

the local jurisdictions. Information is obtained on such items as geographic coverage and types of construction for which permits are issued.

The universe of permit-issuing places is the sampling frame for the Building Permits Survey (BPS) and the Survey of Construction (SOC). These two sample surveys provide widely used measures of construction activity, including the monthly Principal Federal Economic Indicators Housing Units Authorized by Building Permits and Housing Starts.

II. Method of Collection

One of three variants of the Form C-411 is sent to a jurisdiction when the Census Bureau has reason to believe that a new permit system has been established or an existing one has changed. This is based on information the Census Bureau obtains from a variety of sources including survey respondents, regional planning councils, and data from the Census Bureau's Geography Division on newly incorporated jurisdictions. While the C-411 is currently a mailed paper form, the Census Bureau is considering adding this collection to the standard online collection instrument (Centurion) in the future.

There are three versions of the form:

- C-411(V) for verification of coverage for jurisdictions with existing permit systems
- C-411(M) for municipalities where a new permit system may have been established
- C-411(C) for counties where new permit systems may have been established.

Forms are mailed every five years to approximately 3,500 jurisdictions that the Census Bureau has reason to believe have new or changed permit-issuing places. The Census Bureau may follow up with individual jurisdictions between mailings via email or phone as necessary to maintain the permit issuing universe. The Census Bureau follows up with approximately 150 jurisdictions annually between mailouts. The next 5-year mailout is scheduled for 2022.
