Results show that the NIKEN substantially meets the performance criteria for brake performance without the Split or CBS braking system, while providing riders the more active control and better brake feel they expect from a performance sport machine.

2. It is the belief of Yamaha that the information described above satisfies the intent of 49 CFR part 573 and that the operator can safely operate the vehicle. The NIKEN was designed to perform and react similarly to a traditional two-wheeled motorcycle primarily for experienced, enthusiast riders, and provides the safety features and performance that these riders expect from a motorcycle.

Yamaha concluded by expressing the belief that the subject noncompliance is inconsequential as it relates to motor vehicle safety, and that its petition to be exempted from providing notification of the noncompliance, as required by 49 U.S.C. 30118, and a remedy for the noncompliance, as required by 49 U.S.C. 30120, should be granted.

NHTSA notes that the statutory provisions (49 U.S.C. 30118(d) and 30120(h)) that permit manufacturers to file petitions for a determination of inconsequentiality allow NHTSA to exempt manufacturers only from the duties found in sections 30118 and 30120, respectively, to notify owners, purchasers, and dealers of a defect or noncompliance and to remedy the defect or noncompliance. Therefore, any decision on this petition only applies to the subject motorcycles that Yamaha no longer controlled at the time it determined that the noncompliance existed. However, any decision on this petition does not relieve vehicle distributors and dealers of the prohibitions on the sale, offer for sale, or introduction or delivery for introduction into interstate commerce of the noncompliant motorcycles under their control after Yamaha notified them that the subject noncompliance existed. (Authority: 49 U.S.C. 30118, 30120; Delegations of authority at 49 CFR 1.95 and 501.8)

 Director, Office of Vehicle Safety Compliance.
