47 CFR Parts 1, 2, 15, 18, 27 and 95

[ET Docket No. 19–289; DA 19–1326; FRS 16510]

WRC–15 Order

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document makes non-substantive, editorial revisions to the Table of Frequency Allocations (Allocation Table) and to various other Commission rules. The purpose of this action is to update the International Table of Frequency Allocations (International Table) to reflect the decisions made at an international conference, to update the Federal Table of Frequency Allocations (Federal Table) within the Commission's rules in those frequency bands where such an action would have no substantive effect on non-Federal licensees, to remove outdated provisions from the Commission's rules, and to ensure that the Allocation Table and related rules are consistent with the Commission's decisions in recent rulemaking proceedings.

DATES: Effective July 27, 2020.

Synopsis

ORDER

1. By this action, the Commission amends parts 1, 2, 15, 18, 27, and 95 of its rules to make non-substantive, editorial revisions to the Allocation Table and to revise various other rules.

This action is not intended to modify or otherwise change any party's underlying rights and/or responsibilities. In particular, the Commission updates the International Table within the Allocation Table to reflect, for informational purposes only, the decisions made at the World Radiocommunication Conference 2015 (WRC–15). In addition, the Commission makes certain amendments to the Federal Table, for informational purposes only, based on the recommendations of the National Telecommunications and Information Administration (NTIA), which pertain solely to spectrum allocated exclusively for Federal use or where non-Federal use is limited to secondary services. WRC–15 implementation matters of a substantive nature will be addressed in a separate notice of proposed rulemaking.

DISCUSSION

A. Reflecting WRC–15 Revisions in the International Table

2. The Commission updates the International Table within section 2.106 of the rules to reflect Article 5, Section IV of the Radio Regulations (Edition of 2016), except where minor corrections or updates have been made. The International Table is included within the Commission's Allocation Table for informational purposes only.

B. Reflecting WRC–15 Revisions in the U.S. Table

References to International Footnotes in the U.S. Table

3. The United States Table of Frequency Allocations (U.S. Table) includes references to ten international footnotes (5.134, 5.223, 5.260, 5.268, 5.287, 5.327A, 5.443B, 5.396, 5.501A, and 5.511C), which WRC–15 revised or deleted. Because these footnotes are included in the U.S. Table, the Commission reviewed these footnotes and finds that the WRC–15 revisions will have no substantive effect on non-Federal operations. Specifically, the Commission:

- Removes the references to international footnotes 5.223 and 5.260 from the U.S. Table because WRC–15 removed these international footnotes and the underlying primary radionavigation-satellite service allocation from the 149.9–150.05 MHz and 399.9–400.05 MHz bands from the Radio Regulations, making the references to these international footnotes in the U.S. Table no longer necessary.

- Revises international footnotes 5.327A and 5.443B by updating the

cross references from Resolution 417 (Rev.WRC–12) and Resolution 741 (Rev.WRC–12), respectively, to the version of these resolutions that are currently shown in the Radio Regulations, *i.e.*, “(Rev.WRC–15).” As noted above, the Commission is also updating cross references to Resolution 517 (Rev.WRC–07) and Resolution 33 (Rev.WRC–03) contained in footnotes 5.134 and 5.396, respectively. WRC–15 made editorial changes to the text of these resolutions. The revised text of these international footnotes can be used in the U.S. Table since the changes do not have a substantive impact on non-Federal operations.

- Revises international footnote 5.268 by removing the extra-vehicular activity (EVA) and five-kilometer restrictions from Federal space research service (SRS) operations in the 410–420 MHz band. Because non-Federal stations in the 410–420 MHz band don't have a co-primary status, they “cannot claim protection from harmful interference from stations of a primary service to which frequencies are already assigned or may be assigned at a later date,” and thus, applying the text that WRC–15 adopted for footnote 5.268 is a non-substantive, editorial action.

- Updates the text of international footnote 5.287 to reflect the changes adopted by WRC–15, noting that this footnote was revised to specify the frequency bands that are available for on-board communication stations in the maritime mobile service and to state that the “characteristics of the equipment and the channelling arrangement shall be in accordance with Recommendation ITU–R M.1174–3.” These changes increase the number of available frequencies from the existing ten to 34 and also could be misinterpreted as requiring the use of a channelling plan different from that currently used in U.S. territorial waters, which is shown in footnote US288. As a result, because footnote 5.287 appears in the 456–470 MHz range in the U.S. Table, the Commission moves the pre-WRC–15 text of footnote 5.287 into placeholder footnote US287 so that these changes to the international footnote can be considered by the Commission in its planned WRC–15 implementation notice of proposed rulemaking. Consequently, the Commission also amends the respective frequency bands in the U.S. Table by replacing the reference to footnote 5.287 with that of footnote US287.

