

For such interruption or reduction (exclusive of any restrictions provided in the agreement) due to conditions on the Department of Energy's system

which have not been arranged for and agreed to in advance, the demand charge for scheduled capacity made available to the Customer will be

reduced as to the kilowatts of such scheduled capacity which have been so interrupted or reduced for each day in accordance with the following formula:

$$\left(\begin{array}{l} \text{Number of kilowatts unavailable} \\ \text{for at least 12 hours in any calendar day} \end{array} \right) \times \left(\frac{\text{Monthly Capacity Charge}}{\text{Number of Days in Billing Month}} \right) \times \left(\frac{\text{Contract Demand}}{880,000 \text{ Kilowatts}} \right)$$

Abstract: This information collection request (ICR) addresses the reporting and recordkeeping requirements under section 8(b) of the Toxic Substance Control Act (TSCA) that are associated with the TSCA Chemical Substance Inventory (TSCA Inventory), as codified in 40 CFR part 710. TSCA section 8(b) specifically requires that EPA compile and keep current a list of chemical substances manufactured or processed for commercial purposes in the United States. That mandate was amended in 2016 and TSCA section 8(b)(4) requires EPA to designate chemical substances on the TSCA Chemical Substance Inventory as either “active” or “inactive” in U.S. commerce. The first TSCA Inventory with all chemical substances designated as “active” or “inactive” published in February 2019. Starting August 5, 2019, manufacturers and processors are required to notify EPA before reintroducing inactive substances into U.S. commerce. The implementing regulations allow manufacturers and processors to notify EPA that it must change the commercial activity designation of the subject chemical substance from inactive to active on the TSCA Inventory. This ICR covers that notice, which is made online using EPA Form No. 9600–06 (Notice of Activity Form B). Other one-time activities that are covered by the existing ICR are now complete.

The ICR, which is available in the docket along with other related materials, provides a detailed explanation of the collection activities and the burden estimate that is only briefly summarized here:

Form Numbers: EPA Form Number 9600–06, Notice of Activity Form B.

Respondents/Affected Entities: Potential respondents to the information collection activities covered by this ICR are expected to include entities that manufacture (defined by statute to include import) or process chemical substances that are regulated under TSCA. These entities are typically identified under North American Industrial Classification System (NAICS) codes 325 (Chemical Manufacture) and 324 (Petroleum and Coal Products). Although such entities are generally companies, respondents can include anyone who engages in the covered activities.

Respondent's obligation to respond: Mandatory (40 CFR 710).

Estimated total number of potential respondents: 20 (total).

Frequency of response: On occasion.

Total estimated burden: 234 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated burden: \$17,795 (per year), which includes no annualized capital investment or maintenance and operational costs.

Changes in the estimates: There is a decrease of 1,174,682 hours in the total estimated burden compared with the ICR currently approved by OMB. This decrease is largely the result of the completion of several activities associated with the initial rule familiarization and one-time reporting activities (–1,174,608 hours); a decrease in the estimated number of respondents that will need to register for CDX or otherwise update their CDX registrations (–85 hours); and the addition of CBI substantiation burden associated with the 2020 rule amendments (+7 hours). This additional burden is only applicable to submissions that include CBI claims for specific chemical identities, which are expected to be five percent of submissions. This change is considered an adjustment.

Director, Regulatory Support Division.
