DEPARTMENT OF COMMERCE

Census Bureau

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Annual Survey of Manufactures

AGENCY: Census Bureau, Commerce.

ACTION: Notice of information collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act (PRA) of 1995, invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment on the proposed revision of the Annual Survey of Manufactures, prior to the submission of the information collection request (ICR) to OMB for approval.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before November 9, 2020.

ADDRESSES: Interested persons are invited to submit written comments by email to Thomas.J.Smith@census.gov. Please reference Annual Survey of Manufactures in the subject line of your comments. You may also submit comments, identified by Docket Number USBC–2020–0024, to the Federal e-Rulemaking Portal: <http://www.regulations.gov>. All comments received are part of the public record. No comments will be posted to <http://www.regulations.gov> for public viewing until after the comment period has closed. Comments will generally be posted without change. All Personally Identifiable Information (for example, name and address) voluntarily submitted by the commenter may be publicly accessible. Do not submit Confidential Business Information or otherwise sensitive or protected

information. You may submit attachments to electronic comments in Microsoft Word, Excel, or Adobe PDF file formats.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information or specific questions related to collection activities should be directed to Marlo Thornton, Assistant Division Chief, Manufacturing, Mining, and Construction Sectors, Economy-Wide Statistics Division, U.S. Census Bureau, (301) 763–7170, or email Marlo.N.Thornton@Census.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau has conducted the Annual Survey of Manufactures (ASM) since 1949 to provide key measures of manufacturing activity during intercensal periods. In economic census years ending in “2” and “7”, we do not conduct the ASM. ASM estimates are key inputs for multiple federal statistical programs, including the Bureau of Economic Analysis' National Income and Product Accounts. The ASM furnishes up-to-date estimates of employment and payroll, hours and wages of production workers, value added by manufacture, cost of materials, value of shipments by the North American Product Classification System (NAPCS) product codes, inventories, and expenditures for both plant equipment and structures. The survey provides data at the two-through six-digit North American Industry Classification System (NAICS) levels. It also provides geographic data by state at a more aggregated industry level.

ASM estimates are key inputs for multiple federal statistical programs. Federal agencies use the annual survey's input and output data as benchmarks for their statistical programs, including the Federal Reserve Board's Index of Industrial Production and BEA's National Income and Product Accounts. The data also provide the Department of Energy with primary information on the use of energy by the manufacturing sector to produce manufactured products. These data also are used as benchmark data for the Manufacturing Energy Consumption Survey, which is conducted for the Department of Energy by the Census Bureau. Within the Census Bureau, the ASM data are used to benchmark and reconcile monthly and quarterly data on manufacturing production and inventories. The ASM is the only source of complete establishment statistics for the programs mentioned above. The survey also provides valuable information to private companies, research organizations, and

trade associations. Industry makes extensive use of the annual figures on product class shipments at the U.S. level in market analyses, product planning, and investment planning. State development/planning agencies rely on the survey as a major source of comprehensive economic data for policymaking, planning, and administration. The Census Bureau plans to request a revision of a currently approved collection. We plan to make the following changes:

MA–10000—Multiple Establishment Companies and MA–10000—Single Establishment Companies:

A. *Content related to the Coronavirus Pandemic:*

1. *Item 28—Special Inquiry:*

Add a question asking respondents to provide the number of days their location was closed due to the coronavirus pandemic. This question will assist with measuring the impact on plant operations due to the Coronavirus Pandemic.

The primary objective of adding this and other questions related to the Coronavirus Pandemic described below is to measure the impact of the Coronavirus Pandemic on the manufacturing sector and manufacturing establishments, and meet the needs of the data user community. As we continue in these unprecedented times, the Coronavirus Pandemic content may shift, change or evolve and require further modifications on the ASM.

2. *Item 5 and Item 28—Special Inquiry:*

Add a statement to Item 5 to specify/clarify that donated products should be included in the value.

Add a question asking respondents if they donated products and the associated value of the donated products (breakout of Item 5, line A). Attempt to gather information on the value of shipments related to donated products by industry.

3. *Item 7:*

Add questions asking respondents to provide the payroll for production workers at the establishment by quarter. Collecting payroll information by range of months, rather than a point in time will reflect variability.

4. *Item 22:*

Add the following NAPCS to electronic instrument for all respondents:

a. 2017900000—Manufacturing of nonelectric breathing devices (including N95 and other respirators), incubators, inhalators, and resuscitators, and other surgical and medical apparatus and instruments, excluding anesthetic apparatus and parts.