Revisions to the Federal Table

4. In this section, the Commission addresses the modifications NTIA made to certain Federal allocations for

purposes of implementing the *WRC-15 Final Acts*, which were submitted to the Commission on September 10, 2018. In line with NTIA's changes, the Commission revises the Federal Table in its rules to reflect, for informational purposes only, changes to the following bands that are allocated exclusively for Federal use: 7190–7250 MHz, 7300–7750 MHz and 14.5–14.8 GHz; and the following bands with primary Federal allocations that contain only secondary non-Federal allocations: 1215–1240 MHz and 13.4–13.75 GHz. Specifically, the Commission:

- Adds to the Federal Table a primary allocation for the Earth exploration-satellite service (EESS) (Earth-to-space) in the 7190–7250 MHz band and two international footnotes (5.460A, 5.460B) that limit the use of this EESS uplink allocation. Footnote 5.460A limits the EESS uplink allocation to tracking, telemetry and command for the operation of spacecraft, and, *e.g.*, specifies that space stations operating under this allocation in the 7190–7250 MHz band may not claim protection from stations in the fixed and mobile services. Footnote 5.460B states that EESS geostationary satellites receiving in the 7190–7235 MHz band may not claim protection from existing and future stations of the space research service. The Commission also replaces footnote G133 with international footnote 5.460.

- Adds to the Federal Table a primary allocation for the maritime mobile-satellite service (MMSS) (space-to-Earth) in the 7375–7750 MHz bands and two international footnotes (5.461AA, 5.461AB) that limit the use of this MMSS downlink allocation. Footnote 5.461AA limits MMSS use of the band to geostationary-satellite orbit (GSO) networks and footnote 5.461AB specifies that MMSS earth stations receiving in the band may not claim protection from, nor constrain the use and development of, stations in the fixed and mobile, except aeronautical mobile, services. In addition, the Commission replaces the existing secondary mobile-satellite service (space-to-Earth) allocation entry in the 7375–7750 MHz band with a secondary mobile-satellite “except maritime mobile-satellite” service (space-to-Earth) allocation entry, and in the 7375–7450 MHz band, the Commission also adds a primary mobile except aeronautical mobile service allocation.

- Adds to the Federal Table international footnote 5.509G to the right of the existing secondary space research service (SRS) allocation entry in the 14.5–14.8 GHz band. Footnote 5.509G states that the 14.5–14.8 GHz

band is also allocated to SRS on a primary basis, limited to satellite systems operating in the Earth-to-space (uplink) direction to relay data to space stations in the geostationary-satellite orbit (GSO) from associated earth stations; that primary stations in the SRS may not cause harmful interference to, or claim protection from, stations operating under the fixed, mobile, and fixed-satellite services; and that other uses of this frequency band by the SRS are on a secondary basis.

- Updates footnote G132, which applies to the 1215–1240 MHz band, to cross reference the revised Resolution 608, replacing “(WRC-03)” with “(Rev.WRC-15).” WRC-15 revised Resolution 608 (WRC-03) by noting that Recommendation ITU-R M.1902 and Report ITU-R M.2284 apply to radionavigation-satellite service (space-to-Earth) use of the 1215–1300 MHz band.

- Subjects the use of the existing primary Federal space research service (SRS) allocation in the 13.4–13.75 GHz band to new international footnotes 5.499C and 5.499D as well as modified footnote 5.501A. Because footnote 5.501B limits the impact of the space research service (active) in the band on the radiolocation service and the only non-Federal licensee in the band is in the radiolocation service, the Commission finds that this action is non-substantial.

Other Revisions to the U.S. Table

5. The Commission makes the following non-substantive, editorial changes to the U.S. Table and to FCC Rule part cross references within section 2.106 of the rules:

- Update footnote NG159 to remove the reference to part 74, subpart E, because the aural broadcast auxiliary stations are no longer licensed to operate on frequencies in the 698–806 MHz band, which has been reallocated and licensed for mobile broadband use.

- Add footnote US84 to the 941–944 MHz band in the Federal Table, which was inadvertently omitted when the Commission revised footnote US84 by adding the 941.5–944 MHz band.

- Add footnote NG527A to the 10.7–11.7 GHz band, which was inadvertently omitted from the non-Federal Table of Frequency Allocations (non-Federal Table) when the footnote was adopted in the *ESIMs Report and Order and Further Notice of Proposed Rulemaking*.

