

- No mortality is anticipated or authorized.
- Authorized Level A harassment would be very small amounts and of low degree.
- No biologically important areas have been identified within the project area.
- For all species, San Francisco Bay is a very small and peripheral part of their range.
- For harbor seals take is concentrated in a small number of individuals with the 20 days of major activity spread out, the most severe simultaneous pile driving likely of short duration on any given day in an area of unimportant habitat with significant exiting anthropomorphic noise and disturbance and evidence the animals are habituated to these circumstances.
- San Francisco would implement mitigation measures such as vibratory driving piles to the maximum extent practicable, soft-starts, and shut downs.
- Monitoring reports from similar work in San Francisco Bay have documented little to no effect on individuals of the same species impacted by the specified activities.

Based on the analysis contained herein of the likely effects of the specified activity on marine mammals and their habitat, and taking into consideration the implementation of the monitoring and mitigation measures, NMFS finds that the total marine mammal take from the proposed activity will have a negligible impact on all affected marine mammal species or stocks.

Small Numbers

As noted above, only small numbers of incidental take may be authorized under section 101(a)(5)(D) of the MMPA for specified activities other than military readiness activities. The MMPA does not define small numbers and so, in practice, where estimated numbers are available, NMFS compares the number of individuals taken to the most appropriate estimation of abundance of the relevant species or stock in our determination of whether an authorization is limited to small numbers of marine mammals. When the predicted number of individuals to be taken is fewer than one third of the species or stock abundance, the take is considered to be of small numbers. Additionally, other qualitative factors may be considered in the analysis, such as the temporal or spatial scale of the activities.

The amount of take NMFS proposes to authorize of all species or stocks is below one third of the estimated stock abundance. These are all likely

conservative estimates because they assume all takes are of different individual animals which is likely not the case. Some individuals may return multiple times in a day, but PSOs would count them as separate takes if they cannot be individually identified.

Based on the analysis contained herein of the proposed activity (including the mitigation and monitoring measures) and the anticipated take of marine mammals, NMFS finds that small numbers of marine mammals will be taken relative to the population size of the affected species or stocks.

Unmitigable Adverse Impact Analysis and Determination

There are no relevant subsistence uses of the affected marine mammal stocks or species implicated by this action. Therefore, NMFS has determined that the total taking of affected species or stocks would not have an unmitigable adverse impact on the availability of such species or stocks for taking for subsistence purposes.

National Environmental Policy Act

To comply with the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 *et seq.*) and NOAA Administrative Order (NAO) 216-6A, NMFS must review our proposed action (*i.e.*, the issuance of an IHA) with respect to potential impacts on the human environment.

This action is consistent with categories of activities identified in Categorical Exclusion B4 (IHAs with no anticipated serious injury or mortality) of the Companion Manual for NOAA Administrative Order 216-6A, which do not individually or cumulatively have the potential for significant impacts on the quality of the human environment and for which we have not identified any extraordinary circumstances that would preclude this categorical exclusion. Accordingly, NMFS has determined that the issuance of the IHA qualifies to be categorically excluded from further NEPA review.

Endangered Species Act

Section 7(a)(2) of the Endangered Species Act of 1973 (ESA; 16 U.S.C. 1531 *et seq.*) requires that each Federal agency insure that any action it authorizes, funds, or carries out is not likely to jeopardize the continued existence of any endangered or threatened species or result in the destruction or adverse modification of designated critical habitat. To ensure ESA compliance for the issuance of IHAs, NMFS consults internally, in this case with the West Coast Region

Protected Resources Division Office, whenever we propose to authorize take for endangered or threatened species.

No incidental take of ESA-listed species is proposed for authorization or expected to result from this activity. Therefore, NMFS has determined that formal consultation under section 7 of the ESA is not required for this action.

Authorization

NMFS has issued an IHA to San Francisco for the potential harassment of small numbers of seven marine mammal species incidental to the Treasure Island Ferry Dock project in San Francisco, California, provided the previously mentioned mitigation, monitoring and reporting requirements are followed.

Dated: July 16, 2020.

Donna S. Wieting,

*Director, Office of Protected Resources,
National Marine Fisheries Service.*

[RTID 0648-XA266]

South Atlantic Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of a public meeting.

SUMMARY: The South Atlantic Fishery Management Council (Council) will hold a meeting of its Executive Committee via webinar.

DATES: The Executive Committee meeting will be held from 9 a.m. to 12 p.m. on Friday, August 7, 2020.

