SUPPLEMENTARY INFORMATION:

I. Introduction

During the period from September 3, 2020, to September 28, 2020, the NRC granted 10 exemptions in response to requests submitted by licensees from June 16, 2020, to September 14, 2020. These exemptions temporarily allow the licensees to deviate from certain requirements (as cited below) of various parts of chapter I of title 10 of the *Code of Federal Regulations* (10 CFR Ch. I).

The exemptions from certain requirements of 10 CFR part 26, "Fitness for Duty Programs," for Exelon Generation Company, LLC (for Byron Station, Unit Nos. 1 and 2; Dresden Nuclear Power Station, Units 2 and 3; and Peach Bottom Atomic Power Station, Units 2 and 3), afford the licensee temporary relief from the workhour controls under 10 CFR 26.205(d)(1) through (d)(7). The exemptions from 10 CFR 26.205(d)(1) through (d)(7) ensure that the control of work hours and management of worker fatigue do not unduly limit licensee flexibility in using personnel resources to most effectively manage the impacts of the COVID-19 PHE on maintaining the safe operation of these facilities. Specifically, the

licensee stated that its staffing levels are affected or are expected to be affected by the COVID–19 PHE, and it can no longer meet or likely will not meet the workhour controls of 10 CFR 26.205(d)(1) through (d)(7). The licensee has committed to effecting site-specific administrative controls for COVID–19 PHE fatigue-management for personnel specified in 10 CFR 26.4(a).

The exemptions from certain requirements of 10 CFR part 50, appendix E, "Emergency Planning and Preparedness for Production and Utilization Facilities," section IV.F., "Training," for Energy Harbor Nuclear Corp. (for Perry Nuclear Power Plant, Unit No. 1); Pacific Gas and Electric Company (for Diablo Canyon Nuclear Power Plant, Units 1 and 2); and Nebraska Public Power District (for Cooper Nuclear Station) to grant temporary exemptions from the biennial emergency preparedness (EP) exercise requirement. The exemptions allow a temporary exemption from the requirements of 10 CFR part 50, appendix E, regarding the conduct of the biennial emergency preparedness exercise. These exemptions will not adversely affect the emergency response capability of the facilities because affected licensee personnel are currently qualified, and the licensees' proposed compensatory measures will enable their staff to maintain their knowledge, skills, and abilities without the conduct of the biennial emergency preparedness exercise during the exemption term.

The exemption from certain requirements of 10 CFR part 55, "Operators' Licenses," for University of Maryland (for Maryland University Training Reactor) affords the licensee a temporary exemption from requirements related to completion of biennial medical examinations of licensing operators and senior operators (under 10 CFR 55.21 and 10 CFR 55.53(i)). This licensee has committed to compensatory measures to address the delay in receipt of recommendations from a licensed physician concerning its licensed operator's health.

The exemptions from certain requirements of 10 CFR part 73 for DTE Electric Company (for Fermi-2), Susquehanna Nuclear, LLC (for Susquehanna Steam Electric Station, Units 1 and 2), and Virginia Electric and Power Company (for Surry Power Station, Unit Nos. 1 and 2), afford these licensees temporary exemptions from certain requirements of 10 CFR part 73, appendix B, "General Criteria for Security Personnel," section VI. The exemptions will help to ensure that these regulatory requirements do not unduly limit licensee flexibility in using
