

proposes to revise the Blackeye bean inspection criteria by amending the Bean Inspection Handbook to change the sample grade tolerance for IWOFF in the Blackeye bean class only, from a count of two or more beans in 1,000 grams, to more than 0.10 percent on the basis of the representative sample as a whole, and remove clean-cut weevil-bore as a sample grade factor.

Blackeye Bean Sample Grade Tolerances for Insect Webbing or Filth

Representatives of dry bean industry stakeholders contacted AMS—FGIS to discuss ongoing issues with Blackeye beans, which grow predominately in California and Texas. The bean stakeholders told AMS the type of insect filth found in the Blackeye bean is not due to storage practices, but originates in the field, brought on by years of drought, and is the result of challenges associated with applying aerial pesticides. These elements have contributed to an increase of IWOFF (beans and pieces of beans which contain webbing, refuse, excreta, dead insects, larvae, or eggs) in the Blackeye bean crops for years. With the current sample grade factor tolerance, difficulty in meeting contract specifications is problematic. During meetings and discussions, bean stakeholders communicated the need to revise the Bean Inspection Handbook by changing Blackeye bean sample grade tolerances for IWOFF from count to percent. This would assist in moving the U.S. Blackeye bean market towards fewer quality complaints. The current sample grade tolerances for IWOFF in all classes of beans are determined on a count basis of two or more beans in 1,000 grams. This change will increase the actual count to at least three beans, and in some cases possibly four beans, depending on the variety size. These changes were recommended to AMS by the stakeholder organizations identified in the background section of this notice to facilitate the current marketing practices. AMS views this action as noncontroversial and anticipates no adverse public comment.

Removing Clean Cut Weevil Bore as a Sample Grade Factor

Dry bean representatives also discussed issues with the Blackeye bean determination of clean-cut weevil-bore (CCWB) beans as a sample grade factor. Currently, two or more clean-cut weevil-bored (beans and pieces of beans from which weevils have emerged, leaving a clean-cut open cavity free from any webbing, refuse, excreta, dead insect, larvae, or eggs) are considered sample grade/weevily in 1,000 grams. AMS

proposes to remove clean-cut weevil-bored as a sample grade criteria. This results in clean-cut weevil-bored beans considered only for damage and removes the weevily and sample grade determination based on the count of clean-cut weevil-bored beans for blackeye beans.

AMS grading and inspection services are provided through a network of federal, state, and private laboratories that conduct tests to determine the quality and condition of Blackeye beans. These tests are conducted in accordance with applicable standards using approved methodologies and can be applied at any point in the marketing chain. Furthermore, the tests yield rapid, reliable, and consistent results. The U.S. Standards for Beans and the affiliated grading and testing services offered by AMS verify that a seller's Blackeye beans meet specified requirements and ensure that customers receive the quality purchased.

In order for U.S. standards and grading procedures for Blackeye beans to remain relevant, AMS is issuing this request for information to invite interested parties to submit comments on the proposal to amend the sample grade interpretation for the class Blackeye beans. These changes do not revise or amend the Grade and Grade Requirements for the class Blackeye Beans in the U.S. Standard for Beans.

Proposed AMS Action

Based on input from stakeholder organizations in the Blackeye bean industry, AMS proposes to amend the Bean Inspection Handbook by revising the sample grade tolerances for Blackeye beans such that clean cut weevil bore is no longer a sample grade determining factor, and changing the Insect Webbing or Filth determination from a count to a percent basis.

AMS will solicit comments for 30 days. All comments received within the comment period will be made part of the public record maintained by AMS, will be available to the public for review, and will be considered by AMS before a final action is taken on this proposal.

Authority: 7 U.S.C. 1621–1627.

Bruce Summers,

Administrator, Agricultural Marketing Service.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2020–0091]

General Conference Committee of the National Poultry Improvement Plan

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice of renewal.

SUMMARY: We are giving notice that the Secretary of Agriculture has renewed the charter of the General Conference Committee of the National Poultry Improvement Plan (Committee) for a 2-year period. The Secretary of Agriculture has determined that the Committee is necessary and in the public interest.

FOR FURTHER INFORMATION CONTACT: Dr. Elena Behnke, Senior Coordinator, National Poultry Improvement Plan, VS, APHIS, USDA, 1506 Klondike Road, Suite 101, Conyers, GA 30094; (770) 922–3496.

SUPPLEMENTARY INFORMATION: The purpose of the General Conference Committee of the National Poultry Improvement Plan (Committee) is to maintain and ensure industry involvement in Federal administration of matters pertaining to poultry health.

