This notice announces a change in benefit period eligibility under the EB program for Delaware.

The following change has occurred since the publication of the last notice regarding the State's EB status:

Based on the data released by the Bureau of Labor Statistics on September 18, 2020, the seasonally-adjusted total unemployment rate (TUR) for Delaware rose to exceed the 8.0% threshold necessary to trigger "on" to a high unemployment period in EB. Delaware enacted emergency legislation mandating that there would be a state "on" indicator for weeks after September 19, 2020, if the average TUR met the necessary criteria. As

such, the payable period for Delaware under a high unemployment period begins October 11, 2020, and eligibility for claimants has been extended from up to 13 weeks of potential duration to up to 20 weeks of potential duration in the EB program.

The trigger notice covering state eligibility for the EB program can be found at: http://ows.doleta.gov/unemploy/claims_arch.as.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of the continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The collection of information contained in the Mechanical Power Presses Standard are necessary to reduce workers' risk of death or serious injury by ensuring that employers maintain the mechanical power presses used by the workers in safe operating condition.

The following sections describe who uses the information collected under each requirement, as well as how they use it.

Section 1910.217(e)(1)(i)

Paragraph (e)(1)(i) requires employers to establish and follow a program of periodic and regular inspections of power presses to ensure that all their parts, auxiliary equipment, and safeguards are in safe operating condition and adjustment. Employers must maintain a certification record of inspections that includes the date of inspection, the signature of the person who performed the inspection, and the
