page of any filing should include docket
number P–12611–014.

The Commission's Rules of Practice
require all intervenors filing documents
with the Commission to serve a copy of
that document on each person on the
official service list for the project.
Further, if an intervenor files comments
or documents with the Commission
relating to the merits of an issue that
may affect the responsibilities of a
particular resource agency, they must
also serve a copy of the document on
that resource agency.

k. This application is not ready for
environmental analysis at this time.

l. *The existing pilot project license
authorizes the following project
facilities:* (a) Thirty 35-kilowatt, 5-
meter-diameter axial flow turbine-
generator units; (b) ten triframe mounts,
each supporting three turbine-generator
units; (c) 480-volt underwater cables
from each triframe mount to five
shoreline switchgear vaults that
interconnect to a control room and
interconnection points; and (d)
appurtenant facilities for navigation
safety and operation.

Under the current pilot project
license, which expires on December 31,
2021, Verdant installed, tested, and then
removed a total of five turbine-generator
units. Verdant also proposes to install
three turbine-generator units attached to
one triframe mount in late 2020 (*i.e.*,
Install B–1), under the existing pilot
project license.

The proposed project would be
constructed in three phases: Install B–1
(under the existing pilot license, as
noted above), Install B–2 (three triframe
mounts with a total of nine turbine-
generator units), and Install C (one
triframe mount with three turbine-
generator units). The project would
consist of a maximum of fifteen 35-
kilowatt, 5-meter-diameter axial flow
turbine-generator units with a total
installed capacity of 0.525 megawatt.
Each of the five triframe mounts would
be connected via underwater cables to
an existing control room and a proposed
shoreline switchgear vault, and via an
overhead transmission line (for the first
two triframe mounts) and an
underground transmission line (for the
remaining three triframe mounts) to a
point of interconnection.
