

probability per flight hour of less than 10^{-7}).

b. The system must be shown not susceptible to inadvertent pretensioner actuation as a result of wear and tear, or inertia loads resulting from in-flight or ground maneuvers likely to be experienced in service.

c. The seated occupant must not be seriously injured as a result of inadvertent pretensioner actuation.

d. Inadvertent pretensioner activation must not cause a hazard to the airplane nor cause serious injury to anyone who may be positioned close to the retractor or belt (e.g., seated in an adjacent seat or standing adjacent to the seat).

6. *Availability of the Pretensioner Function Prior to Flight*—The design must provide means for a crewmember to verify the availability of the pretensioner function prior to each flight, or the probability of failure of the pretensioner function must be demonstrated to be extremely remote (i.e., average probability per flight hour of less than 10^{-7}) between inspection intervals.

7. *Incorrect Seatbelt Orientation*—The system design must ensure that any incorrect orientation (twisting) of the seatbelt does not compromise the pretensioner protection function.

8. *Contamination Protection*—The pretensioner mechanisms and controls must be protected from external contamination associated with that which could occur on or around passenger seating.

9. *Prevention of Hazards*—The pretensioner system must not induce a hazard to passengers in case of fire, nor create a fire hazard if activated.

10. *Functionality after Loss of Power*—The system must function properly after loss of normal airplane electrical power, and after a transverse separation in the fuselage at the most critical location. A separation at the location of the system does not have to be considered.

11. *High-intensity Radiated Fields (HIRF) and Lightning Protection*—For airplanes that do not already incorporate 14 CFR 25.1316 and 25.1317 into their certification basis, the equipment must meet the applicable requirements of §§ 25.1316 and 25.1317. Electrostatic discharge must also be considered in the design and testing of the equipment.

Issued in Des Moines, Washington, on August 14, 2020.

James E. Wilborn,

Acting Manager, Transport Standards Branch, Policy and Innovation Division, Aircraft Certification Service.

14 CFR Part 71

[Docket No. FAA-2020-0651; Airspace Docket No. 18-AAL-13]

RIN 2120-AA66

Proposed Amendment of Federal Airway V-456

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to amend Alaskan Federal Airway V-456 due to the pending decommissioning of the Glenallen Non-Directional Beacon (NDB) in east central Alaska, and the cancellation of Federal Colored Airway Green 11 (G-11) under Regional Docket Number 20-AAL-4.

DATES: Comments must be received on or before October 19, 2020.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12-140, Washington, DC 20590; telephone: 1(800) 647-5527, or (202) 366-9826. You must identify FAA Docket No. FAA-2020-0651; Airspace Docket No. 18-AAL-13 at the beginning of your comments. You may also submit comments through the internet at <https://www.regulations.gov>.

FAA Order 7400.11D, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at https://www.faa.gov/air_traffic/publications/. For further information, you can contact the Rules and Regulations Group, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267-8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order 7400.11D at NARA, email: fedreg.legal@nara.gov or go to <https://www.archives.gov/federal-register/cfr/ibr-locations.html>.

FOR FURTHER INFORMATION CONTACT:

Christopher McMullin, Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267-8783.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would modify the route structure as necessary to preserve the safe and efficient flow of air traffic within the National Airspace System.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers (FAA Docket No. FAA-2020-0651; Airspace Docket No. 18-AAL-13) and be submitted in triplicate to the Docket Management Facility (see **ADDRESSES** section for address and phone number). You may also submit comments through the internet at <https://www.regulations.gov>.

Commenters wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to FAA Docket No. FAA-2020-0651; Airspace Docket No. 18-AAL-13." The postcard will be date/time stamped and returned to the commenter.

All communications received on or before the specified comment closing date will be considered before taking action on the proposed rule. The proposal contained in this action may be changed in light of comments received. All comments submitted will be available for examination in the public docket both before and after the comment closing date. A report summarizing each substantive public contact with FAA personnel concerned

with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the internet at <https://www.regulations.gov>. Recently published rulemaking documents can also be accessed through the FAA's web page at https://www.faa.gov/air_traffic/publications/airspace_amendments/.

You may review the public docket containing the proposal, any comments received and any final disposition in person in the Dockets Office (see **ADDRESSES** section for address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except federal holidays. An informal docket may also be examined during normal business hours at the office of the Western Service Center, Operations Support Group, Federal Aviation Administration, 2200 South 216th St., Des Moines, WA 98198.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order 7400.11D, Airspace Designations and Reporting Points, dated August 8, 2019, and effective September 15, 2019. FAA Order 7400.11D is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11D lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

Background

The upcoming decommissioning of the Glennallen NDB requires the removal of Federal Colored Airway G-11. Prior to this NPRM, the FAA published another NPRM for Docket Number 20-AAL-4 in the **Federal Register** (85 FR 35818; June 12, 2020) proposing to remove two Colored Federal airways, A-7 and G-11, and amending one Colored Federal airway, A-1 in Alaska. The removal of G-11 eliminates the ability of pilots to take advantage of the lower terrain ground track between the Northway (ORT) and the Gulkana (GKN). Currently, V-456 has a Minimum Enroute Altitude (MEA) of 11,000' MSL between ORT and GKN. This action would amend V-456 and ensure pilots have the advantage of the lower MEA of 10,000'. The proposal allows for V-456 to overlay G-11, which traverses between Nebesna NDB and Glennallen NDB.

The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) part 71 to Alaskan Federal airway V-456. The proposed Alaskan Federal airway action is described below.

V-456: V-456 currently extends from Cold Bay, AK to Northway, AK. The proposed route will be amended from Gulkana, AK; INT Gulkana 048° (T) 043° (M) and Northway 253° (T) 247° (M); Northway, AK. The unaffected portions of the existing route would remain as charted.

Alaskan VOR Federal airways are published in paragraph 6010 (b) of FAA Order 7400.11D dated August 8, 2019, and effective September 15, 2019, which is incorporated by reference in 14 CFR part 71.1. The Alaskan VOR Federal Airway listed in this document will be subsequently published in the Order.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration

proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.11D, Airspace Designations and Reporting Points, dated August 8, 2019 and effective September 15, 2019, is amended as follows:

Paragraph 6010(b) Alaskan VOR Federal Airways.

* * * * *

V-456 [Amended]

From Cold Bay, AK; King Salmon, AK; Kenai, AK; Anchorage, AK; Big Lake, AK; Gulkana, AK; INT Gulkana 048° (T) 043° (M) and Northway 253° (T) 247° (M) radials; to Northway, AK.

* * * * *

Issued in Washington, DC, on August 27, 2020.

Scott M. Rosenbloom,

Acting Manager, Rules and Regulations Group.