- Delete the entries for EESS (passive), SRS (passive), and footnotes 5.562B, 5.562F, and 5.562G from the 155.5–158.5 GHz band. The transition period concluded in 2018, and these

two allocations and three footnotes are no longer needed.

- Update the contact information for the National Science Foundation in footnotes US99 and US385 and sections 27.1321(b) and 95.2309(f)(3) of the Commission's Rules.

- Revise the FCC Rule Part(s) column of the Allocation Table by adding a part 15 cross reference (*i.e.*, “RF Devices (15)”) to the 902–928 MHz, 2400–2483.5 MHz, 5850–5925 MHz, 28.35–29.1 GHz, and 84–86 GHz bands; by removing the part 15 cross reference from the 29.1–29.25 GHz and 45.5–46.9 GHz bands; and by adding a part 101 cross reference (*i.e.*, “Fixed Microwave (101)”) to the 84–86 GHz band.

C. Other Conforming Rule Revisions

6. The Commission makes the following non-substantive, editorial updates to the Commission's rules:

- Correct sections 1.1307(b)(2)(ii), 2.1091(c)(2), and 2.1093(c)(1) of the rules by revising the cross reference to section 15.255 from paragraph “(g)” to “(f).” This action reflects the paragraph re-designation adopted in the *Spectrum Frontiers 1st R&O*.

- Revise section 2.100 to note that the International Table has been updated to reflect the 2016 edition of the Radio Regulations.

- Revise section 2.101 to reflect Section I of Article 2 of the Radio Regulations. Specifically, the Commission deletes the column titled “Metric abbreviations for the bands” from the table in section 2.101, and also delete the duplicate table from that section.

- Revise sections 2.102 and 2.105 by replacing the archaic term “band(s) of frequencies” with “frequency band(s).”

- Revise section 2.104 to state that the international footnotes shown in the International Table are applicable only to the relationships between the United States and other countries (unless a reference to an international footnote has been added to the U.S. Table).

- Revise the text in section 2.105(d)(2) without changing its underlying meaning or implication. Also revise the factual description in section 2.105(e) of the informational cross references that appear in column 6 of the Table of Allocations set out in section 2.106. The revision would recognize that the column 6 cross references sometimes include a reference to an FCC Rule subpart instead of an FCC Rule part and that an FCC Rule part or subpart may apply to only a portion of a frequency band. Finally, the Commission adds the following clarifying note: The radio frequency devices authorized pursuant

to 47 CFR part 15 are not based on allocated radio services. In the Allocation Table, the cross references to part 15 are used to note those frequency bands that are most typically associated with unlicensed use.

- Revise section 2.107 to cross reference the international notification requirements of radio astronomy stations, specified in No. 11.12 of Article 11 and Annex 2 of Appendix 4 of the Radio Regulations.

- Correct a typographical error in the heading of section 15.510 to provide consistency with paragraphs (b) and (c).

- Revise section 18.301 by replacing “allocated” with “designated” in the second sentence, simplifying the display of three ISM frequencies (*i.e.*, remove unnecessary commas from 2,450 MHz and 5,800 MHz and change 24,125 MHz to 24.125 GHz) in the table, and by deleting the note below the table. The Commission takes these actions to make this rule more consistent with international footnote 5.150 and to remove an unneeded and outdated cross reference.

Paperwork Reduction Act Analysis

7. This document does not contain new or modified information collection requirements subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104–13. In addition, therefore, it does not contain any new or modified information collection burden for small business concerns with fewer than 25 employees, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, *see* 44 U.S.C. 3506(c)(4).

Congressional Review Act

8. The Commission has determined, and the Administrator of the Office of Information and Regulatory Affairs, Office of Management and Budget, concurs that this rule is non-major under the Congressional Review Act, 5 U.S.C. 804(2). The Commission will send a copy of this Order to Congress and the Government Accountability Office pursuant to 5 U.S.C. 801(a)(1)(A).

Administrative Procedure Act Requirements

9. The Commission amends parts 1, 2, 15, 18, 27, and 95 of the Commission’s rules herein by incorporating non-substantive, editorial revisions only. Therefore, there is good cause for not employing the notice and comment procedure in this case. Specifically, the Commission finds that the normal procedures for notice and comment and for publication as required under section 553 of the Administrative Procedure Act would be impracticable, unnecessary, or contrary to the public interest. *See* 5 U.S.C. 553(b)(3)(B); *Kessler v. FCC*, 326 F.2d 673 (D.C. Cir. 1963).

