VIII. Other Information

The Public Health Service strongly encourages all grant, cooperative agreement and contract recipients to provide a smoke-free workplace and promote the non-use of all tobacco products. In addition, Public Law 103-

227, the Pro-Children Act of 1994, prohibits smoking in certain facilities (or in some cases, any portion of the facility) in which regular or routine education, library, day care, health care, or early childhood development services are provided to children. This is consistent with the HHS mission to protect and advance the physical and mental health of the American people.

Discussion

The U.S. Coast Guard is proposing to cease monitoring four, HF-voice-distress frequencies in the contiguous United States and Hawaii due to the lack of activity on these frequencies. During a 6-year period, there were four potential distress calls heard over these four voice frequencies; none required a Coast Guard response. These four voice frequencies, which we propose to cease monitoring in the contiguous United States and Hawaii, are: 4125 kHz; 6215 kHz; 8291 kHz; and 12290 kHz.

Monitoring of HF DSC frequencies for all existing regions and voice distress and hailing from Kodiak, Alaska and Guam would not be affected by this proposed action. There would also be no change in service to Puerto Rico, U.S. Virgin Islands, or American Samoa since these U.S. territories do not currently have HF infrastructure.

We believe this change would have a low impact on the maritime public as commercial satellite radios and DSC-marine-Single-Sideband HF radios have become more prevalent onboard vessels.
