

has the potential to injure a marine mammal or marine mammal stock in the wild (Level A harassment); or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering (Level B harassment).

Summary of Request

On April 17, 2019, we issued a final rule upon request from the Navy for authorization to take marine mammals incidental to maintenance construction activities at six facilities in Washington (84 FR 15963). The Navy plans to conduct construction necessary for maintenance of existing in-water structures at the following facilities: Naval Base Kitsap (NBK) Bangor, NBK Bremerton, NBK Keyport, NBK Manchester, Zelatched Point, and Naval Station Everett (NS Everett). These repairs include use of impact and vibratory pile driving, including installation and removal of steel, concrete, plastic, and timber piles. The use of both vibratory and impact pile driving is expected to produce underwater sound at levels that have the potential to result in harassment of marine mammals.

For the 2020–21 in-water work season, the Navy requested issuance of LOAs for work planned at NBK Manchester and Zelatched Point. The Navy submitted site-specific monitoring plans. Following NMFS review and approval of the required plans, we have issued the requested LOAs. The approved plans are available online at: www.fisheries.noaa.gov/action/incidental-take-authorization-us-navy-marine-structure-maintenance-and-pile-replacement-wa.

Authorization

We have issued two LOAs to the Navy authorizing the take of marine mammals incidental to maintenance construction activities, as described above. Take of marine mammals will be minimized through the implementation of the following planned mitigation measures: (1) Required monitoring of the construction areas to detect the presence of marine mammals before beginning construction activities; (2) shutdown of construction activities under certain circumstances to avoid injury of marine mammals; and (3) soft start for impact pile driving to allow marine mammals the opportunity to leave the area prior to beginning impact pile driving at full power. Additionally, the rule includes an adaptive management component that allows for timely modification of

mitigation or monitoring measures based on new information, when appropriate. The Navy will submit reports as required.

Based on these findings and the information discussed in the preamble to the final rule, the activities described under these LOAs will have a negligible impact on marine mammal stocks and will not have an unmitigable adverse impact on the availability of the affected marine mammal stock for subsistence uses.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Overseas Citizen Population Survey; OMB Control Number 0704–0539.

Type of Request: Renewal.

Number of Responses: 18,000.

Responses per Respondent: 1.

Annual Responses: 18,000.

Average Burden per Response: 15 minutes.

Annual Burden Hours: 4,500 hours.

Needs and Uses: The primary objective of the Overseas Citizen Population Survey (OCPS), conducted on behalf of FVAP, is to refine FVAP’s methodology for estimating the number of overseas U.S. civilians who are eligible to vote and who have registered and participated in the past. These estimates are then used to address the question of whether the registration and voting propensity of the overseas civilian population differs from that of comparable domestic or military populations. Subsequent to each Presidential election year, FVAP must report to Congress voter registration and participation rates for Uniformed Services voters and overseas citizens.

Previous attempts to collect information on the overseas citizen population to identify and measure its voter registration and participation rates in Federal elections suffered from significant bias; this effort is focused on refining a well-established method to report voter registration and participation rates from a more well-defined subgroup of overseas civilians. Conducting this research will help FVAP meet its federal and congressional mandates in terms of reporting annually on its activities and overall voter registration and participation rates after each Presidential election. The data obtained through this study is also intended to provide insights into existing barriers to UOCAVA voting and recommendations for addressing these challenges. In 2018, data from the 2016 survey was used to identify the barriers

that overseas citizens face in requesting, casting and returning their ballots—and, along with the 2018 data, which is just becoming available, will help shape FVAP’s outreach to these voters in 2020 and beyond. The 2020 version of the OCPS will test awareness and efficacy of these efforts. The survey also identified that overseas voters are more likely to avail themselves of electronic options when requesting their ballots (compared to active duty military, who rely more often on postal mail). These results guided changes to the 2020 survey, which further probes this difference. Finally, the 2018 survey allows for a midterm-to-midterm comparison of the overseas voting experience from 2014 to 2018—and the 2020 version will permit a similar comparison to the 2016 presidential election.

To obtain the necessary information, the OCPS will use data collected from a sample of registered overseas civilian voters in conjunction with previous country level estimates developed by FVAP research and establish a research method to assist FVAP in reporting voter registration and participation rates for the 2020 election.

Frequency: Biennially.
