Atlantic Coastal Fisheries Cooperative Management Act Provisions; General Provisions for Domestic Fisheries; Application for Exempted Fishing Permits

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; request for comments.

SUMMARY: The Assistant Regional Administrator for Sustainable Fisheries, Greater Atlantic Region, NMFS, has made a preliminary determination that an Exempted Fishing Permit application from the University of Connecticut contains all of the required information and warrants further consideration. This Exempted Fishing Permit would allow participating vessels to collect undersized and egg-bearing lobsters to conduct an endocrine disruption study. Regulations under the Magnuson-Stevens Fishery Conservation and Management Act and the Atlantic Coastal Fisheries Cooperative Management Act require publication of this notice to provide interested parties the opportunity to comment on applications for proposed Exempted Fishing Permits.

DATES: Comments must be received on or before July 6, 2020.

ADDRESSES: You may submit written comments by any of the following methods:

- *Email:* NMFS.GAR.EFP@noaa.gov. Include in the subject line “Comments on UConn Lobster Study.” If you are unable to submit your comment through NMFS.GAR.EFP@noaa.gov, please contact Laura Hansen, Fishery Management Specialist, Laura.Hansen@noaa.gov.

FOR FURTHER INFORMATION CONTACT: Laura Hansen, Fishery Management Specialist, 978–281–9225, Laura.Hansen@noaa.gov.

SUPPLEMENTARY INFORMATION: The University of Connecticut submitted a complete exempted fishing permit (EFP) application on April 21, 2020. This project would collect egg bearing lobsters to examine the impact of endocrine disrupting chemicals on larvae development.

If the EFP is approved, this study would take place from June through September 2020. The EFP would authorize participating vessels to collect

up to 18 undersized and 20 egg-bearing lobsters from Lobster Conservation Management Areas 2 and 3. The lobsters collected for this study would range in weight from 1.5–4.5 lb (0.68–2.41 kg). Fishermen would send the lobsters to a researcher at the Marine Biological Laboratory in Woods Hole, MA. The researcher would transfer the lobsters to a holding tank to conduct further analysis of blood samples for the presence of endocrine disruptors and monitor larval development. The researcher will return surviving lobsters to the ocean following the experiments.

If approved, the applicant may request minor modifications and extensions to the EFP throughout the study period. EFP modifications and extensions may be granted without further notice if they are deemed essential to facilitate completion of the proposed research and have minimal impacts that do not change the scope or impact of the initially approved EFP request. Any fishing activity conducted outside the scope of the exempted fishing activity would be prohibited.

Atlantic Coastal Fisheries Cooperative Management Act Provisions; General Provisions for Domestic Fisheries; Application for Exempted Fishing Permits

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; request for comments.

SUMMARY: The NMFS Assistant Regional Administrator for Sustainable Fisheries, Greater Atlantic Region, has made a preliminary determination that an Exempted Fishing Permit application contains all of the required information and warrants further consideration. This Exempted Fishing Permit would allow six commercial lobster vessels to participate in a lobster growth and abundance study, under the direction of Massachusetts Division of Marine Fisheries.

Regulations under the Magnuson-Stevens Fishery Conservation and Management Act and the Atlantic Coastal Fisheries Cooperative Management Act require publication of this notice to provide interested parties

the opportunity to comment on Exempted Fishing Permit applications.

DATES: Comments must be received on or before July 6, 2020.

ADDRESSES: You may submit written comments by any of the following methods:

- *Email:* NMFS.GAR.EFP@noaa.gov. Include in the subject line "Comments on MA DMF Lobster Study EFP." If you are unable to submit your comments to NMFS.GAR.EFP@noaa.gov, please contact Laura Hansen, Fishery Management Specialist, *Laura.Hansen@noaa.gov*.

FOR FURTHER INFORMATION CONTACT:

Laura Hansen, Fishery Management Specialist, 978–281–9225.

SUPPLEMENTARY INFORMATION: The Massachusetts Division of Marine Fisheries (MA DMF) submitted a complete renewal application for an Exempted Fishing Permit (EFP) to conduct a lobster abundance survey that Federal regulations would otherwise restrict. The purpose of this study is to provide fishery-independent data on lobster growth and abundance in Massachusetts state waters of statistical areas 514 and 538.

This survey has occurred annually since 2006 in Massachusetts state waters. On average, 15,604 lobsters per year were sampled from 2007–2016. The EFP would authorize the six participating vessels to deploy three standard and three ventless traps per six-pot trawl. Stations would be sampled twice per month from June through October 2020. Sampling trips would occur after a soak time of 3 to 5 days and at least one MA DMF scientist would be on board for the sampling trips. MA DMF personnel would not be on board when traps are baited and deployed. All gear would be Atlantic Large Whale Take Reduction Plan compliant. Survey traps will be separate from each vessel's commercial lobster traps and would be tagged as, "MADMF Research Traps."

All catch during sampling trips would be retained temporarily to collect biological data. MA DMF staff may collect lobster and/or Jonah crab, including undersized, oversized, v-notched, and egg-bearing lobsters. Collected samples would be used for research projects on growth and maturity. No catch from the experimental trips would be landed for sale.

If approved, MA DMF may request minor modifications and extensions to the EFP throughout the study. EFP modifications and extensions may be granted without further notice if they are deemed essential to facilitate

completion of the proposed research and have minimal impacts that do not change the scope or impact of the initially approved EFP request. Any fishing activity conducted outside the scope of the exempted fishing activity would be prohibited.
