SUPPLEMENTARY INFORMATION:

I. Background

Section 103(h) of the Federal Mine Safety and Health Act of 1977, as amended (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811, authorizes the Secretary of Labor (Secretary) to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal or other mines.

The Mine Act recognizes that education and training is an important element of efforts to make the nation's mines safe. Section 115(a) of the Mine Act states that "each operator of a coal or other mine shall have a health and safety training program which shall be approved by the Secretary." Title 30 CFR 48.3 and 48.23 require training plans for underground and surface mines, respectively. These standards are intended to ensure that miners will be effectively trained in matters affecting their health and safety, with the ultimate goal of reducing the occurrence of injury and illness in the nation's mines.

Training plans are required to be submitted for approval to the MSHA District Manager for the area in which the mine is located. Plans must contain the following: (1) Company name; (2) mine name; (3) MSHA identification number of the mine; (4) the name and position of the person designated by the operator who is responsible for health and safety training at the mine; (5) a list of MSHA-approved instructors with whom the operator proposes to make
