[Project No. 15032–000]

ECOsponsible, LLC; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On May 6, 2020, ECOsponsible, LLC, filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of hydropower at the existing Springville Dam located on Cattaraugus Creek in the town of Concord in Erie County, New York. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed Springville Dam Hydro Project would redevelop an abandoned project and would consist of the following: (1) An existing 338-foot-long and 40-foot-high concrete gravity dam with a 182-foot-long spillway; (2) an existing impoundment; (3) an existing powerhouse to be rebuilt and to include two new identical turbine-generator units with an installed capacity of 500 kilowatts each; (4) a new 4.8- to 13.2-kilovolt, 500-foot-long transmission line extending from the powerhouse to a grid interconnection point; and (5) appurtenant facilities. The proposed project would have an annual generation of 6.5 gigawatt-hours.
