If you are requesting or aggregating comments from other persons for submission to the OMB, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, “NRC Form 749, “Manual License Verification Report”/License Verification System.” The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on May 1, 2020 (85 FR 25479).

1. *The title of the information collection:* NRC Form 749, “Manual License Verification Report”/License Verification System.
2. *OMB approval number:* 3150-0223.
3. *Type of submission:* Extension.
4. *The form number if applicable:* NRC Form 749.

5. *How often the collection is required or requested:* On occasion. Licensees subject to part 37 of title 10 of the *Code of Federal Regulations*, “Physical Protection of Byproduct Material” license verification requirements must verify the legitimacy of the license with the issuing agency prior to transferring radioactive materials in quantities of concern.

6. *Who will be required or asked to respond:* Licensees are required to complete a license verification under the circumstances noted in 5 above. A License Verification System (LVS) is available to provide an electronic method for fulfilling this requirement. In cases where a licensee is unable to use the LVS to perform a verification, they will provide NRC Form 749 for manual license verification.

7. *The estimated number of annual responses:* 587.

8. *The estimated number of annual respondents:* 587.

9. *An estimate of the total number of hours needed annually to comply with the information collection requirement or request:* 59.

10. *Abstract:* When a licensee is unable to use the LVS to perform their license verification prior to transferring radioactive materials in quantities of concern, a manual process is available, in which licensees submit the NRC Form 749, “Manual License Verification Report.” The form provides the information necessary for the license issuing agencies to perform the verification on behalf of the licensee transferring the radioactive materials.
