

enhance the quality, utility, and clarity of the information we collect; (d) ways we could minimize the burden on respondents of collecting the information, including through information technology; and (e) whether these collections affect small businesses.

We will summarize any comments you submit and include the summary in our request for OMB approval. All comments will become a matter of public record. For this reason, please do not include in your comments information of a confidential nature, such as sensitive personal information or proprietary information.

In this notice, we solicit comments concerning the following information collection:

Title: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.

OMB Number: 3095–0070.

Abstract: This information collection activity provides a means to gather qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with our commitment to improving service delivery. By qualitative feedback, we mean information that provides useful insights into customers' or stakeholders' perceptions and opinions, but not statistical surveys that yield quantitative results that can be generalized to the population of study. Qualitative feedback provides insights into perceptions, experiences, and expectations, provides an early warning of issues with service, or focuses attention on areas where communication, training or changes in operations might improve delivery of products or services. Collecting this information allows for ongoing, collaborative, and actionable communications between NARA and its customers and stakeholders. It also allows us to contribute feedback directly to improving program management.

We collect feedback in areas of service delivery such as timeliness, appropriateness, accuracy of information, plain language, courtesy, efficiency, and resolution of issues with service delivery. We use customer feedback to plan efforts to improve or maintain the quality of service offered to the public. If this information is not collected, vital feedback from customers and stakeholders on NARA's services will be unavailable.

We will only submit a collection for approval under this generic clearance if it meets the following conditions:

- The collection is voluntary;
- The collection is low-burden for respondents (based on considerations of total burden hours, total number of

respondents, or burden-hours per respondent) and is low-cost for both the respondents and the Federal Government;

- The collection is non-controversial and does not raise issues of concern to other Federal agencies;
- It is targeted to solicit opinions from respondents who have experience with the program or may have experience with the program in the near future;
- It collects personally identifiable information (PII) only to the extent necessary and we will not retain it;
- We will use the information gathered only internally, for general service improvement and program management purposes, and do not intend to release it outside of the agency;
- We will not use the information gathered for substantially informing influential policy decisions; and
- Information gathered will yield qualitative information; the collections will not be designed or expected to yield statistically reliable results or used as though the results are generalizable to the population of study.

Feedback collected under this generic clearance provides useful information, but it does not yield data that can be generalized to the overall population. This type of generic clearance for qualitative information will not be used for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance. Such data uses require more rigorous designs that address: The target population to which generalizations will be made, the sampling frame, the sample design (including stratification and clustering), the precision requirements or power calculations that justify the proposed sample size, the expected response rate, methods for assessing potential non-response bias, the protocols for data collection, and any testing procedures that were or will be undertaken prior to fielding the study. Depending on the degree of influence the results are likely to have, such collections may still be eligible for submission for other generic mechanisms that are designed to yield quantitative results, but do not fall under the current generic collection.

As a general matter, information collections under this generic collection request will not result in any new system of records containing privacy information and will not ask questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private.

Issuance of Multiple Exemptions in Response to COVID-19 Public Health Emergency

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemptions; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) issued 21 exemptions in response to requests from 13 licensees. The exemptions allow these licensees temporary relief from certain requirements under NRC regulations. The exemptions are in response to the COVID-19 public health emergency (PHE). The NRC is issuing a single notice to announce the issuance of the exemptions.

DATES: The 21 exemptions were issued between June 2, 2020, and June 30, 2020.

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC issued 21 exemptions to 13 licensees in response to requests dated between April 29, 2020, and June 19, 2020. These exemptions temporarily allow the licensees to deviate from certain requirements (as cited below) of various parts of chapter I of title 10 of the *Code of Federal Regulations* (10 CFR).

The exemption from certain requirements of 10 CFR 50.71(e)(4) for Pacific Gas and Electric Company (for the Diablo Canyon Nuclear Power Plant, Units 1 and 2) allows the licensee to submit revisions of the Updated Final Safety Analysis Report (UFSAR) and Technical Specification (TS) Bases later than it would otherwise be required to by the regulations. The exemption from the requirements of 10 CFR 50.71(e)(4) results in benefit to the public health and safety by not conflicting with practices recommended by the Centers for Disease Control and Prevention (CDC) to limit the spread of COVID-19 and does not result in any decrease in safety. The exemption provides only temporary relief from the applicable regulation and the licensee has made good faith efforts to comply with the regulation.

The exemptions from certain requirements of 10 CFR 50.48(b) and 10 CFR part 50, appendix R, section III.I, for Southern Nuclear Operating Company (for Edwin I. Hatch Nuclear Plant, Unit Nos. 1 and 2, and Joseph M. Farley Nuclear Plant, Units 1 and 2), allow the licensee temporary exemption from the quarterly fire brigade drills requirement and the annual live firefighting training requirement in 10 CFR 50.48(b) and 10 CFR part 50, appendix R, section III.I. These exemptions allow the licensee to temporarily defer implementation of requirements that would otherwise cause the licensee to take actions that could conflict with practices recommended by the CDC to limit the spread of COVID-19. This licensee has committed to implement a station-specific process to manage affected personnel while ensuring the safety of its workers in maintaining performance capability.

The exemptions from certain requirements of 10 CFR part 73 for Union Electric Company (for Callaway Plant, Unit No. 1); Pacific Gas and Electric Company (for the Diablo Canyon Nuclear Power Plant, Units 1