The Committee Chairperson and the Vice Chairperson shall be elected by the Committee from among its members. There are seven members on the Committee. The poultry industry elects the members of the Committee. The members represent six geographic areas with one member-at-large.

Done in Washington, DC, this 24th day of September 2020.

Cikena Reid,

Committee Management Officer, USDA.

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

Agency Information Collection

Activities: Proposed Collection; Comment Request—Child Nutrition Database

AGENCY: Food and Nutrition Service (FNS), U.S. Department of Agriculture.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice invites the general public and other public agencies to comment on this proposed information collection.

This is a revision of a currently approved collection. This collection is the voluntary submission of data including nutrient data from the food industry to update and expand the Child Nutrition (CN) Database in support of the Child Nutrition Act of 1966. The CN Database is required in nutrient analysis software approved by USDA for use in the school meal programs. The software allows schools participating in the National School Lunch Program (NSLP) and School Breakfast Program (SBP) to analyze meals and measure the compliance of their menus with established nutrition goals and standards specified under these programs.

DATES: Written comments must be received on or before November 30, 2020.

ADDRESSES: Comments may be sent to: Natalie Partridge, Nutritionist, Nutrition, Education, Training and Technical Assistance Division, Child Nutrition Programs, Food and Nutrition Service, United States Department of Agriculture, 1320 Braddock Place, 4th Floor, Alexandria, VA 22314. Comments may also be submitted via email to the attention of Natalie Partridge at cndb-inbox@usda.gov with "CN Database Comments" in the subject line. Comments will also be accepted through the Federal eRulemaking Portal. Go to <http://www.regulations.gov> and follow the online instructions for submitting comments electronically.

All responses to this notice will be summarized and included in the request for Office of Management and Budget approval. All comments will be a matter of public record.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection should be directed to Natalie Partridge at (703) 457-6803, or natalie.partridge@usda.gov.

SUPPLEMENTARY INFORMATION: Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (b) the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions that were

used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Title: Child Nutrition Database.

Form Number: FNS-710.

OMB Number: 0584-0494.

Expiration Date: January 31, 2021.

Type of Request: Revision of currently approved collection.

Abstract: The development of the Child Nutrition (CN) Database is regulated by the United States Department of Agriculture (USDA), Food and Nutrition Service. This database is designed to be incorporated in USDA-approved nutrient analysis software and provide an accurate source of nutrient data. The software allows schools participating in the National School Lunch Program (NSLP) and School Breakfast Program (SBP) to analyze meals and measure the compliance of their menus with established nutrition goals and standards specified in 7 CFR 210.10 for the NSLP and 7 CFR 220.8 for the SBP. The information collection for the CN Database is conducted using an outside contractor. The CN Database is updated annually with brand name or manufactured foods commonly used in school food service. To update and expand the CN Database, collection of this information is accomplished by form FNS-710, *CN Database Qualification Report*. The Food and Nutrition Service's contractor collects this data from the food industry through a spreadsheet version of the FNS-710. The online web tool and paper version have been deleted from the collection because they are no longer used. The online web tool was discontinued due to outdated technology. The paper form was discontinued because no data was submitted by industry using the paper form for many years. The spreadsheet was edited to update terminology and instructions. These changes do not affect the burden for the collection. However, FNS has changed how the frequency and the estimated time per response are determined. Previously the frequency of response (or total annual

responses per respondent) was defined as each food item reported ($n=1,120$) and the hours per response represented the amount of time to report 1 food item ($n=2$ hours). The current burden defines the frequency of response as the number of times a manufacturer responds per year (1) with the hours adjusted to represent the total hours for the submission (estimated number of food items per manufacturer $[35] \times 2$ hours per food item). As a result, the number of responses for this collection have changed; however, the total overall burden remains the same (estimated 32 manufacturers $\times 1$ response per year $\times 35$ items per manufacturer $\times 2$ hours per item). The submission of data from the food industry will be strictly voluntary, and based on analytical, calculated, or nutrition facts label sources. FNS is currently researching options for modernizing the Child Nutrition Database, including the data collection, compilation, and dissemination of data. FNS is exploring the use of existing data sets and processes to collect nutrient data for food products marketed to schools. The current process is needed until the new process is finalized and in place.

Affected Public: Business or other for-profit (Manufacturers of food produced for schools).

Estimated Number of Respondents: The total estimated number of respondents is 32.

Estimated Number of Responses per Respondent: The estimated number of responses per respondent is 1. Respondents will provide new and updated data on an annual basis.

Estimated Total Annual Responses: 32.

