*General Description of Collection:* Respondents must prepare and provide certain disclosures to consumers (e.g., that insurance products and annuities are not FDIC-insured) and obtain consumer acknowledgments, at two different times: (1) Before the completion of the initial sale of an insurance product or annuity to a consumer; and (2) at the time of application for the extension of credit (if insurance products or annuities are sold, solicited, advertised, or offered in connection with an extension of credit).

**Methodology and Assumptions**

The FDIC revised its estimates of the number of respondents to this information collection based on changes in the estimated number of respondents due to economic conditions. The hourly burden per response remains the same, recognizing a difference between the amount of time required to implement policies and procedures and the amount of time required to maintain records on an ongoing basis once those policies and procedures have been established.

*Total Estimated Number of Respondents*

FDIC revised its estimate of the number of respondents to this information collection. Potential respondents to this information collection include all FDIC-supervised institutions that adopt or revise policies and procedures regarding reverse mortgage offerings. The estimate for respondents with ongoing reverse mortgage products was calculated using 2018 Home Mortgage Disclosure Act (HMDA) data and 2018 monthly U.S. Department of Housing and Urban Development (HUD) Home Equity Conversion Mortgage (HECM) data. For the 2018 HMDA data, the FDIC identified 27 institutions that had at least 1 application for a reverse mortgage.<sup>1</sup> In order to account for reverse mortgage originators who did

not report HMDA data, the FDIC cross referenced to the 2018 HUD HECM data and identified 6 institutions with at least 1 application in the 2018 HUD HECM data. Three of those institutions were also identified in the 2018 HMDA data; thus, the FDIC identified 30 total reverse mortgage originators using 2018 data from the two sources.

To estimate the number of institutions facing implementation burden, FDIC looked at the change in the estimated number of respondents facing ongoing burden for revising existing policies and procedures. In 2016 FDIC estimated the number of respondents facing ongoing burden to be 26. The current estimated number of FDIC-supervised institutions that offer reverse mortgages is 30. The FDIC assumes that approximately 4 institutions began offering reverse mortgages over the last three years and estimates the number of respondents implementing reverse mortgage products to be approximately one per year.

*Estimated Hourly Burden*

FDIC estimates the recordkeeping burden associated with implementing and documenting incentive-based compensation policies and procedures to be 40 hours per respondent, per year. FDIC estimates the recordkeeping burden associated with revising and documenting incentive-based compensation policies and procedures previously adopted and documented to be 8 hours per respondent, per year.

**Request for Comment**

Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the FDIC’s functions, including whether the information has practical utility; (b) the accuracy of the estimates of the burden of the information collection, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the

use of automated collection techniques or other forms of information technology. All comments will become a matter of public record.
