

**Background and Brief Description**

Section 212(a)(1) of the Immigration and Nationality Act states that aliens with specific health related conditions are ineligible for admission into the United States. The Attorney General may waive application of this inadmissibility on health-related grounds if an application for waiver is

filed and approved by the consular office considering the application for visa. CDC uses this application primarily to collect information to establish and maintain records of waiver applicants in order to notify the U.S. Citizenship and Immigration Services when terms, conditions and controls imposed by waiver are not met.

CDC is removing information collection form 4.422–1a in this revision, because CDC no longer uses this form to receive information about the evaluation report of an applicant who received a waiver. Since this form is no longer being used, the estimated annual total burden hours decreased by 67 hours, from 100 to 33 annual burden hours.

**SUPPLEMENTARY INFORMATION:**

*Description:* The Child Abuse Prevention and Treatment Act (CAPTA) was amended in 1988 to direct the Secretary of HHS to establish a national data collection and analysis program, which would make available state child abuse and neglect reporting information. HHS responded by establishing NCANDS as a voluntary national reporting system.

In 1996, CAPTA was amended to require all states that receive funds from the Basic State Grant program to work with the Secretary of HHS to provide specific data elements, to the maximum extent practicable, about children who had been maltreated. Most of the required data elements were added to the NCANDS data collection. Subsequent CAPTA reauthorizations and amendments added required data elements. The current list of CAPTA-required data elements includes:

(1) The number of children who were reported to the state during the year as victims of child abuse or neglect.

(2) Of the number of children described in paragraph (1), the number with respect to whom such reports were—

- (a) Substantiated;
- (b) Unsubstantiated; or
- (c) Determined to be false.

(3) Of the number of children described in paragraph (2)—

(a) the number that did not receive services during the year under the state program funded under this section or an equivalent state program;

(b) the number that received services during the year under the state program funded under this section or an equivalent state program; and

(c) the number that were removed from their families during the year by disposition of the case.

(4) The number of families that received preventive services, including use of differential response, from the state during the year.

(5) The number of deaths in the state during the year resulting from child abuse or neglect.

(6) Of the number of children described in paragraph (5), the number of such children who were in foster care.

(7)

(a) The number of child protective service personnel responsible for the—

(i.) intake of reports filed in the previous year;

(ii.) screening of such reports;

(iii.) assessment of such reports; and

(iv.) investigation of such reports.

(b) The average caseload for the workers described in subparagraph (A).

(8) The agency response time with respect to each report pertaining to the initial investigation of child abuse or neglect.

(9) The response time with respect to the provision of services to families and children where an allegation of child abuse or neglect has been made.

(10) For child protective service personnel responsible for intake, screening, assessment, and investigation of child abuse and neglect reports in the state—

(a) information on the education, qualifications, and training requirements established by the state for child protective service professionals, including for entry and advancement in the profession, including advancement to supervisory positions;

(b) data of the education, qualifications, and training of such personnel;

(c) demographic information of the child protective service personnel; and

(d) information on caseload or workload requirements for such personnel, including requirements for average number and maximum number of cases per child protective service worker and supervisor.

(11) The number of children reunited with their families or receiving family preservation services that, within 5 years, result in subsequent substantiated reports of child abuse or neglect, including the death of the child.

(12) The number of children for whom individuals were appointed by the court to represent the best interests of such children and the average number of out of court contacts between such individuals and children.

(13) The annual report containing the summary of activities of the citizen review panels of the state required by subsection (c)(6).

(14) The number of children under the care of the state child protection system who are transferred into the

custody of the state juvenile justice system.

(15) The number of children referred to a child protective services system under subsection (b)(2)(B)(ii).

(16) The number of children determined to be eligible for referral, and the number of children referred, under subsection (b)(2)(B)(xxi), to agencies providing early intervention services under part C of the Individuals with Disabilities Education Act (20 U.S.C. 1431 *et seq.*).

(17) The number of children determined to be victims described in subsection (b)(2)(B)(xxiv).

(18) The number of infants—  
(a) identified under subsection (b)(2)(B)(ii);

(b) for whom a plan of safe care was developed under subsection (b)(2)(B)(iii); and

(c) for whom a referral was made for appropriate services, including services

for the affected family or caregiver, under subsection (b)(2)(B)(iii).

The items listed under number (10), (13), and (14) are not collected by NCANDS.

The Children’s Bureau proposes to continue collecting the NCANDS data through the two files of the Detailed Case Data Component, the Child File (the case-level component of NCANDS), and the Agency File (additional aggregate data, which cannot be collected at the case level). There are no proposed changes to the NCANDS data collection instruments. New data elements were added during the previous OMB clearance cycle in response to the Justice for Victims of Trafficking Act of 2015 and the Comprehensive Addiction and Recovery Act of 2016, both of which amended CAPTA.

*Respondents:* State governments, the District of Columbia, and the Commonwealth of Puerto Rico.
