History and Description of the Remains

On September 9, 2017, human remains representing, at minimum, one individual were removed from Harrisville Township, Alcona County, MI. The human remains (FA 054-17) were discovered during the excavation of a building site. Property owner Cheryl Lee Holmes notified the Alcona County Sheriff's office of the discovery. The human remains were transferred to Michigan State University's Forensic Anthropology Laboratory, where they were analyzed. No known individual was identified. No associated funerary objects are present.

On an unknown date, human remains representing, at minimum, two individuals were removed from the Black site (20EA30), Sunfield Township, Eaton County, MI. Edward Black, the site's owner, encountered the human remains (4335.13) when plowing behind his barn. He transferred them to the Michigan State University Museum. A crew was subsequently sent to the site to test the burial location for any associated funerary objects. During excavation, it was discovered that the human remains had possibly been reinterred. Likely, the human remains were previously discovered during construction of a barn and reinterred where they were redisturbed during

plowing. No known individuals were identified. The 15 associated funerary objects are one .22 caliber cartridge, four lots of fire-cracked rock fragments, seven flakes, one mineral, one unknown iron object, and one lot of iron wires.
