**SUPPLEMENTARY INFORMATION:**

Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at [www.regulations.gov](http://www.regulations.gov), or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 02-566-1744. For additional information about EPA's public docket, visit: <http://www.epa.gov/dockets>.

*Abstract:* The NESHAP for Coke Oven By-Product Recovery Plants (40 CFR part 61, subpart L) were promulgated on September 14, 1989 (54 FR 38073) and amended on February 12, 1999 (64 FR 7458). These regulations apply to each of the following benzene emission sources at furnace and foundry coke by-product recovery plants: Tar decanters, tar storage tanks, tar-intercepting sumps, flushing-liquor circulation tanks, light-oil sumps, light-oil condensers, light-oil decanters, wash-oil decanters, wash-oil circulation tanks, naphthalene processing, final coolers, final-cooler cooling towers, and equipment intended to operate in benzene service, including: Pumps, valves, exhausters, pressure relief devices, sampling connection systems, open-ended valves or lines, flanges or other connectors, and other control devices or systems. The provisions of this subpart also apply to benzene storage tanks, BTX (benzene-toluene-xylene) storage tanks, light-oil storage tanks, and excess ammonia-liquor storage tanks at furnace coke by-product recovery plants. This information is being collected to assure compliance with 40 CFR part 61, subpart L.

The NESHAP for Benzene Emissions from Benzene Storage Vessels (40 CFR part 61, subpart Y) were promulgated on September 14, 1989 (54 FR 38077) and amended on December 14, 2000 (65 FR 78268). These standards apply to each benzene storage vessel with a design storage capacity greater than or equal to 38 cubic meters (10,000 gallons). This subpart does not apply to: (1) Storage vessels used for storing benzene at coke by-product facilities; (2) vessels permanently attached to motor vehicles—such as trucks, rail cars, barges or ships; and (3) pressure vessels designed to operate in excess of 204.9

kPa (29.72 psia) and without emissions to the atmosphere. This information is being collected to assure compliance with 40 CFR part 61, subpart Y.

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP.

*Form Numbers:* None.

*Respondents/affected entities:* Owners or operators of benzene storage vessels and coke oven by-product recovery plants.

*Respondent's obligation to respond:* Mandatory (40 CFR part 41, subparts L and Y).

*Estimated number of respondents:* 13 (total).

*Frequency of response:* Occasionally, semiannually, and annually.

*Total estimated burden:* 1,730 hours (per year). Burden is defined at 5 CFR 1320.3(b).

*Total estimated cost:* \$201,000 (per year), which includes \$0 in annualized capital/startup and/or operation & maintenance costs.

*Changes in the Estimates:* There is an adjustment decrease in the total estimated burden as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. Based on consultations with industry, the number of coke plants subject to Subpart L has been revised since the previous ICR, while the number of facilities subject to Subpart Y remains unchanged. The number of coke plants subject to Subpart L reflects a decrease in the number of operating coke by-product recovery plants. This change results in a decrease in both burden hours and the number of responses.

**Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NSPS for Commercial and Industrial Solid Waste Incineration (CISWI) Units (Renewal)**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NSPS for Commercial and Industrial Solid Waste Incineration (CISWI) Units (EPA ICR Number 2384.05, OMB Control Number 2060-0662), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through August 31, 2020. Public comments were previously requested, via the **Federal Register**, on May 6, 2019 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

**DATES:** Additional comments may be submitted on or before July 29, 2020.

**ADDRESSES:** Submit your comments, referencing Docket ID Number EPA-HQ-OECA-2013-0315, to: (1) EPA online using [www.regulations.gov](http://www.regulations.gov) (our preferred method), or by email to [docket.oeca@epa.gov](mailto:docket.oeca@epa.gov), or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460; and (2) OMB via email to [oira\\_submission@omb.eop.gov](mailto:oira_submission@omb.eop.gov). Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change, including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the

proposed information collection within 30 days of publication of this notice to [www.reginfo.gov/public/do/PRAMain](http://www.reginfo.gov/public/do/PRAMain). Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

**SUPPLEMENTARY INFORMATION:**

Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at [www.regulations.gov](http://www.regulations.gov), or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA’s public docket, visit: <http://www.epa.gov/dockets>.

**Abstract:** The New Source Performance Standards (NSPS) for Commercial and Industrial Solid Waste Incineration (CISWI) Units (40 CFR part 60, subpart CCCC) were proposed on November 30, 1999, promulgated on December 01, 2000, and most-recently amended on: February 7, 2013; June 23, 2016; and April 16, 2019. The 2013 amendment re-established emission limits and expanded the rule to cover these CISWI subcategories: energy recovery units; waste burning kilns; incinerators; and small, remote incinerators. The 2016 amendment finalized reconsiderations to certain aspects to the 2013 amendment and finalized actions on the following four topics: the definition of “continuous emission monitoring system (CEMS) data during startup and shutdown periods;” the particulate matter (PM) limit for the waste-burning kiln subcategory; the fuel variability factor (FVF) for coal-burning energy recovery units (ERUs); and the definition of “kiln.” The 2019 amendments further clarified implementation of the 2016 standards, including certain testing and monitoring issues and inconsistencies, and editorial corrections and errors within the rules that required clarification or correction. These regulations apply to Commercial and Industrial Solid Waste Incineration (CISWI) units that either commenced construction after June 4, 2010, or

commenced reconstruction or modification after August 7, 2013. This information is being collected to assure compliance with 40 CFR part 60, subpart CCCC.

In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NSPS.

*Form Numbers:* None.

*Respondents/affected entities:*

Owners and operators of commercial and industrial solid waste incineration (CISWI) units that commenced construction after June 4, 2010 or commenced reconstruction or modification after August 7, 2013.

*Respondent’s obligation to respond:* Mandatory (40 CFR part 60 Subpart CCCC).

*Estimated number of respondents:* 11 (total).

*Frequency of response:* Semiannually and annually.

*Total estimated burden:* 1,700 hours (per year). Burden is defined at 5 CFR 1320.3(b).

*Total estimated cost:* \$970,000 (per year), which includes \$769,000 in annualized capital/startup and/or operation & maintenance costs.

*Changes in the Estimates:* There is an adjustment increase in the total estimated burden as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The change in the burden and cost estimates occurred because there is a small increase in the number of sources subject to the rule due to continued, albeit low-growth, within the industry. This ICR reflects the on-going burden and costs for existing facilities. We have adjusted the burden to reflect the increased number of existing respondents that perform annual performance tests, annual monitoring, refresher training, and report parameter exceedances. In addition, there are a small number of new facilities that are in the initial compliance phase, whose costs include purchasing monitoring equipment, conducting performance tests and establishing recordkeeping systems. The

overall result is an increase in burden hours and costs.
