The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: EDGAR Recordkeeping and Reporting Requirements.

OMB Control Number: 1894-0009.

Respondents/Affected Public: State, Local and Tribal Organizations, Private Sector.

Total Estimated Number of Annual Responses: 4,320.

Total Estimated Number of Annual Burden Hours: 23,130.

[Docket No. CD20-7-000]

Los Angeles County Public Works; Notice of Preliminary Determination of a Qualifying Conduit Hydropower Facility and Soliciting Comments and Motions To Intervene

On July 8, 2020, as supplemented on July 9, 2020, Los Angeles County Public

Works filed a notice of intent to construct a qualifying conduit hydropower facility, pursuant to section 30 of the Federal Power Act (FPA). The proposed M5E Pressure Reducing Station Hydroelectric Project would have an installed capacity of 430 kilowatts (kW), and would be located along an existing municipal water pipeline belonging to the applicant near Palmdale, Los Angeles County, California.

Applicant Contact: Eric Melander, 5500 Blue Heron Lane, Deming, Washington 98244, Phone No. (360) 592-5552, Email: *eric.melander@canyonhydro.com*.

FERC Contact: Christopher Chaney, Phone No. (202) 502-6778, Email: *christopher.chaney@ferc.gov*.

Qualifying Conduit Hydropower Facility Description: The proposed project would consist of: (1) Two 215-kW turbine-generators within an existing an approximately 51-foot by 38-foot building at the M5E Pressure Reducing Station; and (2) appurtenant facilities. The proposed project would have an estimated annual generation of approximately 1,236 megawatt-hours.

A qualifying conduit hydropower facility is one that is determined or deemed to meet all the criteria shown in the table below.

TABLE 1—CRITERIA FOR QUALIFYING CONDUIT HYDROPOWER FACILITY

Statutory provision	Description	Satisfies (Y/N)
FPA 30(a)(3)(A)	The conduit the facility uses is a tunnel, canal, pipeline, aqueduct, flume, ditch, or similar manmade water conveyance that is operated for the distribution of water for agricultural, municipal, or industrial consumption and not primarily for the generation of electricity.	Y
FPA 30(a)(3)(C)(i)	The facility is constructed, operated, or maintained for the generation of electric power and uses for such generation only the hydroelectric potential of a non-federally owned conduit.	Y
FPA 30(a)(3)(C)(ii)	The facility has an installed capacity that does not exceed 40 megawatts	Y
FPA 30(a)(3)(C)(iii)	On or before August 9, 2013, the facility is not licensed, or exempted from the licensing requirements of Part I of the FPA.	Y

Preliminary Determination: The proposed M5E Pressure Reducing Station Hydroelectric Project will not alter the primary purpose of the conduit, which is to supply potable water to the City of Palmdale and surrounding areas. Therefore, based upon the above criteria, Commission staff preliminarily determines that the

proposal satisfies the requirements for a qualifying conduit hydropower facility, which is not required to be licensed or exempted from licensing.
