to prompt covered 911 service providers to explain with greater specificity how the certification elements apply to their network. Specifically, the Bureau will add drop-down fields to 911 reliability certifications that will require covered 911 service providers to indicate whether they provide the following services: (1) 911, E911 or NG911 call routing through a selective router or its functional equivalent; (2) automatic location information or automatic number information database lookup capability or its functional equivalent; and (3) direct service to a PSAP by one or more central offices it operates, including administrative lines to a PSAP, statewide default answering point, or appropriate local emergency authority. The Bureau believes that this information will assist in corroborating certifications that certain elements are not applicable, which will save time and resources of covered 911 service providers by reducing the number of questions they receive from Bureau staff about their certifications.

911 Network Upgrades. Additionally, the Bureau recognizes that some covered 911 service providers continue to make improvements to their networks that improve the reliability of 911 but are not currently captured in the 911 Reliability Certification System. Collecting information about these improvements will help the Bureau's efforts to assess the extent and scope of providers' initiatives to enhance 911 service nationwide and identify industry practices and standards that will help inform the Bureau's recommendations to the Commission for future Commission action consistent with its rules. To allow covered 911 service providers an opportunity to update the Commission as to their efforts on 911 reliability, the Bureau proposes to revise 911 reliability certifications to include a data field that enables covered 911 service providers to highlight network upgrades completed within the past year that have resulted

in improvements to 911 reliability and/or performance. To implement this change, a new text field will be added to the 911 Reliability Certification System for filers to provide a summary of major network upgrades and improvements they completed within the past year. This data field would be optional and therefore would not impose burdens on covered 911 service providers who choose not to use the field.

The Bureau seeks comment on whether the implementations proposed are the most effective and efficient way to validate the certifications that indicate that one or more elements are inapplicable to their networks and capture additional information on yearly 911 improvements. Are there any alternative approaches to collecting this information that would reduce burdens on covered 911 service providers while achieving the Bureau's objectives of obtaining accurate and robust data on 911 reliability and ensuring compliance with the Commission's rules?

IV. Implementation

Following the receipt of comments on these modifications, the Bureau will release a Public Notice to specify the changes that will be implemented in the Network Outage Reporting System (NORS) and 911 Reliability Certification System and address issues and alternative approaches raised by commenters. To the extent necessary, these changes may be made without prior notice-and-comment under the Administrative Procedure Act as "rules of agency organization, procedure, or practice," 5 U.S.C. 553(b)(A). The Bureau will then seek Office of Management and Budget (OMB) approval of the modifications to the extent required under the Paperwork Reduction Act. Upon receipt of OMB approval, and the Bureau's completion of all necessary changes to the systems, the Bureau will announce that the modifications are effective. Moreover, the Bureau understands that NORS filers may need the Bureau's technical assistance to ensure that their existing systems are compatible with any resulting modifications to the NORS Application Programming Interface (API). Therefore, the Bureau will work with system filers prior to the effective date of these new modifications to ensure that no API issues impede their compliance.

Paperwork Reduction Act. This document contains proposed modified information collection requirements. The Commission, as part of its continuing effort to reduce paperwork burdens, invites the general public and

the OMB to comment on the information collection requirements contained in this document, as required by the Paperwork Reduction Act of 1995, Public Law 104-13. In addition, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107-198, see 44 U.S.C. 3506(c)(4), we seek specific comment on how we might further reduce the information collection burden for small business concerns with fewer than 25 employees.

V. Procedural Matters

Interested parties may file comments in response to this *Public Notice* on or before the date indicated on the first page of this document. See *Electronic Filing of Documents in Rulemaking Proceedings*, 63 FR 24121 (1998). Comments may be filed using the Commission's Electronic Comment Filing System (ECFS).

- *Electronic Filers:* Comments may be filed electronically using the internet by accessing the ECFS: <http://apps.fcc.gov/ecfs/>.

- *Paper Filers:* Parties who choose to file by paper must file an original and one copy of each filing.

- Filings can be sent by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail. All filings must be addressed to the Commission's Secretary, Office of the Secretary, Federal Communications Commission.

- Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9050 Junction Drive, Annapolis Junction, MD 20701.

- U.S. Postal Service first-class, Express, and Priority mail must be addressed to 445 12th Street SW, Washington, DC 20554.

- Effective March 19, 2020, and until further notice, the Commission no longer accepts any hand or messenger delivered filings. This is a temporary measure taken to help protect the health and safety of individuals, and to mitigate the transmission of COVID-19. See *FCC Announces Closure of FCC Headquarters Open Window and Change in Hand-Delivery Policy*, Public Notice, DA 20-304 (March 19, 2020).

- During the time the Commission's building is closed to the general public and until further notice, if more than one docket or rulemaking number appears in the caption of a proceeding, paper filers need not submit two additional copies for each additional docket or rulemaking number; an original and one copy are sufficient.

- *People with Disabilities:* To request materials in accessible formats for people with disabilities (braille, large

print, electronic files, audio format), send an email to fcc504@fcc.gov or call the Consumer & Governmental Affairs Bureau at 202-418-0530 (voice), 202-418-0432 (tty).

This proceeding has been designated as a "permit-but-disclose" proceeding in accordance with the Commission's *ex parte* rules. See 47 CFR 1.1200(a), 1.1206. Persons making *ex parte* presentations must file a copy of any written presentation or a memorandum summarizing any oral presentation within two business days after the presentation (unless a different deadline applicable to the Sunshine period applies). Persons making oral *ex parte* presentations are reminded that memoranda summarizing the presentation must (1) list all persons attending or otherwise participating in the meeting at which the *ex parte* presentation was made, and (2) summarize all data presented and arguments made during the presentation. If the presentation consisted in whole or in part of the presentation of data or arguments already reflected in the presenter's written comments, memoranda or other filings in the proceeding, the presenter may provide citations to such data or arguments in his or her prior comments, memoranda, or other filings (specifying the relevant page and/or paragraph numbers where such data or arguments can be found) in lieu of summarizing them in the memorandum. Documents shown or given to Commission staff during *ex parte* meetings are deemed to be written *ex parte* presentations and must be filed consistent with rule 1.1206(b). In proceedings governed by rule 1.49(f) or for which the Commission has made available a method of electronic filing, written *ex parte* presentations and memoranda summarizing oral *ex parte* presentations, and all attachments thereto, must be filed through the electronic comment filing system available for that proceeding, and must be filed in their native format (e.g., .doc, .xml, .ppt, searchable .pdf). Participants in this proceeding should familiarize themselves with the Commission's *ex parte* rules.

Federal Communications Commission.

Lisa Fowlkes,

Chief, Public Safety and Homeland Security Bureau.