Ordering Clause

10. *It is ordered* that parts 1, 2, 15, 18, 27, and 95 of the Commission’s rules, 47 CFR parts 1, 2, 15, 18, 27, and 95, *are amended* as set forth in the Appendix of the Order, effective 30 days after publication in the **Federal Register**. This action is taken pursuant to authority found in sections 4(i) and 303 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i) and 303, and in sections 0.11, 0.31, 0.231(b) and 0.241(i) of the Commission’s Rules, 47 CFR 0.11, 0.31, 0.231(b) and 0.241(i).

11. Petitions for reconsideration under 47 CFR 1.429 or applications for review by the Commission under 47 CFR 1.115 may be filed within 30 days after publication in the **Federal Register**. Should no petitions for reconsideration or applications for review be timely filed, this proceeding shall be terminated, and its docket closed.

■ 6. Section 2.102 is amended by revising paragraph (a) to read as follows:

§ 2.102 Assignment of frequencies.

(a) Except as otherwise provided in this section, the assignment of frequencies and frequency bands to all stations and classes of stations and the licensing and authorizing of the use of all such frequencies between 8.3 kHz and 275 GHz, and the actual use of such frequencies for radiocommunication or for any other purpose, including the transfer of energy by radio, shall be in accordance with the Table of Frequency Allocations in § 2.106.

* * * * *

■ 7. Section 2.104 is amended by adding paragraph (h)(8) to read as follows:

§ 2.104 International Table of Frequency Allocations.

* * * * *

(h) * * *

(8) The international footnotes shown in the International Table are applicable only to the relationships between the United States and other countries (unless a reference to an international footnote has been added to the United States Table of Frequency Allocations).

* * * * *

■ 8. Section 2.105 is amended by revising paragraphs (d)(1) and (2) and (e) to read as follows:

§ 2.105 United States Table of Frequency Allocations.

* * * * *

(d) * * *

(1) The frequency band referred to in each allocation, column 4 for Federal operations and column 5 for non-Federal operations, is indicated in the left-hand top corner of the column. If there is no service or footnote indicated for a frequency band in column 4, then the Federal sector has no access to that band except as provided for by § 2.103. If there is no service or footnote indicated for a frequency band in column 5, then the non-Federal sector has no access to that band except as provided for by § 2.102.

(2) When the type of service(s) permitted and any applicable footnote(s) are the same for a frequency band in the Federal Table and the non-Federal Table, columns 4 and 5 are merged, indicating that the frequency band is shared between the Federal and non-Federal sectors under the same conditions.

* * * * *

(e) *Rule part cross-references.* If a frequency or frequency band has been allocated to a radiocommunication service in the non-Federal Table, then a cross reference may be added to the pertinent FCC Rule part (column 6 of § 2.106) or, where greater specificity would be useful, to the pertinent subpart. For example, the band 849–851 MHz is allocated to the aeronautical mobile service for non-Federal use, rules for the use of the 849–851 MHz band have been added to part 22—Public Mobile Services (47 CFR part 22), and a cross reference, Public Mobile (22), has been added in column 6 of § 2.106. The exact use that can be made of any given frequency or frequency band (e.g., channeling plans, allowable emissions, etc.) is given in the FCC Rule part(s) so indicated. The FCC Rule parts in this column are not allocations, may apply to only a portion of a band, and are provided for informational purposes only. This column also may contain explanatory notes for informational purposes only.

Note 1 to paragraph (e): The radio frequency devices authorized pursuant to 47 CFR part 15 are not based on allocated radio services. In the Allocation Table, the cross references to part 15 are used to note those frequency bands that are most typically associated with unlicensed use.

(a) In the bands 1350–1400 MHz and 4950–4990 MHz, every practicable effort will be made to avoid the assignment of frequencies to stations in the fixed and mobile services that could interfere with radio astronomy observations within the geographic areas given above. In addition, every practicable effort will be made to avoid assignment of frequencies in these bands to stations in the aeronautical mobile service which operate outside of those geographic areas, but which may cause harmful interference to the listed observatories. Should such assignments result in harmful interference to these observatories, the situation will be remedied to the extent practicable.

(b) In the band 2655–2690 MHz, for radio astronomy observations performed at the locations listed above, licensees are urged to coordinate their systems through the National Science Foundation, Division of Astronomical Sciences, Electromagnetic Spectrum Management Unit, 2415 Eisenhower Avenue, Alexandria, VA 22314; Email: *esm@nsf.gov*.
