

seal (*Phoca vitulina*), Steller sea lion (*Eumetopias jubatus*), humpback whale (*Megaptera novaeangliae*), minke whale (*Balaenoptera acutorostrata*), and killer whale (*Orcinus orca*). A description of the methods and inputs used to estimate take anticipated to occur and, ultimately, the take that was authorized is found in the previous documents referenced above. The data inputs and methods of estimating take are identical to those used in the initial IHA. NMFS has reviewed recent Stock Assessment Reports, information on relevant Unusual Mortality Events, and recent scientific literature, and determined that no new information affects our original analysis of impacts or take estimate under the initial IHA.

We refer to the documents related to the previously issued IHA, which include the **Federal Register** notice of the issuance of the initial 2019 IHA for ADOT&PF's construction work (84 FR 56767; October 23, 2019), ADOT&PF's application, the **Federal Register** notice of the proposed IHA (84 FR 22453; May 17, 2019), and all associated references and documents.

Determinations

ADOT&PF will conduct activities as analyzed in the initial 2019 IHA. As described above, the number of authorized takes of the same species and stocks of marine mammals are identical to the numbers that were found to meet the negligible impact and small numbers standards and authorized under the initial IHA and no new information has emerged that would change those findings. The re-issued 2020 IHA includes identical required mitigation, monitoring, and reporting measures as the initial IHA, and there is no new information suggesting that our analysis or findings should change.

Based on the information contained here and in the referenced documents, NMFS has determined the following: (1) The required mitigation measures will effect the least practicable impact on marine mammal species or stocks and their habitat; (2) the authorized takes will have a negligible impact on the affected marine mammal species or stocks; (3) the authorized takes represent small numbers of marine mammals relative to the affected stock abundances; and (4) ADOT&PF's activities will not have an unmitigable adverse impact on taking for subsistence purposes as no relevant subsistence uses of marine mammals are implicated by this action.

National Environmental Policy Act

To comply with the National Environmental Policy Act of 1969

(NEPA; 42 U.S.C. 4321 *et seq.*) and NOAA Administrative Order (NAO) 216-6A, NMFS must review our proposed action with respect to environmental consequences on the human environment.

Accordingly, NMFS has determined that the issuance of the IHA qualifies to be categorically excluded from further NEPA review. This action is consistent with categories of activities identified in CE B4 of the Companion Manual for NOAA Administrative Order 216-6A, which do not individually or cumulatively have the potential for significant impacts on the quality of the human environment and for which we have not identified any extraordinary circumstances that would preclude this categorical exclusion.

Endangered Species Act (ESA)

Section 7(a)(2) of the Endangered Species Act of 1973 (ESA: 16 U.S.C. 1531 *et seq.*) requires that each Federal agency insure that any action it authorizes, funds, or carries out is not likely to jeopardize the continued existence of any endangered or threatened species or result in the destruction or adverse modification of designated critical habitat. To ensure ESA compliance for the issuance of IHAs, NMFS consults internally, in this case with the Alaska Regional Office, whenever we propose to authorize take for endangered or threatened species.

The effects of this proposed federal action were adequately analyzed in NMFS' Biological Opinion for the Auke Bay Ferry Terminal Modifications Project, dated October 3, 2019, which concluded that the take NMFS proposed to authorize through this IHA would not jeopardize the continued existence of any endangered or threatened species or destroy or adversely modify any designated critical habitat.

Authorization

NMFS has issued an IHA to ADOT&PF for in-water construction activities associated with the specified activity from November 1, 2020 through October 31, 2021. All previously described mitigation, monitoring, and reporting requirements from the initial 2019 IHA are incorporated.

Dated: October 23, 2020.

Donna S. Wieting,

Director, Office of Protected Resources,
National Marine Fisheries Service.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Pacific Islands Region Vessel and Gear Identification Requirements

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of Information Collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment preceding submission of the collection to OMB.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before December 28, 2020.

