

SUPPLEMENTARY INFORMATION:**I. Background**

OSHA recognition of a NRTL signifies that the organization meets the requirements in § 1910.7 of title 29, Code of Federal Regulations (29 CFR 1910.7). Recognition is an acknowledgment that the organization can perform independent safety testing and certification of the specific products covered within its scope of recognition and is not a delegation or grant of government authority. As a result of recognition, employers may use products properly approved by the NRTL to meet OSHA standards that require testing and certification of the products. OSHA maintains an informational web page for each NRTL that details its scope of recognition available at <http://www.osha.gov/dts/otpca/nrtl/index.html>.

The agency processes applications by a NRTL for renewal of recognition following requirements in appendix A to 29 CFR 1910.7. OSHA conducts renewals in accordance with the procedures in 29 CFR 1910.7, appendix A, paragraph II.C. In accordance with these procedures, NRTLs submit a renewal request to OSHA, not less than nine months or no more than one year, before the expiration date of its current recognition. A request includes a request for renewal and any additional information the NRTL may submit to demonstrate its continued compliance with the terms of its recognition and 29 CFR 1910.7. If OSHA did not conduct an on-site assessment of the NRTL's headquarters and key sites within the past 18 to 24 months, it will schedule the necessary on-site assessments prior to the expiration date of the NRTL's recognition. Upon review of the submitted material and, as necessary, the successful completion of the on-site assessment, OSHA announces its preliminary decision to grant or deny renewal in the **Federal Register** and solicits comments from the public. OSHA then publishes a final **Federal Register** notice responding to any comments and renewing the NRTL's recognition for a period of five years, or denying the renewal of recognition.

NSF initially received OSHA recognition as a NRTL on December 10, 1998 (63 FR 68309). NSF's most recent renewal was on July 14, 2014, for a five-year period expiring on July 14, 2019. NSF submitted a timely request for renewal, dated October 11, 2018 (OSHA-2006-0048-0013), and retains its recognition pending OSHA's final decision in this renewal process. The current address of the NSF facility

recognized by OSHA and included as part of the renewal request is:

1. NSF International, 789 Dixboro Road, Ann Arbor, Michigan 48105.

II. Notice of Preliminary Findings

OSHA is providing notice that NSF is applying for renewal of its recognition as a NRTL. This renewal covers NSF's existing NRTL scope of recognition. OSHA evaluated NSF's application for renewal and preliminarily determined that NSF can continue to meet the requirements prescribed by 29 CFR 1910.7 for recognition. Accordingly, OSHA is making a determination that it does not need to conduct an additional on-site review of NSF's facilities based on its evaluations of NSF's application and all other available information. This information includes OSHA's audits of NSF's NRTL recognized site during this recognition period, and the satisfactory resolution of non-conformances with the requirements of 29 CFR 1910.7. This preliminary finding does not constitute an interim or temporary approval of the request.

OSHA welcomes public comment as to whether NSF meets the requirements of 29 CFR 1910.7 for renewal of its recognition as a NRTL. Comments should consist of pertinent written documents and exhibits. Commenters needing more time to comment must submit a request in writing, stating the reasons for the request. Commenters must submit the written request for an extension by the due date for comments. OSHA will limit any extension to 10 days unless the requester justifies a longer period. OSHA may deny a request for an extension if it is not adequately justified. To obtain or review copies of the publicly available information in NSF's application and other pertinent documents (including exhibits), as well as all submitted comments, contact the Docket Office, Room N-3653, Occupational Safety and Health Administration, U.S. Department of Labor, at the above address; these materials also are available online at <http://www.regulations.gov> under Docket No. OSHA-2006-0048.

OSHA staff will review all comments submitted to the docket in a timely manner and, after addressing the issues raised by these comments, will make a recommendation to the Assistant Secretary on whether to grant NSF's application for renewal. The Assistant Secretary will make the final decision on granting the application and, in making this decision, may undertake other proceedings prescribed in appendix A to 29 CFR 1910.7.

OSHA will publish a public notice of this final decision in the **Federal Register**.