ADDRESSES: *Meeting address:* The meeting will be held via webinar. Webinar registration is required. Details are included in **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT: Kim Iverson, Public Information Officer, SAFMC; phone: (843) 302-8440 or toll free: (866) SAFMC-10; fax: (843) 769-4520; email: kim.iverson@safmc.net.

SUPPLEMENTARY INFORMATION: Meeting information, including the webinar link, agenda, and briefing book materials will be posted on the Council's website at: <http://safmc.net/safmc-meetings/council-meetings/>.

Agenda items include:

1. Fishery Management Plan (FMP) priorities and work schedule.
2. The President's Executive Order on promoting U.S. Fisheries.
3. The process for conducting the September 2020 Council meeting.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Written comments may be directed to John Carmichael, Executive Director, South Atlantic Fishery Management Council (see *Council address*) or electronically via the Council's website at <http://safmc.net/safmc-meetings/council-meetings/>. Comments received by close of business the Friday before the meeting (7/31/20) will be compiled, posted to the website as part of the meeting materials, and included in the administrative record; please use the Council's online form available from the website. After the Friday before the meeting (after 7/31/20), comments must be submitted through the Council's online form available from the website. Comments will automatically be posted to the website and available for Council consideration. Comments received prior to 9 a.m. on Friday, August 7, 2020 will be a part of the meeting administrative record.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for auxiliary aids should be directed to the Council office (see **ADDRESSES**) 5 days prior to the meeting.

Note: The times and sequence specified in this agenda are subject to change.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: July 16, 2020.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Notice of Findings Regarding Commercial Availability of Non-U.S. Satellite Imagery With Respect to Israel

ACTION: Notice.

SUMMARY: Section 1064, Public Law 104-201 (the 1997 Defense Authorization Act)—referred to as the Kyl-Bingaman Amendment—requires that “[a] department or agency of the United States may issue a license for the collection or dissemination by a non-Federal entity of satellite imagery with respect to Israel only if such imagery is no more detailed or precise than satellite imagery of Israel that is available from commercial sources.” Pursuant to this law, the Department of Commerce makes findings as to the level of detail or precision of satellite imagery of Israel available from commercial sources. The Department has found that satellite imagery of Israel is readily and consistently available from non-U.S. commercial sources at a resolution of 0.4 meters Ground Sample Distance (m GSD). The Department has therefore changed the existing resolution limit of 2.0 m GSD to 0.4 m GSD.

SUPPLEMENTARY INFORMATION: All licenses issued by the Commercial Remote Sensing Regulatory Affairs Office (CRSRA) include a standard condition implementing the requirements of the Kyl-Bingaman Amendment. This Notice formally specifies the resolution available from commercial sources of the State of Israel for that purpose, such that this license condition now prohibits the dissemination of satellite imagery over Israel at a resolution finer than 0.4 m GSD; this condition does not distinguish between new and archived data. Note that other conditions in CRSRA licenses, as well as other U.S. law and regulations, may still be applicable.

To determine what imagery is “available from commercial sources,” the Department looks to what “level of imagery resolution [is] readily and consistently available in sufficient quantities from non-U.S. sources.” Licensing of Private Land Remote-Sensing Space Systems, 71 FR 24474, 24479 (Apr. 25, 2006). A recent review found that there are an increasing number of non-U.S. space-based remote sensing systems that produce sub-2 m images. Many of these systems make such imagery over Israel available on commercial terms, and images can be

purchased directly from non-U.S. operators, non-U.S. resellers, and resellers within the U.S. An analysis of imagery samples, which were provided as representative of images available over Israel, found that distributors of sub-2 m images of Israel are accurately advertising the resolutions of their products. The finest resolution product analyzed had a resolution of 0.4 m GSD. The Department concluded that images of Israel at 0.4 m GSD are readily and consistently available from multiple commercial sources.

There are currently very few non-U.S. commercial sources that are or will soon be capturing imagery at lower than the revised 0.4 m resolution limit; this imagery was not found to be readily or consistently available.

The Department of Commerce will routinely review this finding as additional information is made available and invites the public to voluntarily provide evidence of availability of commercial imagery over Israel at a finer resolution than 0.4 m GSD. Any future finding by the Department will be documented in a subsequent notice in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT:

Tahara Dawkins, Commercial Remote Sensing Regulatory Affairs Office, NOAA Satellite and Information Services, 1335 East-West Highway, Suite G-101, Silver Spring, Maryland 20910; telephone (301) 713-3385, email tahara.dawkins@noaa.gov.

Tahara Dawkins,

Director, Commercial Remote Sensing Regulatory Affairs.