ADDRESSES: Interested persons are invited to submit written comments to Adrienne Thomas, NOAA PRA Officer, at Adrienne.thomas@noaa.gov. Please reference OMB Control Number 0648-0360 in the subject line of your comments. Do not submit Confidential Business Information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or specific questions related to collection activities should be directed to Walter Ikehara, Fishery Information Specialist, National Marine Fisheries Service (NMFS), Pacific Islands Region, (808) 725-5175, walter.ikehara@noaa.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a currently approved information collection.

The Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) established the Western Pacific Fishery Management Council (Council), to develop fishery ecosystem plans (FEP) for fisheries in the U.S. Exclusive Economic Zone (EEZ) and high seas of the Pacific Islands Region. These plans, when approved by the Secretary of Commerce, are implemented in Federal regulations by

NMFS and enforced by NOAA's Office of Law Enforcement (OLE) and the U.S. Coast Guard (USCG), in cooperation with state and territorial agencies. The FEPs and Federal regulations are intended to prevent overfishing and to ensure the long-term productivity and social and economic benefit of the resources.

Regulations at 50 CFR 665.16, 300.35, and 300.217 require that all U.S. vessels with Federal permits fishing for western Pacific fishery management unit species display identification markings on the vessel. Each Vessel registered for use with a permit issued under Subparts B through E and Subparts G through I of 50 CFR 665, must have the vessel's official number displayed on both sides of the deckhouse or hull, and on an appropriate weather deck. Regulations at 50 CFR 300.35 require that each vessel fishing under the South Pacific Tuna Treaty must display its international radio call sign on the hull, the deck, and on the sides of auxiliary equipment, such as skiffs and helicopters. Vessels fishing for highly migratory species in the Western and Central Pacific Fisheries Commission (WCPFC) Convention Area and in international waters must comply with the regulations at 50 CFR 300.217 requiring the display of the vessel's international radio call sign on both sides of the deckhouse or hull, and on an appropriate weather deck, unless specifically exempted. In each case, the numbers must be a specific size and in specified locations. The display of the identifying numbers aids in fishery law enforcement.

The regulations at 50 CFR 665.128, 665.228, 665.428, 665.628, and 665.804 require that certain fishing gear must be marked. In the pelagic longline fisheries, the vessel operator must ensure that the official number of the vessel is affixed to every longline buoy and float. In the coral reef ecosystem fisheries, the vessel number must be affixed to all fish and crab traps. The marking of gear links fishing or other activity to the vessel, aids law enforcement, and is valuable in actions concerning the damage to or loss of gear, and civil proceedings.

II. Method of Collection

The vessel owner or crew paint the identification markings on each vessel and associated equipment and gear. NMFS collects no other information.

III. Data

OMB Control Number: 0648-0360.

Form Number(s): None.

Type of Review: Regular submission, extension of a current information collection.

Affected Public: Business or other for-profit organizations; Individuals or households.

Estimated Number of Respondents: 324.

Estimated Time per Response: 1.25 hours per purse seine vessel and 0.75 hours per other fishery vessel for vessel ID marking. 0.083 hours per gear marking.

Estimated Total Annual Burden Hours: 2,337.

Estimated Total Annual Cost to Public: \$89,473.

Respondent's Obligation: Mandatory.

Legal Authority: 50 CFR 665, 50 CFR 300.

IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this Information Collection Request. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Highly Migratory Species Scientific Research Permits, Exempted Fishing Permits, and Letters of Authorization

AGENCY: National Oceanic & Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of information collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment preceding submission of the collection to OMB.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before December 28, 2020.

ADDRESSES: Interested persons are invited to submit written comments to Adrienne Thomas, NOAA PRA Officer, at Adrienne.thomas@noaa.gov. Please reference OMB Control Number 0648-0471 in the subject line of your comments. Do not submit Confidential Business Information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or specific questions related to collection activities should be directed to Craig Cockrell at 301-427-8503, and craig.cockrell@noaa.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

This is a request for extension of a currently approved information collection.

Exempted fishing permits (EFPs), scientific research permits (SRPs), display permits, letters of acknowledgment (LOAs), and shark research fishery permits are issued under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) (16 U.S.C. 1801 *et seq.*) and/or the Atlantic Tunas Convention Act (ATCA) (16 U.S.C. 971 *et seq.*). Issuance of EFPs
