

development of future funding opportunities.

Data collection is designed to address the following key program evaluation questions:

1. To what extent have funded Coalitions accomplished the short term and intermediate outcomes in the NOFO Logic Model?
2. To what extent do recipients effectively implement community and societal level primary prevention programs and policy efforts during the project period?
3. To what extent was there an increase in statewide capacity to implement, evaluate and sustain

community and societal primary prevention of IPV?

4. What factors are critical to implementing and sustaining community and societal level primary prevention approach to prevent IPV?

CDC will use the information collected across all three years to understand each recipient's experiences and progress toward NOFO outcomes as well as to identify facilitators and barriers to program implementation. In addition, data collected in Project Year 3 and 4 will inform adjustments in the type and level of technical assistance provided to recipients, as needed, to

support attainment of the goals of the NOFO. Program evaluation activities allow CDC to identify and disseminate information about successful prevention strategies implemented by recipients. These functions are central to the NCIPC's broad mission of protecting Americans from violence and injury threats. The information collection will allow CDC to monitor the impact of the strategies implemented by the recipients on outcomes related to intimate partner violence prevention. It is also expected to reduce duplication of effort, enhance program impact and maximize the use of federal funds.

**DEPARTMENT OF HEALTH AND HUMAN SERVICES**

**Centers for Disease Control and Prevention**

[60Day-20-20QJ; Docket No. CDC-2020-0079]

**Proposed Data Collection Submitted for Public Comment and Recommendations**

**AGENCY:** Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

**ACTION:** Notice with comment period.

**SUMMARY:** The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies the opportunity to comment on a proposed and/or continuing information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled National Survey of Community-Based Survey of Supports for Healthy

Eating and Active Living. This data collection effort is a national survey to assess local governments' policies and practices that support healthy eating and active living among their residents.

**DATES:** CDC must receive written comments on or before September 18, 2020.

**ADDRESSES:** You may submit comments, identified by Docket No. CDC-2020-0079 by any of the following methods:

- *Federal eRulemaking Portal:* Regulations.gov. Follow the instructions for submitting comments.

- *Mail:* Jeffrey M. Zirger, Ph.D., Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS-D74, Atlanta, Georgia 30329.

*Instructions:* All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to Regulations.gov.

**Please note:** Submit all comments through the Federal eRulemaking portal (regulations.gov) or by U.S. mail to the address listed above.

**FOR FURTHER INFORMATION CONTACT:** To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS-

D74, Atlanta, Georgia 30329; phone: 404-639-7118; Email: omb@cdc.gov.

**SUPPLEMENTARY INFORMATION:** Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

5. Assess information collection costs.

**Proposed Project**

National Survey of Community-Based Survey of Supports for Healthy Eating and Active Living (CBS HEAL)—New—National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), Centers for Disease Control and Prevention (CDC).

*Background and Brief Description*

Currently, little is known about the environmental and policy supports for healthful diets and regular physical activity within a community across the U.S., and how these supports are changing across time. As a result, CDC plans to conduct a survey to address this gap in knowledge. The survey will be administered to a nationally representative sample of 4,417

communities. Respondents will be city planners/managers in these communities. Information will be collected about the following topics: Communitywide planning efforts for healthy eating and active living, the built environment and policies that support physical activity, zoning that supports healthy eating and active living, public transportation policies that support healthy eating and active living, other policies and practices that support access to healthy food and healthy eating, and policies that support employee breastfeeding. Data will be collected using a secure, web-based survey data collection system, with telephone and mail follow-up for non-response.

The proposed survey content and data collection procedures incorporate lessons learned during an initial pilot study (OMB No. 0920–0934, “Pilot Study of Community-Based Surveillance and Supports for Healthy Eating/Active Living”, expiration 5/31/2013), as well as the 2014 baseline study (OMB control number 0920–1007, “National Survey of Community Based Policy and Environmental Supports for

Healthy Eating and Active Living”, expiration 1/1/2015).

Assessment of policy and environmental supports for healthful eating and physical activity will serve multiple uses. First, the collected data will describe the characteristics of communities that have specific policy and practice supports favorable for healthy diets and regular physical activity and progress since 2014. Second, the collected data will help identify the extent to which communities implement strategies consistent with current national recommendations. Third, local agencies may use the data collected to consider how they compare nationally or with other municipalities of a similar geography, population size, or urban status. Finally, this information can help guide communities and researchers in local efforts to implement and evaluate policies and practices that support healthy behaviors and choices.

CDC requests OMB approval for an estimated 1,693 burden hours annually. Participation is voluntary and there are no costs to respondents other than their time.

**ESTIMATED ANNUALIZED BURDEN HOURS**

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden hours

**DEPARTMENT OF HEALTH AND HUMAN SERVICES**

**Food and Drug Administration**

[Docket No. FDA–2016–N–0832]

**Phibro Animal Health Corp.; Carbadox in Medicated Swine Feed; Withdrawal of Notice of Opportunity for Hearing**

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Notice of opportunity for hearing; withdrawal.

**SUMMARY:** The Food and Drug Administration (FDA), Center for Veterinary Medicine (CVM), is announcing the withdrawal of a notice of opportunity for a hearing (NOOH), which proposed to withdraw the approved uses of carbadox, a carcinogenic animal drug intended for use in feeds for swine. FDA is publishing a proposed order that, if finalized, will revoke the current approved method for carbadox because it does not satisfy the statutory requirement that there be a method to ensure that no residue of carcinogenic concern remains in the edible tissues of treated swine. If that order is finalized, we intend to publish in the **Federal Register** an NOOH proposing to withdraw approval of all new animal drug applications for use of carbadox.

**DATES:** The NOOH is withdrawn as of July 15, 2020.

**ADDRESSES:** For access to the docket to read background documents or comments received, go to <https://www.regulations.gov> and insert the docket number found in brackets in the heading of this document into the “Search” box and follow the prompts, and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

**FOR FURTHER INFORMATION CONTACT:** Diane Heinz, Center for Veterinary Medicine (HFV–6), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 240–402–5692, [diane.heinz@fda.hhs.gov](mailto:diane.heinz@fda.hhs.gov).

**SUPPLEMENTARY INFORMATION:** In an NOOH published in the **Federal Register** of April 12, 2016 (81 FR 21559; correction 81 FR 23499), we proposed to
