This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Title of Collection: Evaluation of the Innovative Assessment Demonstration Authority Pilot Program-Survey Data Collection.

OMB Control Number: 1850-NEW.

Type of Review: A new information collection.

Respondents/Affected Public: State, Local and Tribal Governments.

Total Estimated Number of Annual Responses: 762.

Total Estimated Number of Annual Burden Hours: 375.

Abstract: This study will meet the Congressional mandate to evaluate the Innovative Assessment Demonstration Authority Pilot Program (IADA). The program (Title I, Section 1204 of the Every Student Succeeds Act, or ESSA) allows the U.S. Department of Education to exempt a handful of states from certain testing requirements if they agree to pilot new types of assessments. The study will produce a "Progress Report" and a "Best Practices Report," as mandated by Congress. The Progress Report will be based on existing documents from pilot states. The subsequent Best Practices Report will add, via surveys, the perspectives of district leaders, principals, and teachers on the development, implementation, and outcomes of IADA assessments. These reports will help the Department appropriately target its technical

assistance to tackle the largest barriers to adequate progress in pilot states and provide a valuable guide for other states that may want to develop a new assessment in the future.

Dated: August 28, 2020.

Stephanie Valentine,

PRA Coordinator, Strategic Collections and Clearance Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

Title of Collection: High School and Beyond 2021 (HS&B:21) Base-Year Full-Scale Study Data Collection.

OMB Control Number: 1850-0944.

Type of Review: A revision of an existing information collection.

Respondents/Affected Public: State, Local and Tribal Governments.

Total Estimated Number of Annual Responses: 121,952.

Total Estimated Number of Annual Burden Hours: 50,361.

Abstract: The High School and Beyond 2021 study (HS&B:21) will be the sixth in a series of longitudinal studies at the high school level conducted by the National Center for Education Statistics (NCES), within the Institute of Education Sciences (IES) of the U.S. Department of Education. HS&B:21 will follow a nationally representative sample of ninth grade students from the start of high school in the fall of 2021 to the spring of 2024 when most will be in twelfth grade. A field test will be conducted one year prior to the full-scale study. The study sample will be freshened in 2024 to create a nationally representative sample of twelfth-grade students. A high school transcript collection and additional follow-up data collections beyond high school are also planned.

In preparation for the HS&B:21 Base-Year Full-Scale study (BYFS), scheduled to take place in the fall of 2021, the Office of Management and Budget (OMB) approved (OMB #1850-0944 v.1-5) a request to conduct the HS&B:21 Base-Year Field Test (BYFT) and the BYFS sampling and state, school district, school, and parent recruitment activities, both of which began in the fall of 2019. These activities include collecting student rosters and selecting the BYFS sample.
