SUPPLEMENTARY INFORMATION:

Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA’s public docket, visit <http://www.epa.gov/dockets>.

Abstract: The 2000 Asbestos Worker Protection Rule (40 CFR part 763, subpart G) (hereafter referred to as the “2000 WPR,” or simply “WPR”) establishes workplace standards for the protection of state and local government employees who work with asbestos and who are not covered by a state plan approved by the Occupational Safety and Health Administration (OSHA). Currently, state and local government employees in 24 states, the District of Columbia (DC), and three additional U.S. territories (DC and the territories are counted as one “state equivalent”) who perform construction work, including building construction, renovation, demolition, and maintenance activities, and employees who perform brake and clutch repair work, are covered by EPA’s WPR. The WPR incorporates, by reference, the OSHA Construction Industry Standard for Asbestos (29 CFR part 1926.1101) and the General Industry Standard for Asbestos (29 CFR part 1910.1001). As a result, the WPR requires state and local government employers to use engineering controls and appropriate work practices to control the release of asbestos fibers. Covered employers must monitor employee exposure to asbestos and provide employees with personal protective equipment, training, and medical surveillance to reduce the risk of asbestos exposure. Exposure monitoring records must be maintained for 30 years, medical surveillance

records for the duration of employment of the affected employees plus 30 years, and training records for the duration of employment plus one year. Employers must also establish written respiratory protection programs and maintain procedures and records of respirator fit tests for one year.

The ICR, which is available in the docket along with other related materials, provides a detailed explanation of the collection activities and the burden estimate that is only briefly summarized here:

Form Numbers: None.

Respondents/Affected Entities: States and local government employers in the 24 states, DC, and the U.S. territories of American Samoa, Guam, and the Northern Mariana Islands that have employees engaged in asbestos-related construction, custodial, and brake and clutch repair activities without OSHA-approved state plans.

Respondent’s obligation to respond: Mandatory (40 CFR 763 Subpart G)

Estimated number of respondents: 23,437 (total).

Frequency of response: On occasion.

Total estimated burden: 372,969 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$16,894,178 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the estimates: There is no change in the burden hours compared with the ICR currently approved by OMB.

Courtney Kerwin,

Director, Regulatory Support Division.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; National Emission Standards for Hazardous Air Pollutants for Nutritional Yeast Manufacturing Residual Risk and Technology Review (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), National Emission Standards for Hazardous Air Pollutants (NESHAP) for Nutritional Yeast Manufacturing Residual Risk and

Technology Review (EPA ICR Number 2568.03, OMB Control Number 2060-0719) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through December 31, 2020. Public comments were previously requested via the **Federal Register** on May 12, 2020 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before November 30, 2020.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OECA-2020-0212, online using www.regulations.gov (our preferred method), by email to a-and-r-docket@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460. EPA’s policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

SUPPLEMENTARY INFORMATION:

Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the

EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Abstract: This supporting statement addresses information collection activities that will be imposed by amendments to the National Emission Standards for Hazardous Air Pollutants (NESHAP) from Manufacturing of Nutritional Yeast, 40 CFR part 63, subpart CCCC, referred to in this document as the Nutritional Yeast NESHAP. This rule applies to facilities where the total hazardous air pollutants (HAP) emitted are greater than or equal to 10 tons per year of any single HAP, or where the total HAP emitted are greater than or equal to 25 tons per year of any combination of HAP. Owners or operators of the affected facilities must submit initial notifications, performance tests and performance evaluation reports, and periodic reports and results. Owners or operators are also required to maintain records of performance tests and performance evaluations, monitoring, and any failure to meet a standard. These reports are used by EPA to determine compliance with the standards.

Form Numbers: None.

Respondents/affected entities: Nutritional yeast manufacturing facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart CCCC).

Estimated number of respondents: 4 (total).

Frequency of response: Semiannual.

Total estimated burden: 1,410 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$941,000 (per year), includes \$776,000 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an increase in burden from the most recently approved ICR due to an adjustment. The change in the burden and cost estimates occurred because the standard has been in effect for more than three years and the requirements are different during initial compliance as compared to on-going compliance. The previous ICR reflected those burdens and costs associated with the initial activities for subject facilities following the October 1, 2017 final rule amendments. This includes purchasing monitoring equipment, conducting performance tests, and establishing recordkeeping systems. This ICR removes costs associated with initial

compliance, including capital costs. This ICR instead reflects the on-going burden and costs for existing facilities. The adjustment increase in burden is due to an adjustment to the number of facilities conducting performance evaluations to reflect an annual average basis. This ICR reflects the burden for four facilities to conduct a performance evaluation at least once every twelve calendar quarters or three years. Finally, this ICR more accurately reflects the average hours per response, based on the total burden hours divided by the total number of responses submitted by respondents. The previous ICR incorrectly allocated the total burden hours divided by the total number of respondents.

Courtney Kerwin,

Director, Regulatory Support Division.

Abstract: Title I, part C of the Clean Air Act (CAA or the Act)—"Prevention of Significant Deterioration," and part D—"Plan Requirements for Nonattainment Areas," require all states to adopt preconstruction review programs for new or modified stationary sources of air pollution. In addition, the provisions of section 110 of the Act include a requirement for states to have a preconstruction review program to manage the emissions from the construction and modification of any stationary source of air pollution to assure that the National Ambient Air Quality Standards are achieved and maintained. Tribes may choose to