Estimated Time per Response: The estimated time per response 70.0 hours, which represents 2 hours each for an average of 35 food items, and includes time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Estimated Total Annual Burden on Respondents: The estimated total annual burden on respondents is 2,240 hours. See the table below for estimated total annual burden for each type of respondent.

Respondent category	Type of respondents (optional)	Instruments	Form	Number of respondents	Frequency of response	Total annual responses	Hours per response	Annual burden (hours)
Business (or other for profit).	Manufacturers of food produced for schools.	CN Database Qualification Report (spreadsheet).	FNS-710	32	1	32	70	2,240.0

Respondent category	Type of respondents (optional)	Instruments	Form	Number of respondents	Frequency of response	Total annual responses	Hours per response	Annual burden (hours)
Total	32	1	32	70	2,240

Pamilyn Miller,
Administrator, Food and Nutrition Service.

DEPARTMENT OF AGRICULTURE

Rural Utilities Service

[Docket Number: **RUS-20-WATER-0031**]

Information Collection Activity; Comment Request

AGENCY: Rural Utilities Service, USDA.
ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the United States Department of Agriculture’s Rural Utilities Service (RUS), invites comments on this information collection for which the Agency intends to request approval from the Office of Management and Budget (OMB).

DATES: Comments on this notice must be received by November 30, 2020.

FOR FURTHER INFORMATION CONTACT: Kimble Brown, Innovation Center, Regulations Management Division, USDA, 1400 Independence Avenue SW, Room 5225-S, Washington, DC 20250-1522. Telephone: (202) 720-6780, Facsimile: (202) 720-8435, email: *Kimble.Brown@usda.gov*.

SUPPLEMENTARY INFORMATION: The Office of Management and Budget’s (OMB) regulation (5 CFR 1320) implementing provisions of the Paperwork Reduction Act of 1995 (Pub. L. 104-13) requires that interested members of the public and affected agencies have an opportunity to comment on information collection and recordkeeping activities (see 5 CFR 1320.8(d)). This notice identifies an information collection that the Agency is submitting to OMB for extension. Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (b) The accuracy of the Agency’s estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (c) Ways to enhance the quality, utility and clarity of the information to be collected; and (d)

Ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. Comments may be sent to: Kimble Brown, Innovation Center, Regulations Management Division, USDA, 1400 Independence Avenue SW, Room 5225-S, Washington, DC 20250-1522. Telephone: (202) 720-6780, Facsimile: (202) 720-8435, email: *Kimble.Brown@usda.gov*.

Title: 7 CFR part 1776, “Household Water Well System Grant Program”.
OMB Control Number: 0572-0139.
Type of Request: Extension of a currently approved information collection.

Abstract: The Rural Utilities Service supports the sound development of rural communities and the growth of our economy without endangering the environment. RUS provides financial and technical assistance to help communities bring safe drinking water and sanitary, environmentally sound waste disposal facilities to rural Americans in greatest need.

The Household Water Well System (HWWS) Grant Program makes grants to qualified private non-profit organizations which will help homeowners finance the cost of private wells. As the grant recipient, non-profit organizations will establish a revolving loan fund lending program to provide water well loans to individuals who own or will own private wells in rural areas. The individual loan recipients may use the funds to construct, refurbish, and service their household well systems for an existing home.

The collection of information consists of the materials to file a grant application with the agency, including forms, certifications and required documentation.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 5.12 hours per response.

Respondents: Non-profit institutions.
Estimated Number of Respondents: 6.
Estimated Total Annual Responses: 130.

Estimated Number of Responses per Respondent: 23.

Estimated Total Annual Burden on Respondents: 666 Hours.

Copies of this information collection can be obtained from Lynn Gilbert, Management Analyst, Innovation Center, Regulations Management Division, at (202) 690-2682; All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Chad Rupe,
Administrator, Rural Utilities Service.

DEPARTMENT OF COMMERCE

Census Bureau

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Small Business Pulse Survey

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public’s reporting burden. Public comments were previously requested via the **Federal Register** on May 19, 2020 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: U.S. Census Bureau.
Title: Small Business Pulse Survey.
OMB Control Number: 0607-1014.
Form Number(s): None.
Type of Request: Regular Submission, Request for a Revision of a Currently Approved Collection.

Number of Respondents: 738,000 (We anticipate receiving 20,500 responses per week for up to 36 weeks of collection each year).

Average Hours per Response: 6 minutes.

Burden Hours: 73,920 (73,800 + 120 hours for cognitive testing).

Needs and Uses: On April 22, 2020, the Office of Management and Budget authorized clearance of an emergency
